

RCW 58.09.090 When record of survey not required. (1) A record of survey is not required of any survey:

(a) When it has been made by a public officer in his or her official capacity and a reproducible copy thereof has been filed with the county engineer of the county in which the land is located. A map so filed shall be indexed and kept available for public inspection. A record of survey shall not be required of a survey made by the United States bureau of land management. A state agency conducting surveys to carry out the program of the agency shall not be required to use a land surveyor as defined by this chapter;

(b) When it is of a preliminary nature;

(c) When a map is in preparation for recording or shall have been recorded in the county under any local subdivision or platting law or ordinance;

(d) When it is a retracement or resurvey of boundaries of platted lots, tracts, or parcels shown on a filed or recorded and surveyed subdivision plat or filed or recorded and surveyed short subdivision plat in which monuments have been set to mark all corners of the block or street centerline intersections, provided that no discrepancy is found as compared to said recorded information or information revealed on other subsequent public survey map records, such as a record of survey or city or county engineer's map. If a discrepancy is found, that discrepancy must be clearly shown on the face of the required new record of survey. For purposes of this exemption, the term discrepancy shall include:

(i) A nonexistent or displaced original or replacement monument from which the parcel is defined and which nonexistence or displacement has not been previously revealed in the public record;

(ii) A departure from proportionate measure solutions which has not been revealed in the public record;

(iii) The presence of any physical evidence of encroachment or overlap by occupation or improvement; or

(iv) Differences in linear and/or angular measurement between all controlling monuments that would indicate differences in spatial relationship between said controlling monuments in excess of 0.50 feet when compared with all locations of public record: That is, if these measurements agree with any previously existing public record plat or map within the stated tolerance, a discrepancy will not be deemed to exist under this subsection.

(2) Surveys exempted by foregoing subsections of this section shall require filing of a record of corner information pursuant to RCW 58.09.040(2). [2010 c 8 s 18004; 1992 c 106 s 1; 1973 c 50 s 9.]
