Finding—2014 c 103: "The legislature finds that according to the department of health, suicide is the second leading cause of death for Washington youth between the ages of ten and twenty-four. Suicide rates among Washington's youth remain higher than the national average. An increasing body of research shows an association between adverse childhood experiences such as trauma, violence, or abuse, and decreased student learning and achievement. Underserved youth populations in Washington who are not receiving access to state services continue to remain at risk for suicide." [2014 c 103 § 1.]

Finding—2011 c 185: See note following RCW 28A.300.2851.
