## EXECUTIVE SUMMARY

Background As Washington State becomes more diverse, the state's Transitional Bilingual Instruction Program (TBIP) served 9.4 percent of the total state student population. English language learners (ELL) are defined by state law as those whose primary language is other than English and who have English language skill deficiencies that impair their learning in regular classrooms. As accountability for all students continues to be a paramount focus, the education of students with limited English proficiency and issues related to their educational needs are receiving greater scrutiny.

The state's Transitional Bilingual Instruction Program provides additional funding to districts for services to ELLs. In the 2008-09 school year, total direct bilingual expenditures were $\$ 88.7$ million, of which $\$ 71.0$ million were from state appropriations. The total in state and local funding represents a 12 percent increase from the 2007-08 school year (4 percent increase in state funding).

Results in ELLs of school age who must acquire English in the context of schooling, Brief

Staffing
and Instruction need to develop full proficiency in all language domains (listening, speaking, reading, and writing) and in all language skills for use in all the content areas. Language used in school is unique to that context, and becomes increasingly complex from one grade to the next.

Even though research has found that long-term academic performance is more likely to occur when students have significant exposure to instruction in their primary language, only 12 percent of ELLs receive instruction in their primary language because of a shortage of qualified bilingual teachers. For districts that serve ELLs from multiple language groups, instruction in the primary language may not be practicable.

Most TBIP funds allocated for educating ELLs are spent for staff salaries and benefits. The 2008-09 school year showed a five percent increase in FTE teachers and no change in FTE instructional aides. The trend continues that districts rely on instructional aides (IAs) to provide supplemental instruction to ELLs. Instructional support in the student's primary language is typically provided by IAs within the classroom setting. There is a continued need to provide professional development to both teachers and IAs to enable them to provide better access to the curriculum for ELLs.

In the 2008-09 school year, a total of 97,021 ELL enrollments were served statewide, an increase of 1,825 from the previous year. The TBIP funded a total of 89,435 individual ELL students; a 1.6 percent increase from the previous year $(88,046)$. During the 2008-09 school year, the pattern of
uneven distribution of ELLs that existed in previous years continued to exist among school districts. For example, of the school districts serving ELLs in the 2008-09 school year, twenty-eight (28) districts served a population of 1,000 or more ELLs in Grades K-12.

Languages Spoken

A total of 202 different languages were represented in the state Transitional Bilingual Instruction Program in the 2008-09 school year. Spanish was spoken by sixty-seven percent of ELLs, more students than students speaking all other languages combined. Seventeen percent of all ELLs in Washington spoke one of the following six languages in descending order: Russian, Vietnamese, Ukrainian, Somali, Korean, and Tagalog. The number of students speaking Somali, Vietnamese, Spanish and Tagalog has increased, while the number speaking Korean, Russian, and Ukrainian has declined. In 46 districts, at least 20 different languages were spoken; however, in 60 school districts, Spanish was the dominant language spoken by at least 95 percent of the ELL population.

## Length of Stay

The Transitional Bilingual Instruction Program is intended to provide temporary support services until ELLs can develop English language skills that will enable them to learn successfully in English. ELLs may be served in the TBIP until they meet the exit criteria established by the state. Approximately 16 percent of the state's ELL students transitioned out of the program in 2008-09.

Research consistently demonstrates that learning "academic English" takes four to six years. The federal No Child Left Behind Act of 2001 (NCLB), requires states to align their English language proficiency assessment with their English language development standards. For Washington State, this process was completed in the fall of 2005-06 when the Washington Language Proficiency Test (WLPT-II) was administered for the first time during the 2006 annual testing window. The WLPT-II measures a student's English language proficiency in reading, writing, listening, and speaking.

NCLB also requires academic assessment of students who are identified as having limited or no English proficiency. Therefore, students enrolled in the TBIP must take the Washington Assessment of Student Learning (WASL). Although analysis of WASL and WLPT-II data shows that smaller percentages of ELLs meet the WASL standard regardless of the grade or subject matter, Washington State data also demonstrates that ELLs who have transitioned out of TBIP by meeting the state's exit criteria perform comparably to native English speakers' state averages across grade levels on the WASL in reading, writing, and math.

# INTRODUCTION 

## SECTION 1

## BACKGROUND

Washington State, reflecting national trends, is becoming more ethnically and linguistically diverse. More than 90 percent of recent immigrants come from non-English-speaking countries, and many immigrants arrive with little or no formal education. Immigration, language use, and birth patterns may likely result in a continued increase in the linguistic, cultural, and racial/ethnic diversity of our public schools. For school year 2008-09, the state's Transitional Bilingual Instruction Program (TBIP) enrollment showed a 2 percent increase from the previous school year. A concentration of English language learners (ELLs) continues to be found in the urban areas along the I-5 corridor and rural areas such as the Yakima Valley.

There is great diversity among Washington State's ELLs. Some are recent arrivals from foreign countries, while others are born and raised in the United States. The level of education achieved prior to immigrating to the United States, family socioeconomic status, and cultural background vary greatly among this population. Students coming from the same country may speak different languages or dialects and differences may exist within groups. Thus, generalizations about any group of students may mask background characteristics that are important to understand when designing appropriate curricular and instructional interventions.

When students with little or no previous exposure to the English language enter the public school system, they are most often unable to profit fully from instruction in English and may experience a high risk of academic failure. Thus, issues related to their academic progress, including meeting higher academic standards, are receiving greater scrutiny. The No Child Left Behind law requires ELLs to meet the same Washington Assessment of Student Learning (WASL) reading and math proficiency targets required of all students. Under the federal law, ELLs are reported as a student category for calculating adequate yearly progress (AYP) and some districts have found the ELL category to be one of the most challenging AYP targets to meet. Thus, there is a greater urgency to address the educational needs of this group of students.

## WASHINGTON'S PROGRAM FOR ELLs

Educating ELLs is primarily a state and local responsibility. While the federal government provides support for ELLs, districts rely heavily on state aid and local revenues to support English language acquisition programs. ${ }^{1}$ The state's Transitional Bilingual Instruction Act of 1979, amended in 1984, 1990, and 2001, provides additional state funding to Washington districts for services to students who have a primary language other than English and who have English language skill deficiencies that impair their learning in regular classrooms. ${ }^{2}$ The major objective of the State Transitional Bilingual Instruction Program (TBIP) is for students to develop academic English competence. Instructional assistance is restricted to students who have very little or no English speaking ability and are in most need of help, as defined by the eligibility requirements. ${ }^{3}$

RCW 28A.180.030 defines the State Transitional Bilingual Instruction Program as:
(a) A system of instruction which uses two languages, one of which is English, as a means of instruction to build upon and expand language skills to enable the pupil to achieve competency in English. Concepts and information are introduced in the primary language and reinforced in the second language: PROVIDED, that the program shall include testing in the subject matter in English; or
(b) In those cases in which the use of two languages is not practicable as established by the Superintendent of Public Instruction and unless otherwise prohibited by law, an alternative system of instruction which may include English as a second language and is designed to enable the pupil to achieve competency in English.

As a student learns more English, there is a corresponding decrease in the use of the primary language. This is the "transitional" aspect of the program, as established in Washington. While the state program emphasizes "bilingual instruction," relatively few students in the program actually receive formal instruction in their primary language (see Section 2). Thus, for the majority of ELLs in the state, their English Language Development (ELD) program is more accurately defined as an English-as-a-Second Language (ESL) program. An overreliance on instruction in English, rather than in the student's primary language, is common in other states as well. ${ }^{4}$

[^0]
## Program Funding

In addition to basic education funding, districts receive state funds to provide supplemental instructional support to ELLs. Funding to districts is based on an October-through-May bilingual enrollment headcount. In the 2008-09 school year, the state provided a per pupil allocation of $\$ 904.17$ for a total of 82,916 ELLs $^{5}$, a 6.5 percent increase from the previous year. In the 2008-09 school year, total bilingual expenditures were $\$ 88.7$ million, of which $\$ 71.0$ million were from state resources, a 4.1 percent increase from the previous year. Figure 1-1 shows the growth of state funding for the program over the last 10 years. The figure does not adjust the funding amounts for inflation and does not include district indirect costs for operating the program.

Figure 1-1: Growth in State Funding for the TBIP by School Year

Current year source: Report 1191SN OSPI Apportionment for Aug 31, 2009
The state is not the only source of revenue for the program. Districts can choose to supplement their state and federal program support with local levy funds. In the 2008-09 school year, districts reported contributing approximately $\$ 17.3$ million to provide instructional services to ELLs beyond state TBIP funding. However, accurate data that reflects actual district and levy funds used to support local programs for ELLs is not available because these amounts are coded to programs other than program 65 (the designation for TBIP).

## Program Eligibility

Program funding is intended for those students with the greatest need. Therefore, not all students who have a primary language other than English qualify for program services. Eligible students must have a primary language other than English and their English language skills must be sufficiently deficient or absent to impair learning in an all-English classroom setting. The program serves eligible students in Grades K-12.

[^1]
## Section 1: Introduction

A two-phase process is used to identify potential English language learners: a) the district must first identify students with a primary language other than English, and b) the student's level of English language must be assessed to determine his/her level of proficiency in English. Students are eligible if they score at the limited English proficiency level on the Washington Language Proficiency Test-II (WLPTII) placement test administered by the district. To continue receiving program services, ELLs are annually assessed on the WLPT-II annual test, which measures their English language proficiency level in listening, speaking, reading, and writing. Eligibility ends when a student scores at the Transitional Level (Level 4) on the WLPT-II.

## OBJECTIVES, SCOPE AND METHODOLOGY

The Legislature requires OSPI to annually review the TBIP and submit the results to the Legislature. This report provides information on the program for ELLs in the 2008-09 school year and also includes historical program information. Specifically, this report provides information on the following areas:

- Staffing patterns and instruction to implement the program.
- Enrollment patterns of students who have participated in the program and how the patterns have changed over time.
- Languages spoken by students in the program.
- Length of stay (time) students spent in the program.
- Academic and linguistic performance of ELL students served by the program.

Data for the report was obtained from districts with an approved program for ELL students in the 2008-09 school year. Student level data was provided on the districts' TBIP Annual Reports submitted electronically to the Migrant Student Data and Recruitment (MSDR) office and data from OSPI's assessment department. Historical data reported by districts to OSPI in previous years was also used. Prior to 2002-03, data was collected at the district level and reported directly to OSPI. Starting in the 2002-03 school year, OSPI contracted with MSDR to collect student level data, which has increased the accuracy of the information. The report provides data aggregated at the state and district levels.

The state continues to improve the data collection system to ensure that the most accurate numbers are captured. The report has traditionally reported the number of students that were enrolled in the program which reflected multiple enrollments within and across districts.

## STAFFING AND INSTRUCTION <br> SECTION 2

Nearly all expenditures used to educate ELLs were for staff salaries. Although research has found that students perform better when provided more intensive instruction in their primary language, few students (12 percent) received primary language instruction. One reason is that many districts have ELL populations representing multiple languages, in some cases as many as 87 languages. There is also a critical shortage of qualified teachers who are bilingual and trained to provide content level instruction in a language other than English. This continues to be the case even though the ELL student population has grown for over 30 years and Spanish-speaking students represent more than 67 percent of the ELL population. Over half the teachers in the TBIP have an ESL or bilingual endorsement. However, many of the ESL-endorsed teachers speak only English.

## PROGRAM EXPENDITURES

Nearly all of the Transitional Bilingual Instruction Program funding for educating ELLs was used for instruction-related activities. Twenty percent of the total program expenditures reported was funded by other than state resources. Figure 2-1 shows the amounts and proportions spent on various categories in the 2008-09 school year.

Figure 2-1: Program Expenditures (School Year 2008-09)

| Type of <br> Program Expenditures | Total <br> Expenditures | Percent <br> of Total |
| :--- | :---: | :---: |
| Salaries-certificated staff | $\$ 37,184,036$ | $41.9 \%$ |
| Salaries-classified staff | $\$ 24,147,805$ | $27.2 \%$ |
| Benefits | $\$ 24,232,446$ | $27.3 \%$ |
| Instructional Supplies | $\$ 1,973,579$ | $2.2 \%$ |
| Other | $\$ 1,126,519$ | $1.3 \%$ |
| Total | $\$ 88,664,386$ | $100.0 \%$ |

These data are collected from the F-196 Annual Financial Statements, program 65.

## Section 2: Staffing and Instruction

## STAFFING ISSUES

ELLs require highly qualified teachers knowledgeable and skilled in first/second language acquisition theory, ESL, and sheltered instruction methodologies. This knowledge base provides teachers with the instructional skills to assist ELLs to develop the academic knowledge and English language proficiency required to meet state standards. However, one obstacle facing the education of ELLs is the shortage of properly trained teachers to provide effective instruction. Many districts report difficulties recruiting teachers qualified to teach students with limited English proficiency. Providing training to teachers of ELL students also appears to be a significant issue. The National Center for Education Statistics reported in 2002 that while 41 percent of teachers in the U.S. teach ELLs, less than 13 percent have received any training or professional development. ${ }^{6}$

In the current education reform movement that aims to have all students meet high academic standards, schools face a challenge to find and train teachers to meet the academic and linguistic needs of the growing number of ELLs. The reauthorized federal Elementary and Secondary Education Act (also known as the No Child Left Behind Act of 2001) requires teachers of ELLs to be "highly qualified" if they teach core academic subjects. To address this challenge, many districts are combining state TBIP and federal Title III funding to meet this immediate need.

## Qualifications and Training of Program Staff

Of the 502 TBIP-funded Washington teachers ( 300 FTE ) who provided instruction to ELLs in the 2008-09 school year, 67 percent had an ESL endorsement, 20 percent had a bilingual endorsement, and 19 percent had both a bilingual and an ESL endorsement. Sixty-three percent of the 194 districts with a TBIP provided some ESL and bilingual education in-service training to teachers and to instructional aides.

The numbers above only reflect the level of training received by teachers who provide instruction to ELLs and are funded by TBIP. Many teachers and instructional aides who teach ELLs are not funded by the TBIP and data are not collected on the qualifications and training of these staff. However, Title III of NCLB requires districts to provide professional development to build a district's capacity to instruct ELLs that is research-based and on-going. The state is required to report on specific types of professional development provided by districts. The tables below reflect the number of staff trained and the content of those trainings (Figures 2-2 and 2-3).

[^2]Figure 2-2: Professional Development Participants (School Year 2008-09)

| Professional Development Audience | Number of <br> Districts | Number of <br> participants |
| :--- | :---: | ---: |
| Classroom Teachers | 123 | 16,380 |
| ELL/Bilingual Teachers | 111 | 3,986 |
| Principals | 80 | 843 |
| Other Administrators | 81 | 1,256 |
| Non-Administrative Staff | 111 | 3,986 |
| Para-professionals | 101 | 3,842 |
| Community | 16 | 1114 |
| Parents | 25 | 1,491 |
| Total |  | 31,898 |

Figure 2-3: Professional Development Activities (School Year 2008-09)

| Types of Professional Development | ELL <br> Instructional <br> strategies | ELL <br> assessment | ELP standards <br> and academic <br> content | Mainstream <br> Content <br> Material | Other* |
| :--- | :---: | :---: | :---: | :---: | ---: |
| Number of Districts | 139 | 48 | 53 | 24 | 57 |
| Total Hours | 17,718 | 969 | 3,451 | 738 | 2,081 |
| Total Participants | 16,901 | 2,511 | 2,468 | 1,225 | 3,441 |
| Classroom Teachers | 11,640 | 905 | 1,185 | 204 | 1,273 |
| ELL/Bilingual Teachers | 1,459 | 624 | 475 | 657 | 470 |
| Principals | 497 | 107 | 55 | 17 | 102 |
| Other Administrators | 368 | 64 | 50 | 32 | 154 |
| Para-professionals | 1,739 | 610 | 565 | 284 | 471 |
| Non-Administrative Staff | 516 | 198 | 77 | 31 | 323 |
| Comm-based Personnel | 42 | 1 | 45 | 0 | 22 |
| Parents | 640 | 2 | 16 | 0 | 626 |

*Other category includes multicultural education, parent involvement, ELL with disabilities, dual language training and Spanish to facilitate communication with parents.

## Types of Staff

In the 2008-09 school year, 2,475 staff provided instruction in the TBIP. Those providing instructional services to ELLs included 1,062 instructional aides and 873 teachers. As reflected in the tables below (Figure 2-4 and 2-5), districts continued to rely on instructional aides to provide instruction to ELLs. The number of staff involved in the program who were charged to the TBIP budget code 65 increased by more than 4 percent from the previous year.

Of the full-time equivalent (FTE) staff reported on the Apportionment Personnel Summary Report S275, instructional aides represented about 51 percent of the total FTEs in the 2008-09 school year, a decrease of 1 percent from the previous year. Figures 2-4 and 2-5 provide more information on the FTE staffing trends.

Figure 2-4: ELL Student/Program Staff Ratios by School Year

| Staff \& Student Ratios | 2007-08 |  |  | 2008-09 |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Teachers | Aides | All Staff | Teachers | Aides | All Staff |
| Total Staff | 819 | 1,555 | 2,374 | 873 | 1,602 | 2,475 |
| Staff FTE | 493 | 545 | 1,038 | 519 | 545 | 1,064 |
| Student/staff ratio <br> Based on total students <br> served and total staff | 116 | 61 | 40 | 111 | 61 | 39 |
| Student/staff ratio <br> Based on average number <br> of students funded <br> and total staff | 98 | 52 | 34 | 95 | 52 | 34 |
| Student/staff ratio <br> Based on average number <br> of students funded <br> and FTE staff | 164 | 148 | 78 | 160 | 152 | 78 |

These data are collected from Preliminary School District Personnel Summary Report S275, Table 11, Program 65 (TBIP), duty routes 31, 32, 33 and 91 . Staff data includes staff funded by TBIP and other funding sources.

## Program Support Student/Staff Ratios

The TBIP provided additional instructional support to the ELL's basic education program. Student/staff ratios can be measured in different ways: by using the total number of students and staff in the program, by the average number of students served per month, and by the total number of FTE staff. The ratios are slightly smaller when calculated in terms of the average number of students served and much larger when measured in terms of FTE staff.

Figure 2-4 shows various ratios for the 2008-09 school year. When more instructional aides are involved in the program, the ELL student per aide ratio is lower than the ratio of ELL students per teacher. As reflected in Figure 2-5 below, instructional aides continue to provide a significant percentage of the instructional support to ELLs. Therefore, effective supervision of instructional aides and coordination of program services are essential to student outcomes.

Figure 2-5: Five-Year Staffing Trends (in FTEs) by School Year

| Type of Staff (FTE) | $\mathbf{2 0 0 4 - 0 5}$ | $\mathbf{2 0 0 5 - 0 6}$ | $\mathbf{2 0 0 6 - 0 7}$ | $\mathbf{2 0 0 7 - 0 8}$ | $\mathbf{2 0 0 8 - 0 9}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Teachers | 496 | 535 | 521 | 495 | 519 |
| Percent of Total FTEs | $47 \%$ | $49 \%$ | $49 \%$ | $48 \%$ | $49 \%$ |
| Instructional Aides | 550 | 555 | 538 | 545 | 545 |
| Percent of Total FTEs | $53 \%$ | $51 \%$ | $51 \%$ | $52 \%$ | $51 \%$ |
| Total FTEs <br> (teachers + aides) | 1,046 | 1,089 | 1,059 | 1,040 | 1,064 |

These data are collected from Apportionment Personnel Summary Report S275, Table 11, Program 65 (TBIP), duty routes 31, 32, 33 and 91.

## INSTRUCTIONAL MODELS AND INSTRUCTIONAL STRATEGIES

Nationwide, a variety of instructional models and approaches has been implemented with the goal of effectively instructing the growing ELL student population. These range from no instruction in the student's primary language and providing only ESL instruction, to providing instruction in both English and the student's primary language. ${ }^{7}$ Descriptions of six instructional models below include statements of instructional focus for each.

## Program Models

## - Dual Language Program (Two-Way Immersion or Two-Way Bilingual Education)

Dual language programs (also known as two-way bilingual education and twoway immersion) provide integrated language and academic instruction for native English speakers and native speakers of another language with the goals of high academic achievement, first and second language proficiency, and cross-cultural understanding (Christian, 1994).

## - Developmental Bilingual Education (DBE or Late-Exit)

Developmental bilingual education (DBE), also referred to as late-exit bilingual education (Ramirez, 1992), is an enrichment program that educates English language learners using both English and their first language for academic instruction. DBE programs aim to promote high levels of academic achievement in all curricular areas and full academic language proficiency in the students' first and second languages.

## - Transitional Bilingual Education (TBE or Early-Exit)

Transitional bilingual education (TBE), also known as early-exit bilingual education (Ramirez, 1992), is the most common form of bilingual education for English language learners in the United States. TBE provides academic instruction in English language learners' primary language as they learn English.

## - Sheltered Instruction (SI or Content-Based ESL)

Sheltered instruction (SI) is an approach used widely for teaching language and content to English language learners, particularly as schools prepare students to achieve high academic standards. In SI, academic subjects (e.g., science, social studies) are taught using English as the medium of instruction. SI is most often used in classes comprised solely of English language learners, although it may be used in classes with both native English speakers and English language learners when necessitated by scheduling considerations or by small numbers of English language learners. (In Washington State, this approach is most often associated with middle and high school ESL classes. ELLs at the elementary

[^3]level, who receive push-in support from TBIP staff or limited pull-out in the context of a basic education grade-level classroom, would also fall under this model.)

## - Newcomer Program

The goals of newcomer programs are to help students acquire beginning English language skills along with core academic skills and knowledge, and to acculturate to the U.S. school system. Some programs have additional goals, such as developing students' primary language skills and preparing students for their new communities.

Figure 2-6: Enrollments by Type of Program (School Year 2008-09)

| Instructional Model | Count By <br> Enrollment | Percent of <br> Total | Count By <br> Student | Percent of <br> Total |
| :--- | ---: | ---: | ---: | ---: |
| Sheltered Instruction | 83,726 | $86.3 \%$ | 79,384 | $88.1 \%$ |
| Transitional Bilingual-Late Exit | 4,141 | $4.3 \%$ | 3,437 | $3.8 \%$ |
| Transitional Bilingual-Early Exit | 4,031 | $4.2 \%$ | 3,301 | $3.7 \%$ |
| Dual Language | 3,333 | $3.4 \%$ | 2,474 | $2.7 \%$ |
| Newcomer Program | 1,027 | $1.1 \%$ | 796 | $0.9 \%$ |
| Parent Waiver | 763 | $0.8 \%$ | 739 | $0.8 \%$ |
| Total Counts* | 97,021 | $100.0 \%$ | 90,131 | $100.0 \%$ |

*Includes students served in more than one program model.

## Instructional Strategies

With an increased emphasis on building the capacity of all teachers to meet the needs of English language learners, many districts have identified instructional strategies for all teachers that enhance the quality of instruction in basic education classrooms with diverse learners.

## Guided Language Acquisition Design (GLAD)

Project GLAD training provides research-based theory and practical, effective strategies for the development of academic language, literacy, academic achievement and cross-cultural skills of ELLs. Districts throughout Washington State have supported cohorts of teachers to complete GLAD training as well as investing in key trainers at the district level to offer ongoing GLAD training and support.

## Sheltered Instruction Observation Protocol (SIOP)

The Sheltered Instruction Observation Protocol is both a valid and reliable, research-based observation instrument as well as a guide for planning instruction that focuses on both the academic and linguistic needs of ELLs. The model is built on the premise that teachers possessing these skills will be prepared to provide English language learners with a better learning environment. Critical features of high quality instruction for English language learners are embedded within the SIOP model.

## Section 2: Staffing and Instruction

## Cognitive Academic Language Learning Approach (CALLA)

CALLA is a research-based instructional program that fosters the school achievement of students who are learning through the medium of a second language. This professional development program focuses on science and math. The professional development programs described above are specifically designed to provide teachers with the instructional strategies most effective in educating ELLs. These programs are among the most commonly used in Washington State to provide English language development strategies to TBIP and mainstream staff.

## Effectiveness of Strategies

Research on the effectiveness of different instructional approaches has demonstrated that the more instruction is provided in the student's primary language, the better the student's overall academic performance over time. ${ }^{8}$ Experts believe that developing proficiency in one language promotes the development of proficiency in a second language. Results from the analysis of student-level data that OSPI reported in 2000 were consistent with this conclusion. ${ }^{9}$ These findings indicate that more academic instruction needs to be given in the student's primary language rather than simply relying on English language instruction. There are indications that the shift to provide more academic instruction in the student's native language is occurring in our state.
To improve the effectiveness of the TBIP, OSPI developed: (1) standards and benchmarks for English language learners in reading, writing, listening, and speaking, (2) a statewide English language proficiency assessment (see Section 6), and (3) a system to track ELLs' academic progress through the use of a secure student identifier. OSPI also updates the definitions of instructional program models to conform to national definitions used in research. The uniformity in definitions provides districts with more guidance to improve instructional program implementation.

[^4]
## Section 2: Staffing and Instruction

(this page intentionally left blank)

## STUDENTS SERVED <br> SECTION 3

The number and percentage of ELL students in Washington showed a 2 percent increase in ELL enrollment in school year 2008-09, while total state enrollments declined slightly (-0.4 percent). As with previous years, ELLs are unevenly distributed across the state. Some districts served either a larger number or a higher percentage of ELLs than in the previous year, while other districts served fewer or no ELLs. Approximately 54 percent of all ELL students in the TBIP were enrolled in Grades K-3. Of the 28 districts reporting more than 1000 students, 68 percent reported an increase in ELL enrollment.

## TOTAL ELL STUDENT TBIP ENROLLMENT

In the 2008-09 school year, the program served 89,435 students (distinct count or 97,021 duplicate count). This number represents 2,087 more students than served in 2007-08. For school year 2008-09, the eight-month average funding of ELLs eligible for TBIP was 82,916. Student numbers in this report will reflect the following:

- Duplicate Count: The total number of students served represents multiple enrollments in one or more districts throughout the year.
- Distinct Count: Students counted only once regardless of multiple enrollments.
- ELL Funded: Number of students counted for funding on the P-223 district report, which excludes parent waivers.

Figure 3-1: ELLs as a Percentage of Total Students by School Year

In the 2008-09 school year, ELLs served in the TBIP comprised 9.4 percent of the total statewide student population (see Figure 3-1) and showed an increase by 0.1 percent in the percentage served from the previous year.

## Section 3: Students Served

Not only has ELL enrollment increased as a percent of total enrollment, the absolute number of ELL enrollments in the state has more than tripled since 1990-91 (see Figure 3-2).

Figure 3-2: ELLs as a Percentage of Total Students by School Year

| School <br> Year | Total <br> State Enrollment | Total ELL Student <br> Enrollment | Percent <br> ELL |
| :---: | :---: | :---: | :---: |
| $1990-1991$ | 833,906 | 28,473 | $3.4 \%$ |
| $1991-1992$ | 862,423 | 34,338 | $4.0 \%$ |
| $1992-1993$ | 889,680 | 38,735 | $4.4 \%$ |
| $1993-1994$ | 908,017 | 44,266 | $4.9 \%$ |
| $1994-1995$ | 928,669 | 47,214 | $5.1 \%$ |
| $1995-1996$ | 945,283 | 50,737 | $5.4 \%$ |
| $1996-1997$ | 964,642 | 54,124 | $5.6 \%$ |
| $1997-1998$ | 984,564 | 56,939 | $5.8 \%$ |
| $1998-1999$ | 993,623 | 62,132 | $6.3 \%$ |
| $1999-2000$ | 997,580 | 66,281 | $6.6 \%$ |
| $2000-2001$ | 997,487 | 70,431 | $7.1 \%$ |
| $2001-2002$ | $1,002,257$ | 72,215 | $7.2 \%$ |
| $2002-2003$ | $1,006,054$ | 73,201 | $7.3 \%$ |
| $2003-2004$ | $1,010,229$ | 79,221 | $7.8 \%$ |
| $2004-2005$ | $1,005,882$ | 87,307 | $8.7 \%$ |
| $2005-2006$ | $1,017,777$ | 92,377 | $9.1 \%$ |
| $2006-2007$ | $1,028,377$ | 89,910 | $8.7 \%$ |
| $2007-2008$ | $1,031,846$ | 95,196 | $9.2 \%$ |
| $2008-2009$ | $1,027,625$ | 97,021 | $9.4 \%$ |

Note: Students with multiple enrollments during the school year are counted in each district enrolled. Includes parent waived enrollments.

## UNEVEN DISTRIBUTION OF ELL STUDENTS

ELL students are not evenly distributed across the state. Of Washington's 295 districts, 194 reported ELL enrollment in the 2008-09 school year and this represents 65.5 percent of the state's districts (see Figure 3-3). The number of districts reporting ELL enrollments has remained about the same for the past few years. Analysis of the 194 district reports shows the following numbers:

- Twenty-two districts report that ELLs represent at least 25 percent of their total district enrollment. (Figure 3-4)
- Twenty-eight districts enrolled more than 1,000 ELLs and served 65 percent of all ELLs enrolled in the TBIP. (Figure 3-5)
- Of those districts with more than 1,000 students:
- 2 districts (Tukwila and Kent) experienced an increase of more than 10 percent.
- 9 districts (Edmonds, Evergreen (Clark), Federal Way, Mount Vernon, Othello, Seattle, Tacoma, Vancouver, and Wenatchee) reported a decline in enrollment, ranging from less than one percent decline to more than six percent decline.
- Seven districts received funding for less than ten students and forty-seven for less than 50 students, while forty-six had 500 or more ELL students.

Figures 3-3 to $3-5$ show the number of districts with a TBIP as well as the districts with the highest percentage and number of ELLs served. Appendix C provides more information on the percentage and number of students.

Figure 3-3: Number of Districts with a Program for ELLs by School Year

## Section 3: Students Served

Twenty-two districts show that ELLs represent at least 25 percent of their total district enrollment. As reflected in the table below, Palisades, Wahluke, and Roosevelt report more than 50 percent of their total enrollment as ELL (Figure 34).

Figure 3-4: Districts with at Least 25\% ELL Enrollment (School Year 2008-09)

| District | Total <br> Students | Average <br> Enrollment | Percent <br> Students |
| :--- | ---: | ---: | :---: |
| Palisades | 27 | 20 | $74.1 \%$ |
| Wahluke | 1,992 | 1,154 | $57.9 \%$ |
| Roosevelt | 23 | 13 | $56.5 \%$ |
| Bridgeport | 775 | 353 | $45.5 \%$ |
| Orondo | 202 | 89 | $44.1 \%$ |
| Royal | 1,406 | 557 | $39.6 \%$ |
| Mabton | 928 | 363 | $39.1 \%$ |
| Brewster | 878 | 328 | $37.4 \%$ |
| Othello | 1,482 | 1,311 | $37.2 \%$ |
| Granger | 606 | 212 | $36.6 \%$ |
| Manson | 2,822 | 984 | $34.9 \%$ |
| Tukwila | 1,925 | 671 | $34.9 \%$ |
| North Franklin | 95 | 33 | $34.7 \%$ |
| Paterson | 13,865 | 4,776 | $34.4 \%$ |
| Pasco | 2,476 | 835 | $33.7 \%$ |
| Quincy | 3,447 | 1,146 | $33.2 \%$ |
| Toppenish | 241 | 73 | $30.3 \%$ |
| Prescott | 974 | 293 | $30.1 \%$ |
| Warden | 14,5487 | 975 | $28.1 \%$ |
| Grandview | 1,664 | $28.0 \%$ |  |
| Sunnyside | 3,769 | $25.9 \%$ |  |
| Yakima |  |  |  |

Twenty-eight districts enrolled more than 1,000 ELLs during the 2008-2009 school year and these districts collectively served 69 percent of all ELLs enrolled in the TBIP statewide. Of these districts with more than 1000 ELL students, two-thirds showed gains in enrollment that ranged up to 18 percent (Figure 3-5).

Figure 3-5: Districts with 1,000 or More ELLs Enrolled by School Year
Districts with at Least 1,000 LEP Students

| District | $\begin{gathered} 2007- \\ 2008 \\ \hline \end{gathered}$ | $\begin{array}{r} 2008 \\ 2009 \\ \hline \end{array}$ | Percent <br> Change |
| :---: | :---: | :---: | :---: |
| Seattle | 5,830 | 6,085 | 4.4\% |
| Pasco | 5,185 | 5,346 | 3.1\% |
| Kent | 3,917 | 4,399 | 12.3\% |
| Yakima | 4,206 | 4,242 | 0.9\% |
| Highline | 3,673 | 3,891 | 5.9\% |
| Federal Way | 3,004 | 2,981 | -0.8\% |
| Mukilteo | 2,500 | 2,611 | 4.4\% |
| Renton | 2,285 | 2,343 | 2.5\% |
| Evergreen (Clark) | 2,365 | 2,299 | -2.8\% |
| Tacoma | 2,324 | 2,212 | -4.8\% |
| Vancouver | 2,175 | 2,102 | -3.4\% |
| Everett | 1,878 | 1,994 | 6.2\% |
| Edmonds | 1,954 | 1,948 | -0.3\% |
| Bellevue | 1,799 | 1,856 | 3.2\% |
| Kennewick | 1,740 | 1,836 | 5.5\% |
| Auburn | 1,779 | 1,795 | 0.9\% |
| Sunnyside | 1,700 | 1,712 | 0.7\% |
| Wenatchee | 1,700 | 1,603 | -5.7\% |
| Mount Vernon | 1,594 | 1,553 | -2.6\% |
| Lake Washington | 1,379 | 1,518 | 10.1\% |
| Othello | 1,427 | 1,421 | -0.4\% |
| Toppenish | 1,265 | 1,303 | 3.0\% |
| Clover Park | 1,283 | 1,299 | 1.2\% |
| Wahluke | 1,217 | 1,289 | 5.9\% |
| Tukwila | 971 | 1,151 | 18.5\% |
| Spokane | 1,145 | 1,147 | 0.2\% |
| Grandview | 1,045 | 1,085 | 3.8\% |
| Northshore | 995 | 1,034 | 3.9\% |

Count is distinct students per district. If student transferred districts they are counted for each district (Excludes waived students).

## GRADE LEVELS OF STUDENTS SERVED

Most ELLs served by the TBIP were enrolled in $\mathrm{K}-3$ and accounted for 54 percent of the ELL enrollment in the 2008-09 school year.
Beginning at Grade 3, the number of ELL student enrollment gradually declines (Figure 3-6). At Grade 9, there is a slight increase, however, the numbers of ELLs continue to decline in Grades 10, 11, and 12.

Figure 3-7 presents the number of

Figure 3-6 Total ELL Enrollment by Grade (School Year 2008-09)
 total and new ELL students served by grade level of the duplicated ELL student count, which includes student enrollments within or across multiple districts. The student count reflects the transitory nature of ELL families as new students represent nearly 10 percent or more throughout most of the grade levels.

Figure 3-7 Total ELL and New to Program Enrollment by Grade
(School Year 2008-09)

| Grade | Total LEP <br> Students | \% of LEP Students by Grade | New LEP <br> Students | \% of New LEP <br> Students by Grade | \% of New Students/Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| K | 14,634 | 16.2\% | 14,256 | 60.4\% | 97.4\% |
| 1 | 14,013 | 15.5\% | 1,634 | 6.9\% | 11.7\% |
| 2 | 12,035 | 13.4\% | 1,098 | 4.7\% | 9.1\% |
| 3 | 8,274 | 9.2\% | 871 | 3.7\% | 10.5\% |
| 4 | 7,235 | 8.0\% | 726 | 3.1\% | 10.0\% |
| 5 | 6,161 | 6.8\% | 726 | 3.1\% | 11.8\% |
| 6 | 5,509 | 6.1\% | 640 | 2.7\% | 11.6\% |
| 7 | 4,307 | 4.8\% | 674 | 2.9\% | 15.6\% |
| 8 | 3,759 | 4.2\% | 585 | 2.5\% | 15.6\% |
| 9 | 5,132 | 5.7\% | 1,207 | 5.1\% | 23.5\% |
| 10 | 3,553 | 3.9\% | 558 | 2.4\% | 15.7\% |
| 11 | 2,950 | 3.3\% | 395 | 1.7\% | 13.4\% |
| 12 | 2,572 | 2.9\% | 242 | 1.0\% | 9.4\% |
| Total | 90,134 | 100.0\% | 23,612 | 100.0\% | 26.2\% |

Total includes students who have been reported in two grade levels.
New ELLs, those served for the first time by a district, represented 26 percent of the total ELL student enrollment. As expected, ELLs in kindergarten comprised most ( 60 percent) of the new ELLs. Enrollment of new ELLs in subsequent grade levels declined through Grade 9 , where there was a spike in new enrollment.

## LANGUAGES SPOKEN <br> SECTION 4

Students served by the TBIP program spoke a total of 202 languages. About 67 percent spoke Spanish and another 17 percent spoke Korean, Russian, Somali, Tagalog, Ukrainian, and Vietnamese. Nine districts had 70 or more languages spoken by ELLs, while many districts served ELLs whose primary language is Spanish.

## WIDE DISPARITY IN THE NUMBER OF LANGUAGES AMONG DISTRICTS

In 2002-03, the Washington State began collecting student level data on ELLs reported to the Bilingual Database housed at the Migrant Student Data \& Recruitment Office in Sunnyside, Washington. The issuing of student identification numbers provided a vehicle to assist in better data collection.

A total of 202 primary, non-English languages were represented among the students served by the TBIP in the 2008-09 school year. ${ }^{10}$ For the last 22 years, students speaking Spanish have accounted for the largest number of ELLs, more than all other ELL languages combined. In the 2008-09 school year, Spanish was the primary language spoken by 67 percent of all ELLs. This percentage fluctuates about 1 percent per year.

The following figures provide information on the number of students speaking the languages represented in the program. Appendix A lists the number of students in the TBIP with an identified non-English primary language.

There were 93 languages spoken by fewer than 10 students, while only 7 languages included 1,000 or more students (Figure 4-1).

Figure 4-1: Number of Language Groups by Students Served
(School Year 2008-09)

[^5]
## Section 4: Languages Spoken

## NUMBER OF STUDENTS SPEAKING VARIOUS LANGUAGES

Approximately 17 percent of all Washington ELLs spoke Korean, Russian, Somali, Tagalog, Ukrainian, or Vietnamese (Figure 4-2). According to data reported, there was a decline in the number of students reported in 3 of these 7 major language groups.

Figure 4-2: One-Year Change in Enrollment by Major Language Group

| Language | 2007-2008 | 2008-2009 | \% of Change | Language | 2007-2008 | 2008-2009 | \% of Change |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Spanish | 64,567 | 65,584 | 1.6\% | Hindi | 293 | 321 | 9.6\% |

| Lao | 346 | 339 | -2.0\% | Makah | 77 | 105 | 36.4\% |

Appendix B provides more information on the number of primary languages in the districts and the number of students for each of the languages.

Some districts provided instruction to ELLs from many different language backgrounds. In the 2008-09 school year, 46 districts served students from 20 or more language groups (Figure 4.3). Most of these districts are located in Western Washington along the $I-5 / l-405$ corridor.

Figure 4-3: Districts with 20 or More Languages (School Year 2008-09)

| District | ELL Enrollm | Languages | District | ELL Enrollment | Languages |

| Bellingham | 691 | 33 | North Kitsap | 232 | 20 |

In contrast, all or nearly all ELLs in other districts spoke Spanish. In 62 districts, 95 percent or more of the enrolled ELLs identified Spanish as their primary language (Figure 4.4). Twenty-seven districts served ELLs from only one primary non-English language group.

| $2008-2009$ | 90,133 | 60,251 | $66.8 \%$ |

## LENGTH OF STAY SECTION 5

The purpose of the TBIP is to provide temporary English language development services until ELLs develop adequate academic English language skills. As discussed in Section 1, students are eligible to enter the TBIP if they score at the limited English proficiency level 1, 2, or 3 on the WLPT-II placement test. ELLs are assessed annually on the Washington Language Proficiency Test-II annual test to determine continued eligibility in the TBIP. Eligibility ends when a student scores at the Transitional Level (Level 4).

## STATUS OF STUDENTS SERVED

English language learners may leave the program primarily in two ways: They can either be transitioned out of the program by meeting the exit performance criteria or graduate from high school. A parent or legal guardian may waive TBIP services for his/her child; however, federal law requires that waived students participate in the annual WLPT-II assessment. Therefore, waived students remain eligible for TBIP services until they meet the exit criteria established by the state.

Figure 5-1 provides information about the number of ELLs exiting and the reasons for exiting the program during the last five years. Approximately 19 percent of the ELLs served in the 2008-09 school year left the TBIP. About 17 percent $(14,792)$ either transitioned out of the program or graduated prior to meeting the exit criteria. Another 1.9 percent $(1,670)$ dropped out or left for unknown reasons and 0.3 percent (284) were determined to have special education needs rather than English language limitations. Appendix D lists information on the number of students for each district transitioning after demonstrating English proficiency on the annual WLPT-II.

Figure 5-2: Student Status Definitions

| Definitions of Student Categories |  |
| :--- | :--- |
| Student Categories | This count included students in all of the categories listed on table 5-1. |
| Graduated | Student graduated from high school, but who may or may not have met the <br> transitional level on the WLPT-II. |
| Transitioned | Student scored at the Transitional Level on the WLPT-II and transitioned <br> out of TBIP services. |
| Dropped Out | Student dropped out of school. |
| Special Education | Student was exited from the program because of non-linguistic factors. |
| Unknown Reasons | Student left the school system and the district has no record of transfers <br> within or out-of-state. |

Research has demonstrated that achievement of "academic" English, the level needed to participate in unaided instruction in English, takes four to six years to develop. While experts may disagree about the best method for teaching ELLs, nearly all experts agree that the process of learning academic English for students with little to no English language skills normally exceeds three years.

Figure 5-3 provides information on the amount of time students were served by the TBIP. The Number of Exited LEP Students is a combined count of transitioned, graduated, dropped-out, special education determination and left for unknown reasons About half (56 percent) of those exiting the program participated for less than three years.

Figure 5-3: Number of Distinct ELLs Served by Time in Program (School Year 2008-09)

| Time in Program | Total <br> Number <br> Served | Number of <br> Exited LEP <br> Students | \% of Total <br> Number <br> Served |
| :--- | ---: | ---: | ---: |
| $<1$ Year | 15,073 | 1,541 | $10.2 \%$ |
| $>=1$ and $<2$ Years | 22,964 | 3,579 | $15.6 \%$ |
| $>=2$ and $<3$ Years | 17,580 | 4,221 | $24.0 \%$ |
| $>=3$ and $<4$ Years | 11,254 | 2,716 | $24.1 \%$ |
| $>=4$ and $<5$ Years | 8,976 | 2,023 | $22.5 \%$ |
| $>=5$ and $<6$ Years | 10,118 | 2,031 | $20.1 \%$ |
| $>=6$ Years | 3,470 | 635 | $18.3 \%$ |
| Total | 89,435 | 16,746 | $18.7 \%$ |

Time in program is calculated from program entry and exit dates. If no date available, 6/17/09 is used. Count excludes parent waived students.

According to a comprehensive longitudinal study that tracked the academic achievement of ELLs enrolled in a variety of instructional models, it takes a minimum of four years of instruction in a student's second language in order to reach gradelevel performance levels using that language. ${ }^{11}$ The length of time needed depends on several factors, including the level of academic proficiency in content areas prior to exposure to the new language and the type of program used to provide the instruction. Section 6 provides more information about test results for ELLs in Washington.

# LANGUAGE PROFICIENCY AND WASL TEST RESULTS 

## SECTION 6

#### Abstract

A statewide test used to measure English language proficiency in reading and writing was first administered in 2002. To fulfill the requirements of NCLB, an English Language Proficiency Assessment, aligned to the state reading, writing, and communication standards, was adopted during the 2004-05 school year and fully implemented during the 2005-06 school year.

NCLB also requires students who have very limited or no English proficiency to participate in the state's accountability assessments (WASL). ELLs who are enrolled in a U.S. school for the first year are exempt from taking the reading WASL. Although ELL students in the TBIP meet the WASL standard far less frequently than their English-proficient peers, ELLs who reach English language proficiency meet standard on the WASL at percentages similar to the state average for all students.

## WASHINGTON LANGUAGE PROFICIENCY TEST RESULTS

During the 2004-05 school year, the state adopted the Washington Language Proficiency Test (WLPT-II) administered for the first time during the 2005-06 school year. All ELLs in Grades K-12 are required to take the WLPT-II test during a February-to-March testing window. The WLPT-II measures a student's English language proficiency in reading, writing, listening, and speaking. The WLPT-II test allows students, regardless of their level of English proficiency, to demonstrate the level of English language proficiency they have acquired.

The WLPT-II categorizes four levels of English language proficiency:

- Level 1 - Beginning/Advanced Beginning,
- Level 2 - Intermediate,
- Level 3 - Advanced, and
- Level 4 - Transitional.

Level 1 indicates minimal or no English language proficiency, while Level 4 indicates a level of English language proficiency sufficient to be instructed through an Englishonly instructional program. Eligibility for TBIP participation ends when a student scores at the Transitional level on the WLPT-II.

In school year 2008-09, there were 84,507 students present during the February/March window and the May make-up window of the WLPT-II, of which 82,283 students ( 97.4 percent) completed and received a score.

|  |  |  |  |  |  |  |

*Students who were unable to complete or to respond to the test were reported as Not Scored
Figure 6-1 demonstrates that 14,577 students met the Transitioned Performance Level on the WLPT-II and exited the TBIP. Included in this count are Title III Native American and Waived TBIP students who are required by NCLB to participate in the WLPT-II annual assessment. The exit results represent an increase of 303 students transitioning as compared to the 2007-08 school year.
Figure $6-2$ shows the number of the WLPT-II students remaining in the program and the percent whose tests were not scored. More than 94 percent of all ELL students in the state participated in the annual assessment of English language ability.

Figure 6-2: WLPT-II Results, by Grade and Exit Numbers (School Year 2008-09)

## WASL RESULTS

ELLs in their first year of enrollment in a U.S. public school are not required to take the reading or writing academic tests. However, the U.S. Department of Education requires ELLs to take the mathematics portion of the WASL. Subsequent to their first year of enrollment, several thousand ELLs were required to take the reading and writing portions of the WASL, even though they did not have the level of English language skills to understand the reading texts or test questions, or have the ability to respond effectively in English.

OSPI's Assessment and Student Information Division analyzed the 2009 assessment results for ELLs who tested on both the WLPT-II and the WASL. The analysis of the assessment results for students testing in required grades shows that 59 percent of ELL students who transitioned from the TBIP program met the WASL reading standard, 37 percent of students tested met the WASL math standard, and 51 percent of ELLs who were at the transitional level on the WLPT-II met the writing standard

Regardless of the grade or subject, ELLs made progress towards meeting the standard on the WASL. Figures 6-3 to $6-5$ show how ELLs who met the Transitional level on the WLPT-II performed on the WASL in the required grades.

Figure 6-3 Met WLPT-II Transitional Level and WASL 2009 Reading Performance

| WLPT-II <br> Grade | Exempt from Reading WASL | Not Tested for Reading WASL 2009 | WASL Levels |  |  |  | WLPT-II <br> Transitional and L3 \& L4 Reading WASL | Percent of WLPT-II <br> Transitional who Met Reading WASL | Total ELLs at WLPT-II Transitional Level and in WASL File |

| Total | 33 | 162 | 256 | 813 | 1,070 | 271 | 1,341 | 51\% | 2,605 |

## Section 6: Language Proficiency and WASL Results

Figure 6-5 Met WLPT-II Transitional Level and WASL 2009 Math Performance

| WLPT-II Grade | Not Tested for Math WASL 2009 | WASL Levels |  |  |  | WLPT-II <br> Transitional and L3 \& L4 Math WASL | Percent of WLPT-II Transitional who Met Math WASL | Total ELLs at WLPT-II <br> Transitional Level and in WASL File |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | L1 | L2 | L3 | L4 |  |  |  |
| Grade 3 | 32 | 220 | 386 | 703 | 219 | 922 | 59\% | 1,560 |
| Grade 4 | 34 | 512 | 611 | 298 | 183 | 481 | 29\% | 1,638 |
| Grade 5 | 22 | 358 | 426 | 275 | 198 | 473 | 37\% | 1,279 |
| Grade 6 | 21 | 323 | 313 | 206 | 73 | 279 | 30\% | 936 |
| Grade 7 | 10 | 264 | 127 | 110 | 57 | 167 | 29\% | 568 |
| Grade 8 | 21 | 195 | 175 | 117 | 48 | 165 | 30\% | 556 |
| Grade 10 | 71 | 171 | 83 | 55 | 19 | 74 | 19\% | 399 |
| Total | 211 | 2,043 | 2,121 | 1,764 | 797 | 2,561 | 37\% | 6,936 |

In 2009, 36 of the 37 ELLs in their first year of enrollment in a U.S. public school who scored at the transitional level on the WLPT tested on the WASL mathematics assessment, but none met standard for grade level.

OSPI's web site provides more information on WASL results at the state, district, and school when there are at least 30 students in the tested grade and subject (see http://reportcard.ospi.k12.wa.us).

Appendix B: Languages by District
(this page intentionally left blank)

## APPENDIX C <br> DISTRICT PARTICIPATION RATES

This appendix presents the ELL enrollment data reported by districts to the MSDR Bilingual database. The ELL Students column is a count of unique students including waivers, while ELL enrollments count students with multiple enrollments within and across districts during the same school year.

| District | Total Student Count | ELL Students |  | ELL Enrollments |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Count | Percent of Total | Count | Percent of Total |
| STATE TOTAL | 1,007,157 | 93,210 | 9.3\% | 97,021 | 9.6\% |
| Aberdeen | 3,459 | 290 | 8.4\% | 302 | 8.7\% |
| Anacortes | 2,852 | 63 | 2.2\% | 63 | 2.2\% |
| Arlington | 5,569 | 185 | 3.3\% | 186 | 3.3\% |
| Auburn | 14,936 | 1,795 | 12.0\% | 1,796 | 12.0\% |
| Bainbridge Island | 4,015 | 30 | 0.7\% | 31 | 0.8\% |
| Battle Ground | 13,268 | 756 | 5.7\% | 769 | 5.8\% |
| Bellevue | 17,249 | 1,856 | 10.8\% | 1,932 | 11.2\% |
| Bellingham | 10,652 | 643 | 6.0\% | 691 | 6.5\% |
| Bethel | 18,032 | 319 | 1.8\% | 322 | 1.8\% |
| Blaine | 2,204 | 105 | 4.8\% | 105 | 4.8\% |
| Bremerton | 5,061 | 143 | 2.8\% | 144 | 2.8\% |

## APPENDIX D

## LENGTH OF STAY BY DISTRICT

This appendix presents the number of ELL students who took the WLPT-II annual test, the number and percent who transitioned out of the TBIP by demonstrating English proficiency, and the percent of these transitioning students that participated two or more years. Student time-in-program is calculated based on ELL enrollment and exit dates. This table excludes Title III Native Americans who took the WLPT-II but did not participate in TBIP.

| District | Total ELLs <br> Tested | Number <br> Transition | Exit <br> Percent of <br> Total | Percent <br> served 2+ <br> years |

## APPENDIX E

## DISTRICT WLPT-II and WASL RESULTS

This appendix presents the number of ELL students who transitioned out of the TBIP during 2008-09 by demonstrating English proficiency on the WLPT-II and who also took the Washington Assessment of Student Learning (WASL). The percentages of all Washington students who met standard are included to provide a comparison with those transitioning from ELL programs. Districts without transitioning students are not listed in this table.

Office of Superintendent of Public Instruction Old Capitol Building
P.O. Box 47200

Olympia, WA 98504-7200
2009

[^0]:    ${ }^{1}$ See Public Education: Title I Services Provided to Students With Limited English Proficiency, U.S. General Accounting Office, December, 1999.
    ${ }^{2}$ Beginning in 1979, ELL students were funded along with certain special education students as part of a "special needs" grant. In 1984, funding for the program was set up as a separate allocation. Other program changes were made in the 1984 law, including how eligible students are identified.
    ${ }^{3}$ The transitional bilingual instruction program operates under the authority of RCW 28 A. 180.060 and as detailed in chapter 392-160 WAC.
    ${ }^{4}$ See Public Education: Meeting the Needs of Students With Limited English Proficiency, U.S. General Accounting Office, February 2001.

[^1]:    ${ }^{5}$ This was the average number of students enrolled in the program on each of eight monthly count dates, October through May, as reported by districts on the P223-H report. The total number of ELL students served by the program in 2008-09 was 89,435 . See Section 3 for more information on enrollment trends.

[^2]:    ${ }^{6}$ See The Preparation and Professional Development of Teachers of English Language Learners, Antunez, B., ERIC Clearinghouse on Teaching and Teacher Education, September 2002.

[^3]:    ${ }^{7}$ See A National Study of School Effectiveness for Language Minority Student's Long-Term Academic
    Achievement, Wayne P. Thomas and Virginia P. Collier, George Mason University, for the Center for Research on Education, Diversity and Excellence, 2002. http://www.crede.ucsc.edu/research/llaa/1.1 final.html

[^4]:    ${ }^{8}$ See Reading and Second Language Learners—Research Report, OSPI, April 1999, and School Effectiveness for Language Minority Students, Thomas, W. and Collier, V., National Clearinghouse for Bilingual Education, December 1997. The effects of different instructional approaches may not be seen in the short-term since language acquisition in an academic context is a long-term process.
    ${ }^{9}$ The average length of time ELL students spent in the program was less when they were receiving more intensive instruction in their primary language along with instruction in English. See Educating Limited-EnglishProficient Students in Washington State, OSPI, December 2000, pg. 16.

[^5]:    ${ }^{10}$ Some districts could not fully identify the languages spoken by their ELL students, so there may be more than 202 languages spoken by ELL students statewide.

[^6]:    ${ }^{11}$ See A National Study of School Effectiveness for Language Minority Student's Long-Term Academic Achievement, Wayne P. Thomas and Virginia P. Collier, George Mason University, for the Center for Research on Education, Diversity \& Excellence, 2002.

[^7]:    *Students who were unable to complete or to respond to the test were reported as Not Scored.
