

High School Graduation Requirements Emergency Waiver Program: Graduation Class of 2021

Report to the Legislature | December 2021

Authorizing Legislation: RCW 28A.230.320

Prepared by:

Andrew J. Parr, Ph.D., Research Director

Washington State Board of Education

andrew.parr@k12.wa.us | 360-725-6063

PRELIMINARY GRADUATION REQUIREMENTS EMERGENCY WAIVER PROGRAM REPORT

Executive Summary

Engrossed House Bill 1121 of 2021, authorized the State Board of Education (SBE) to establish an emergency waiver program to allow school districts to waive certain high school graduation requirements on an individual student basis after the district makes a good faith effort to help the student meet the requirements. The bill requires the Office of the Superintendent of Public Instruction to provide SBE with certain data to complete a report for the Education Committees of the Legislature addressing two main topics. First, the SBE is to report on the total number of emergency waivers requested and issued, by school district, including an indication of what requirement or requirements were waived. Second, SBE is to provide an analysis of any concerns regarding school district implementation, including any concerns related to school district demonstrations of good faith efforts identified by the SBE during its review of the data.

This report is preliminary, as not all school districts and LEAs have provided waiver information and details to the SBE and the OSPI. When the class of 2021 graduation outcome file is finalized, the OSPI delivers the finalized waiver data to the SBE, and districts and LEAs provide certain waiver details to the SBE, this **preliminary report** will be updated and finalized.

The class of 2021 adjusted cohort consisted of approximately 84,600 students. Of the 279 school districts and local education authorities (LEAs) granting high school diplomas, 209 school districts and LEAs applied and were approved to grant waivers for certain graduation requirements for the graduation class of 2021. Per the preliminary data file provided by the OSPI, 150 school districts and LEAs waived a total of 9,524 courses for students.

School districts and local educational agencies reported to the OSPI that 5,036 students (6.0 percent of the preliminary adjusted graduation cohort) were granted the ability to waive one or more course or credit requirements through the Graduation Requirement Emergency Waiver (GREW). Social Sciences/History and English language arts (ELA) courses or credits were the most commonly waived. Math, Science, and PE/Health courses or credits requirements were less frequently waived for students. White or Asian students were more able to meet graduation requirements without the use of a credit waiver as compared to students identifying with another race or ethnicity.

Graduation pathway data was not available in the preliminary data file provided by OSPI. However, school districts and LEAs reported through the basic education collection that approximately 4,030 students (4.8 percent of the preliminary adjusted graduation cohort) in 76 school districts and LEAs requested a graduation pathway waiver for ELA and or math. White or Asian students were more able to meet graduation requirements without the use of a graduation pathway waiver as compared to students identifying with another race or ethnicity.

Information about the school districts' and LEAs good faith effort to help students meet graduation requirements is self-reported through the SBE's annual basic education collection. However, it is noteworthy that some school districts and LEAs selected responses unfavorable to the school district. For example, some respondents selected the "Did Not Provide" a particular support response when, in fact, the provision of the support is described in the open-ended response option.

School district and LEA staff acknowledged a high degree of advising, as 86 to 92 percent of the districts reported that they provided advising on the supports, strategies, and appropriateness of the waiver for all students, which is the expectation. After reviewing the totality of the responses collected through the basic education collection, there is solid evidence that nearly all school districts and LEAs followed GREW program rules requiring school and district staff to make a good faith effort to provide the advising and supports necessary for students to meet graduation requirements.

School districts and LEAs using the GREW program were required to describe the strategies and protocols the district implemented to ensure equitable program administration. The responses most often described the fact that all students' course-taking history and credit attainment records were evaluated and all were potentially considered for the waiver if deficient in courses or credits. Nearly all the responses described outreach in multiple ways and in multiple languages regarding potential waiver eligibility followed-up by advising for students, parents/guardians, and other school staff. With the student and parent/guardian, school staff developed and monitored a plan which, if followed, would allow the student to graduate with or without a waiver. The open-ended responses also describe the districts' and LEAs development of new protocols to establish and implement a fair and equitable emergency waiver program. Again, the SBE will follow-up verbally with some school district staff to learn more about the districts' effort to administer a local GREW program. Finally, the anecdotal responses indicate that the districts' and LEAs strived to establish and implement a fair and equitable emergency waiver program and did so in different ways.

Authority

Engrossed House Bill 1121, signed into law during the 2021 Legislative session, provides the State Board of Education (SBE) the authority to establish an emergency waiver program to allow school districts and LEAs to waive certain high school graduation requirements on an individual student basis after the district makes a good faith effort to help the student meet the requirements. In May 2021 the Board adopted emergency rules (Chapter 190-111 WAC) to implement the waiver program¹ and developed a process for districts to certify their compliance with the waiver program rules prior to use of the waiver. Section 2(3)(a) of EHB 1121 directs the Office of the Superintendent of Public Instruction (OSPI) to provide data pursuant to the emergency waiver program to the SBE by November 1, 2021 and annually thereafter. Section 2(3)(b) directs the SBE to provide the Education Committees of the Legislature with a summary

¹ Final rules for Chapter 180-111 WAC were adopted in July 2021

of the emergency waiver data by December 15, 2021. The summary is to include the following information:

1. The total number of emergency waivers requested and issued, by school district, including an indication of what requirement or requirements were waived. Information must also indicate the number of students in the school district grade cohort of each student receiving a waiver; and
2. An analysis of any concerns regarding school district implementation, including any concerns related to school district demonstrations of good faith efforts identified by the state board of education during its review of the data.

Definitions

Graduation Cohort: means the class of 2021 preliminary adjusted graduation cohort as reported by the OSPI and to be reconciled with school districts.

GREW: means the Graduation Requirement Emergency Waiver, which is used repeatedly in the anecdotal responses from school districts.

School Districts: for the purposes of this report, school district means any school district, charter school, tribal compact school, private school, state school, and community and technical college granting high school diplomas.

Background on Waiving Graduation Requirements

Under the emergency waiver program subject area credits and graduation pathway options may be waived for eligible students. An eligible student needed to have:

1. Been reasonably expected to graduate in the year the waiver is awarded,
2. Experienced significant disruption in their education due to the pandemic that prevented them from meeting graduation requirements, and
3. Demonstrated preparation for their postsecondary plan as stated in their High School and Beyond Plan.

Prior to considering awarding a waiver, districts and LEAs need to have made a “good faith effort” to support the student in meeting graduation requirements ([WAC 180-111-050](#)). The rules adopted by the State Board of Education ([Chapter 180-111 WAC](#)) on the emergency waiver states that waived credits should be limited to the student’s classes that were impacted by disruptions, and that district and LEA should prioritize student completion of coursework related to the student’s High School and Beyond Plan.

The waiver program permits districts to waive up to 2 core or flexible credits, provided that the student earns at least a total of 20 credits and no more than one credit may be waived in the same core subject area. The waiver program also permits districts to waive graduation pathway options. Graduation pathways include both course-based options and assessment-based

options, as shown in Table 1. Most of the assessment options were unavailable for students in 2020 and spring 2021, as shown in Table 2.

Table 1: shows the graduation pathway options for the class of 2021 graduation cohort.

Pathway	Course-based	Assessment Score Identified by SBE	Assessment Score in Statute
Dual Credit Courses	Yes	n/a	n/a
AP/IB/Cambridge Courses	Yes	n/a	n/a
Transition Course	Yes	n/a	n/a
CTE Sequence*	Yes	n/a	n/a
State Assessment	n/a	Yes	n/a
SAT/ACT	n/a	Yes	n/a
ASVAB*	n/a	Yes	n/a
AP/IB/Cambridge Tests	n/a	n/a	Yes

*CTE (Career and Technical Education) and ASVAB (Armed Services Vocational Aptitude Battery) are “stand-alone” pathways. In the other pathways, students must meet the standard in both English language arts and math; combinations of pathways may be used.

Table 2: shows the status of the spring 2021 administration of graduation pathway option assessments.

Graduation Pathway Option Assessment	Administration in Spring 2021	Comments
State Assessment	The Smarter Balanced assessment were delayed to fall 2021 (OSPI Bulletin No. 037-21)	The WA-AIM test was available for some students to take in 2020-2021. Students unable to be tested during the spring 2021 window will be able to test in fall 2021.
SAT/ACT	Individual Testing Centers decided whether to administer the SAT and ACT in 2020-2021, and were generally unavailable.	Washington public baccalaureate institutions became permanently SAT and ACT test-optional beginning fall 2021.
ASVAB	Generally unavailable for administration with the Career Exploration Program	PiCAT online test available, with in-person verification at a Military Entrance Processing Station. Scores, once verified, are valid for meeting the pathway requirement.
AP/IB/Cambridge Tests	Converted to remote administration with a modified test.	Scores are valid for meeting the pathway requirement and Institutions of higher education accepting tests and scores.

Key Findings

This report is preliminary, as not all school districts and LEAs have provided waiver information and details to the SBE and the OSPI. When the class of 2021 graduation outcome file is finalized, the OSPI delivers the finalized waiver data to the SBE, and districts and LEAs provide certain waiver details to the SBE, this **preliminary report** will be updated.

- The class of 2021 adjusted cohort consisted of approximately 84,600 students.
- 209 school districts and LEAs applied and were approved to grant waivers for certain graduation requirements for the graduation class of 2021. Per the preliminary data file provided by the OSPI, 150 school districts and LEAs granted one or more course or credit waivers to students.
- School districts and local educational agencies reported to the OSPI that 5,036 students (6.0 percent of the adjusted graduation cohort for the school districts and LEAs reported in in the OSPI student file) from 150 districts and LEAs were granted the ability to waive one or more course or credit requirements through GREW. Per the preliminary data file provided by the OSPI, 9,524 courses were waived for students.
- Social Sciences/History and English language arts (ELA) courses/credits were the most commonly waived. Math, Science, and PE/Health courses/credits were less frequently waived for students
- School districts and LEAs reported through the basic education collection that approximately 4,000 students (4.8 percent of the preliminary adjusted graduation cohort) from 76 school districts and LEAs requested a graduation pathway waiver for ELA and or math.
- Of the 4,000+ credit waivers requested by students, 12 were denied, and only one graduation pathway waiver requested by a student was denied.
- White or Asian students were more often able to meet credit and graduation pathway requirements without the use of a credit waiver as compared to students identifying with another race or ethnicity.
- After reviewing the totality of the responses collected through the basic education collection, there is evidence that nearly all school districts and LEAs followed GREW program rules requiring school and district staff to make a good faith effort to provide the advising and supports necessary for students to meet graduation requirements.
- The open-ended responses describe the districts' and LEAs' development of new protocols to establish and implement a fair and equitable emergency waiver program. The anecdotal responses indicate that the districts and LEAs' strived to establish and implement a fair and equitable emergency waiver program and did so in different ways.

Limitations

At the time the legislation was being drafted, the SBE confirmed with the OSPI and communicated to legislative staff the fact that the November 1 delivery of data and the December 15 report delivery date specified in legislation would necessitate the compilation and analysis of preliminary and incomplete waiver data. This is because school districts and LEAs and the OSPI are reconciling the adjusted cohort to be certain that each student is correctly assigned to the cohort and each student's graduation outcome is attributed to the correct district and LEA. The graduation file reconciliation most often occurs into early December and the graduation outcomes are finalized in mid- to late-December.

The November 1 data delivery was comprised of the most accurate data available at the time. However, the OSPI confirmed that the data delivery did not include graduation pathway waiver information because the required script for the 2021 school year was not yet ready for use. The OSPI communicated to the SBE that "...it is possible for all of the data sources to be updated and more students to be included in the file based on their final enrollment status." The data elements that are expected to change include the following:

- Total number of credit waivers and number of graduation pathway waivers granted to students,
- Total number of credit and number of graduation pathway waiver requests initiated by students and the number of those requests denied by school districts and LEAs,
- The final assignment of students to the correct school, school district, and LEAs, and
- The number of students attributed to the school, school district and LEA, and state adjusted graduation cohort.

Therefore, this report is based on **preliminary data sources that are certain to change**. The SBE is committed to providing an updated report to the education committees of the legislature after the reconciled and final data are delivered to and analyzed by the SBE.

Part 1: Emergency Waiver Usage by School Districts

CREDIT OR COURSE WAIVERS GRANTED BY SCHOOL DISTRICTS

The basis for this analysis is the **preliminary** graduation file for the adjusted cohort of the class of 2021, which consisted of 84,608 students. Of the 279 school districts and LEAs granting high school diplomas, 209 school districts and LEAs applied and were approved to grant waivers for certain graduation requirements for the graduation class of 2021 (Table 3). For the class of 2021, school districts and LEAs reported to the OSPI that a total of 9,524 courses were waived for 5,036 students from 150 school districts and LEAs through the GREW program (Table A1).

Table 3: summary of the number of districts or LEAs granting waivers under the GREW program.

Measure	Number
Districts or LEAs granting high school diplomas	279
Districts or LEAs approved to grant waivers under GREW	209
Districts or LEAs included in the preliminary student file from the OSPI	150
Districts or LEAs reported to having grant credit waivers under GREW*	176

*Note: this number includes districts and LEAs reporting waiver use to the OSPI and/or to the SBE through the annual basic education collection.

School districts and LEAs used GREW authority to different degrees, some granted many credit waivers (a little more than 425) while other school districts and LEAs granted few or no waivers. The percentage of students in the district graduation cohort being granted a credit waiver ranged for a low of less than one percent to approximately 31 percent. School districts and LEAs waived one or more credit requirements for approximately 6.0 percent of students in the adjusted graduation cohort. ELA and Social Studies/History courses were the most commonly waived courses, while courses attributed to Math, Science, and PE/Health were less frequently waived for students (Table 4).

Table 4: shows the total number and percentage of courses waived by content area.

Content Area	Number of Courses Waived	Percentage of Total Courses Waived
English Language Arts	2167	22.8
Math	942	9.9
Science	914	9.6
Social Studies and History	2582	27.1
PE and Health	888	9.3
Arts	562	5.9
World Languages	146	1.5
Other Courses*	1323	13.9
Total	9524	100

*Note: this includes courses identified as "Miscellaneous" in the OSPI file and other courses mostly falling into the broad group of career tech (e.g. construction, human services, business, others, and "missing").

CREDIT OR COURSE WAIVERS REQUESTED BY STUDENTS

School district and LEA implementation of the emergency waiver of certain graduation requirements is described in [Chapter 180-111 WAC](#). The rules require that the school district board or equivalent governing body adopt by resolution a plan that describes the school district's and LEAs' process for granting and declining emergency waivers for students. The plan must include a process for school district and LEA staff to initiate an emergency waiver and a process for students to request an emergency waiver if not initiated by the district. The SBE anticipated districts and LEAs initiating most waivers, but this has not been borne out, as 105

school districts and LEAs have reported approximately 5000 student initiated requests to waive at least one graduation credit requirement.

The SBE collected information from school districts and LEAs regarding the number of emergency credit and pathway waivers requested by students and the number of those waivers denied by the district or LEA. At the time of this writing, 5,006 individual students (5.9 percent of the graduation cohort) requested a waiver of graduation credit requirements and 12 student requests were denied. The number of student requests and denials made school districts and LEAs is summarized in Table 5 and is tabulated in the Appendix (Table A3).

Table 5: summarizes the student-initiated credit waiver requests and denials as reported to the SBE through the annual basic education collection.

School District	Number of Students in Adjusted Cohort	Student Initiated Credit Waiver Requests	Student Initiated Credit Waiver Denials
State Total	84,608	5006	12

GRADUATION PATHWAY WAIVERS GRANTED BY SCHOOL DISTRICTS

School districts and LEAs provided data to the OSPI on the granting waivers of pathway graduation requirements. However, the OSPI was unable to provide this information to the SBE at the time of this writing. The OSPI data will be summarized and tabulated in the Appendix when the data is made available (Table 6).

Table 6: shows the number of students granted at least one pathway waiver to meet certain graduation requirements.

Number of Students in Cohort	ELA Only Pathway Waivers	Math Only Pathway Waivers	ASVAB and CTE Sequence Pathway Waivers	Students Granted Any Pathway Waiver
84,608	TBD	TBD	TBD	TBD

GRADUATION PATHWAY WAIVERS REQUESTED BY STUDENTS

The SBE collected information from school districts regarding the number of graduation pathway waivers requested by students and the number of those waivers denied by the school district and LEA. At the time of this writing, 76 school districts and LEAs reported that 4,045 individual students (4.8 percent of the graduation cohort) requested a waiver of graduation pathway requirements. One student-initiated request to waive a graduation pathway requirement was denied. The number of student requests and denials made by school districts and LEAs is summarized in Table 7 and is tabulated in the Appendix (Table A3).

Table 7: summarizes the student-initiated graduation pathway waiver requests and denials as reported to the SBE through the annual basic education collection.

School District	Number of Students in Adjusted Cohort	Student Initiated Pathway Waiver Requests	Student Initiated Pathway Waiver Denials
State Total	84,608	4.045	1

DEMOGRAPHICS OF CREDIT WAIVER RECIPIENTS

Well before the COVID-19 pandemic, many students of color, students from low-income households, and students participating in other federal programs experienced and continue to experience disparities in educational opportunity which contribute to disparate educational outcomes. Students of color and other marginalized student groups were more likely to lose a parent or caregiver to COVID than White students and more likely to have experienced a significant loss of income and resources than White students throughout the pandemic. Students of color also were more likely to face challenges connecting to remote learning. The data reviewed in this report suggest that the pre-existing disparities in educational opportunity widened for students of color.

The enabling legislation for the waiver program (EHB 1121) notes the purpose of the waiver program is to “prevent students from being unduly impacted by unforeseen disruptions to coursework and assessments that are beyond the student's control. Given that students of color were disproportionately impacted by the disruptions associated with the ongoing pandemic we may expect to see students of color disproportionately represented among waiver recipients.

After considering the longstanding pre-pandemic disparate educational opportunity and the additional pandemic-related impacts to students of color, we do not find it inconsistent that students identifying as non-Asian and non-White accessed the GREW program at a rate higher than the groups’ representation in the graduation cohort. The demographics of the students granted a credit waiver differ considerably from the demographics of students in the adjusted cohort.

Disparate use of GREW is evident as the percentage of students identifying as non-Asian and non-White in the adjusted cohort who were granted a waiver differs from the percentage of students identifying with other race and ethnicities in the adjusted cohort. Figure 1 shows disproportionate waiver usage as reported to the OSPI based on race and ethnicity. In summary, students identifying as Asian or White used the credit waiver at a rate lower than the group representation in the cohort, while students identifying as another race or ethnicity used the credit waiver at a rate higher than the groups’ representation in the graduation cohort. This means that students identifying as White or Asian were more able to meet graduation requirements without the use of a credit waiver as compared to students identifying with another race or ethnicity.

Table 8 shows the race and ethnicity composition of students in the graduation cohort and the composition of the students granted a credit waiver. The table is intended to show whether a

student group used the GREW credit waiver at a rate greater than or less than the groups' representation in the graduation cohort. Here are several examples of how to read and interpret the table.

- Of the students who were granted a credit waiver, 6.0 percent identified as Black African American. This is higher than the 4.5 percent making up the adjusted graduation cohort. We can say that students identifying as Black African American had **higher credit waiver usage** than their representation in the graduation cohort.
- Of the students who were granted a credit waiver, 45.3 percent identified as White, which is lower than the 54.2 percent of White students making up the adjusted graduation cohort. We can say that students identifying as White exhibited **lower credit waiver usage** than their representation in the graduation cohort.

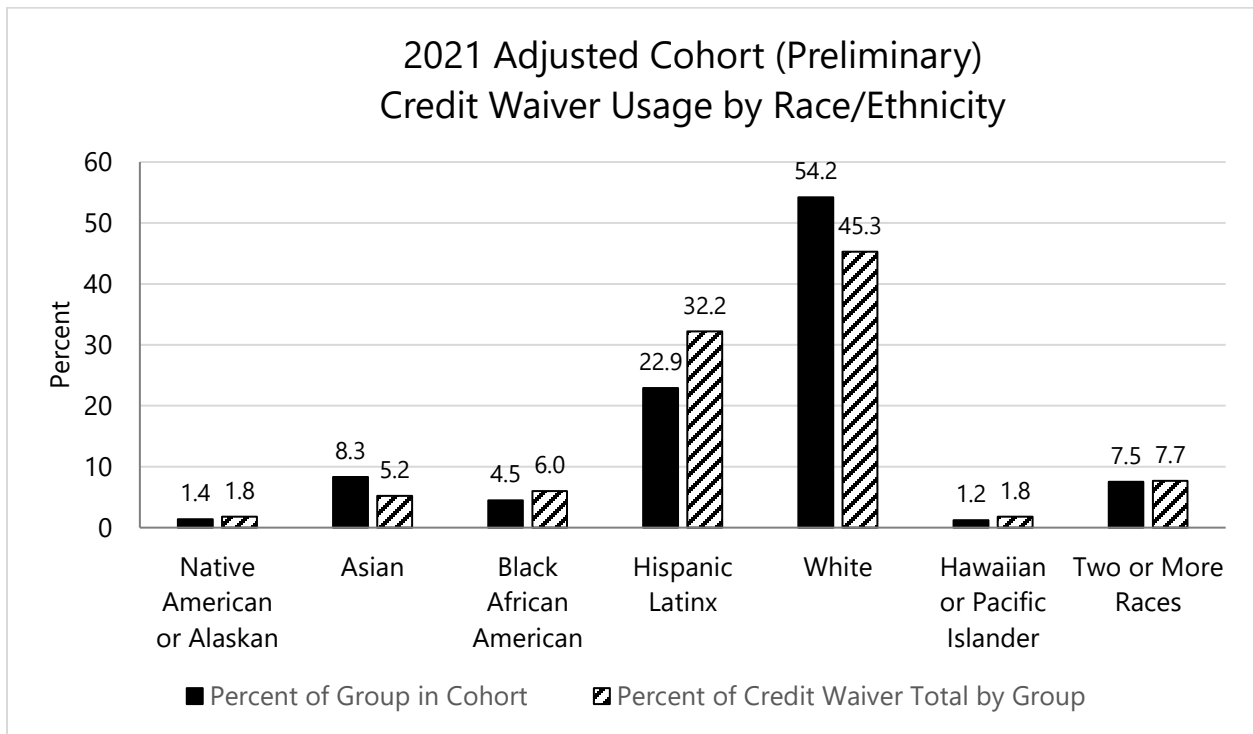

Table 8: shows the race and ethnicity composition of students in the graduation cohort and the composition of the students granted a credit waiver.

Student Group	Percent of Waiver Grantees	Percent of Cohort	Waiver Usage
Native American/Alaskan	1.8	1.4	Higher credit waiver usage.
Asian	5.2	8.3	Lower credit waiver usage.
Black/African American	6.0	4.5	Higher credit waiver usage.
Hispanic/Latinx	32.2	22.9	Higher credit waiver usage.
Hawaiian/Other Pacific Islanders	1.8	1.2	Higher credit waiver usage.
White	45.3	54.2	Lower credit waiver usage.
Two or More Races	7.7	7.5	Higher credit waiver usage.

Figure 1 is derived from the data in Table 7 from above and is included to help the reader visualize the higher or lower credit waiver usage by each of the race and ethnicity student groups used for federal reporting. Here are examples of how to interpret the figure.

- Of the students who were granted a credit waiver, 32.2 percent identified as Hispanic or Latinx, which is higher than the 22.9 percent of Hispanic or Latinx students making up the graduation cohort. We can say that students identifying as Hispanic or Latinx exhibited **higher credit waiver usage** than their representation in the graduation cohort.
- Of the students who were granted a credit waiver, 5.2 percent identified as Asian, which is lower than the 8.3 percent of Asian students making up the adjusted graduation cohort. We can say that students identifying as Asian exhibited **lower credit waiver usage** than their representation in the graduation cohort.

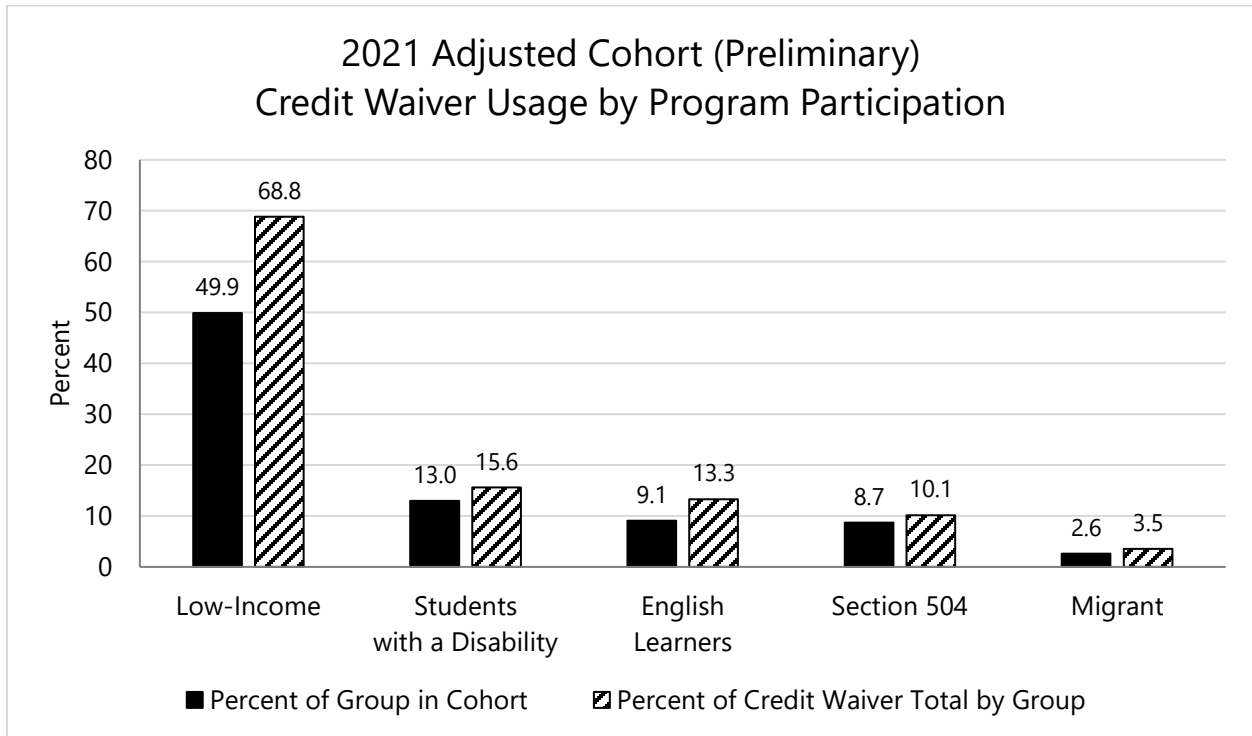

Figure 1: shows the percentage of credit waiver usage by race and ethnicity for the adjusted graduation cohort and the students granted a credit waiver.

Note: the graph represents **preliminary** student level data reported to the OSPI by school districts.

Figure 2 shows the waiver usage as reported to the OSPI based on participation in federal programs. Students categorized as low-income, or in bilingual education, or those receiving education services under an individualized educational plan (IEP), or those with a Section 504 plan, and or those identified as migrant students were granted credit waivers at rates greater than the groups' representation in the graduation cohort. On Figure 2, the higher credit waiver usage for a group is indicated where the cross-hatched bar is higher than the corresponding solid bar. See that this is true for all of the student groups based on program participation.

Figure 2: shows the percentage of credit waiver usage by federal program participation for the adjusted graduation cohort and for the students granted a credit waiver.

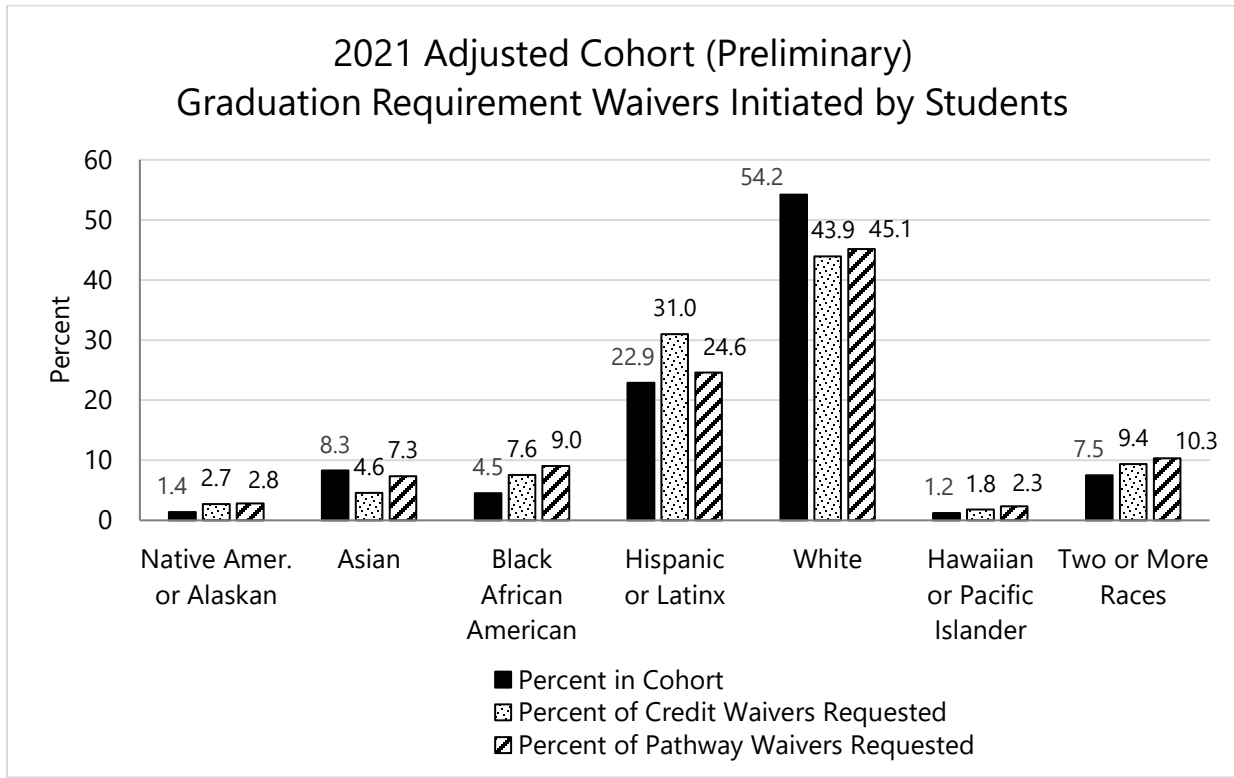

Note: Low-Income refers to students qualifying for the Free and Reduced Price Lunch program.

An analysis was undertaken to determine whether the demographics of the students initiating a credit and or graduation pathway waiver request reflected the adjusted cohort. As stated earlier in this report, the number of student-initiated requests is self-reported by school districts and LEAs through the SBE’s annual basic education collection. Figure 3 shows the following.

- Students identifying as Native American/Alaskan, Black/African American, Hispanic/Latinx, Hawaiian/Pacific Islander, or Two or More races requested credit and graduation pathway waivers at a rate higher than the groups’ representation in the preliminary adjusted cohort.
- Students identifying as Asian or White requested credit and graduation pathway waivers at a rate lower than the groups’ representation in the preliminary adjusted cohort.
- For all of the student groups, students initiated requests for graduation pathway waivers at a slightly higher rate as compared to the groups’ credit waiver requests.

Figure 3: shows the percentage of students initiating requests for graduation requirement waivers by race and ethnicity.

Remember, the number of student-initiated requests is self-reported by school districts through the SBE's annual basic education collection. Figure 4 shows the following.

- Students from low-income households, English learners, and students with a disability requested credit and graduation pathway waivers at a rate higher than the groups' representation in the preliminary adjusted cohort.
- Students with a Section 504 Plan or who were identified as migrant requested credit and graduation pathway waivers at rates lower than the groups' representation in the preliminary adjusted cohort.
- For all of the student groups (except for migrant students), students initiated requests for graduation pathway waivers at a slightly higher rate as compared to the groups' credit waiver requests.

Figure 4: shows the percentage of students initiating requests for graduation requirement waivers program participation.

Note: Low-Income refers to students qualifying for the Free and Reduced Price Lunch program.

It is virtually impossible to attribute the greater use of GREW by students identifying with race and ethnicities that are non-Asian and non-White to any single factor or condition. Rather, it is most logical to attribute the greater use of GREW by non-Asian and non-White students to the combination of pre-pandemic disparate educational opportunity and pandemic-related impacts. The greater waiver usage by non-Asian and non-White students is, more than likely, a reflection of an inequitable educational system and disparate impacts resulting from the COVID pandemic rather than inequitable program administration which may be more appropriately assessed using the information provided in part 2 of this report. As was stated earlier in the report, the SBE is committed to updating this report when the graduation data is finalized, and the analysis of student demography and waiver usage will be a part of that update.

Part 2: Analysis School Districts’ Good Faith Effort

SUMMARY AND BACKGROUND

A limitation or shortcoming of a portion of this analysis is that information about the school districts’ and LEAs’ good faith effort to help students meet graduation requirements and the districts’ efforts to ensure an equitable local program are anecdotal and self-reported through the SBE’s annual basic education collection. While there is no reason to question the veracity of

the school districts' and LEAs' responses in the SBE data collection, bear in mind the self-reported data remains largely unverified.

Information about the school districts' and LEAs' good faith effort to help students meet graduation requirements is anecdotal and self-reported, which can result in validity issues, as respondents have the opportunity to embellish responses to make the school districts' and LEAs' good faith effort appear more favorable. While embellishment can be an issue, the opposite can also occur. Some school districts and LEAs selected responses unfavorable to the school district (e.g., selecting the "Did Not Provide" the support) when, in fact, the school district described the provision of the support in the open-ended response option.

The SBE anticipated that 100 percent of the respondents replying that all students being considered for a waiver received certain advising and supports. In thinking about the prompts for the school districts and LEAs after receiving the majority of district data submissions, the SBE now envisions multiple scenarios whereby school staff could respond to a prompt with "Provided to Most Students" or "Provided to Some Students" rather than "Provided to All Students" as a result of the district or school staffs' unique experiences. Even though certain advising was a requirement of GREW for all students, we came to accept that school districts and LEAs could be following program rules and reporting that the district or LEA did not provide certain advising and supports to all students. In these cases, the SBE had to carefully scrutinize other responses to develop a clearer picture of the school districts' and LEAs' good faith effort. In some cases, the SBE thought it best to follow-up verbally with school district or LEA staff to learn more about the districts' and LEAs' good faith effort.

After reviewing the totality of the responses collected through the basic education collection, there is evidence that most school districts and LEAs followed GREW program rules requiring school and district staff to make a good faith effort to provide the advising and supports necessary for students to meet graduation requirements. Further, the open-ended responses describe the districts' and LEAs' effort to establish and implement a fair and equitable emergency waiver program.

SBE rulemaking (Chapter 180-111 WAC) in 2021 regarding the emergency waiver program states that a "good faith effort" means the school district or LEA considered and implemented options, determined appropriate by the school district or LEA, to support each individual student in meeting credit and pathway requirements that align with their high school and beyond plan. The rules include the following information to support the districts in making the good faith effort.

- Rules required that for each student who is being considered for the emergency waiver, school districts and LEAs shall provide individual student advising, and make a reasonable effort to consult with a parent or guardian of the student, to help each student determine:
 - What supports they need to be successful;
 - How they might meet the graduation requirements, including the feasibility of summer or a partial or full additional year of high school enrollment; and

- Whether the emergency waiver is appropriate for the individual student.

SBE expected all districts and LEAs to respond to the survey that they provided such advising to all students. It is now clear that respondents may have responded “some” or “most” in cases where not every student in the cohort was considered for the waiver because they were clearly on track to meet requirements.
- Rules provided examples of options for supporting students to meet credit and course-based graduation pathway requirements include, but are not limited to:
 - Provision of additional academic supports to aid student completion.
 - Awarding credits based on the student's demonstrated proficiency/mastery of the state's learning standards under WAC 180-51-050, 180-51-051, and 392-410-300, including credits, grades, and courses transcribed on the high school transcript.
 - Awarding credit through expanded learning opportunities, dual credit programs, work-based learning (WAC 392-410-315), traditional online, summer learning, CTE course equivalencies, and other local credit options for awarding credit outside of school.
- Rules provided examples of options for supporting students to meet the exam-based graduation pathway requirement include, but are not limited to:
 - Efforts to ensure students are aware of, and can access, online or by other alternative access options, the SAT, ACT, ASVAB, AP, IB, Cambridge International, and state assessments (if applicable).
 - School districts are encouraged to reduce or eliminate any cost to students in using these options.

The SBE collected information on school districts’ and LEAs’ good faith effort through the annual basic education collection between September 15 and November 15, 2021. In the winter of 2021, 209 school districts applied and were approved to grant emergency waivers for the graduation class of 2021. Per the preliminary data file provided by the OSPI, 150 school districts and LEAs granted one or more (course or credit) waivers to 5036 students. The SBE anticipated districts and LEAs initiating most waivers, but this has not been the fact, as 105 school districts and LEAs reported approximately 5000 student initiated requests to waive at least one graduation credit requirement. School districts and LEAs receiving approval to grant waivers of graduation requirements were required to respond to the following questions using a Likert-type scale. Respondents were required to answer (a, b, and c questions below) with providing the advising or supports to no students, some students, most students, or all students. The prompts below labeled as “d” were optional open-ended responses and are tabulated in Appendix A (Tables A4, A5, and A6).

1. To what degree did the district or LEA provide individual student advising on the following topics to students being considered for the emergency waiver?
 - a. To what degree did the district or LEA provide individual student advising on what supports the individual student needs to be successful?

- b. To what degree did the district or LEA provide individual student advising on how the individual student might meet the graduation requirements, including the feasibility of summer or a partial or full additional year of high school enrollment?
 - c. To what degree did the district or LEA provide individual student advising on whether the emergency waiver is appropriate for the individual student?
 - d. If the school district or LEA provided other advising for individual students regarding strategies for meeting graduation requirements, please describe that advising.
2. To what degree did the district or LEA use the following options to support individual students in meeting credit and course-based graduation pathway requirements?
 - a. To what degree did the district or LEA provide additional academic supports to aid student completion?
 - b. To what degree did the district or LEA award credits based on the student's demonstrated proficiency/mastery of the state's learning standards under WAC 180-51-050, 180-51-051, and 392-410-300, including credits, grades, and courses transcribed on the high school transcript?
 - c. To what degree did the district or LEA award credit through expanded learning opportunities, dual credit programs, work-based learning (WAC 392-410-315), traditional online, summer learning, CTE course equivalencies, and other local credit options for awarding credit outside of school?
 - d. If the school district or LEA provided other academic supports for meeting graduation requirements or awarded credits in another manner, please describe those supports.
3. To what degree did the district or LEA use the following options to support individual students in meeting an exam based graduation pathway requirement?
 - a. To what degree did the district or LEA ensure students are aware of the SAT, ACT, ASVAB, AP, IB, Cambridge International, and state assessment options?
 - b. To what degree did the district or LEA ensure students can access, online or by other alternative access options, the applicable assessment?
 - c. To what degree did the district or LEA reduce or eliminate any cost to students in using these options?
 - d. If the school district or LEA provided other supports for meeting the exam-based graduation pathway requirement, please describe those supports.

GOOD FAITH EFFORT

The survey developed by the SBE explored the idea of the districts' and LEAs' good faith effort through three broad questions and three follow-up questions for each of the broad questions. The results are summarized below.

Question: To what degree did the district or LEA provide **individual student advising** on the following topics to students being considered for the emergency waiver? School district and LEA staff acknowledged a high degree of advising, as 87 to 93 percent of the districts and LEAs reported that they provided advising on the supports, strategies, and appropriateness of the waiver for all students. As stated at the beginning of this section, the SBE anticipated 100

percent of districts and LEAs providing the specified advising, but came to understand how a lower rate could be attained in various scenarios while following the program rules. Some examples of the open-ended responses are as follows.

"The district provided an advisory mentor program and graduation specialists throughout the school to monitor and advise students through the graduation process/status."

"Discussions on the use of the waiver included the student's future goals as outlined in their High School and Beyond Plan."

"Individual counselors and our graduation success coordinator reviewed with each student one on one who might benefit from the GREW. Considerations included the student's plan after high school, a review of the transcript and previous test and classroom performance to determine the feasibility of the GREW enabling the student to have success based upon their individual goals and aspirations."

Question: To what degree did the district or LEA use the following options to support individual students in meeting **credit and course-based graduation pathway** requirements? School district and LEA staff reported the provision of supports to help students meet credit and course-based graduation pathway requirements at a high rate. Approximately 85 percent of districts and LEAs provided additional academic supports for some or all students. Approximately 80 percent of school districts and LEAs awarded credits based on proficiency/mastery of learning standards for some or all students, and 83 percent awarded credit through other available options for some or all students. Some examples of the open-ended responses are as follows.

"Each counselor, advisor, and student reviewed all options that were available in the 20-21 school year or prior years that a student could be awarded credit for any credits that the student was missing. This included review of their past SBA grades, STAMP assessment scores, cross or dual credited programs. The goal was to be able to award any and all credit in helping to graduate on time."

"A few students, based on previous SBA scores were awarded mastery credit as per school district policy. Other academic supports included our Academic Success class, and increased monitoring by counselors and teachers for students who were deemed at risk to not meet graduation requirements."

"We offered APEX online credit retrieval during and after the school day. We provided APEX online credit retrieval during the summer to complete graduation requirements. We provided extended school year opportunities in core subject areas to allow students more time to complete courses."

"XXX School District expanded the summer school course work for students to have an opportunity to make up credits. The district continues to seek out work-based learning credits through CTE."

Question: To what degree did the district or LEA use the following options to support individual students in meeting an **exam-based graduation pathway** requirement? School districts and LEAs appear to have made a solid effort in supporting students to complete an assessment-based graduation pathway. Approximately 90 percent of districts and LEAs explained to students that testing pathways were an option and ensured that alternative access to assessment were an option for some or all students. To further reduce barriers to students completing an assessment-based graduation pathway, approximately 88 percent of districts and LEAs reduced or eliminated assessment costs for some or all students. Some examples of the open-ended responses are as follows.

"We scheduled multiple days of ASVAB testing during the school day. In addition, this year we will offer SAT testing during the school day and provide it for free."

"[We] offered district-wide testing dates for SAT, ACT, and ASVAB."

"ASVAB was offered in schools during the school day. AP exams were paid for by a grant."

EQUITABLE ADMINISTRATION OF THE PROGRAM

School districts and LEAs affirmed that it administered the emergency waiver of graduation requirements in accordance with program rules established in Chapter 180-111-040 WAC. Section (1) Chapter 180-111-040 WAC directs the school district or LEA to ensure equity in administering the emergency waiver. The school district or LEA shall disaggregate emergency waiver data by student groups as referenced in RCW 28A.300.042(3) and shall conduct further disaggregation of student groups if data are available to do so. If disproportionality is found, the school district or LEA shall take appropriate actions to ensure equitable administration. Following this affirmation, survey respondents were required to describe the actions the school district or LEA took to ensure equity in administration of the emergency waiver. Evidence of an equitable program would include comments regarding access to every student, evaluating and supporting the individual needs of each students, and monitoring through the disaggregation of student demographics by race, ethnicity, program participation, and other criteria.

A shortcoming of these types of responses is that the respondent may not necessarily describe all of the activities and protocols used by the school district or LEA. Given the number of requests districts and LEAs received and crisis management such as contact tracing and other activities associated with physically reopening schools, it is likely that some responses were less comprehensive than hoped and may not include all program elements implemented in a school or district. All this means is that just because an element was not included in the written response, does not mean the element was not a part of the program. See some of the open-ended responses below which address elements of an equitable program. All of the responses are tabulated in Table A7.

"XXX School District ensured access of equity by analyzing students' graduation requirement needs and ways to meet the grad pathways through the waiver. Counselors were educated on the process as well as students. Any student who was 'at-risk' for not graduating was evaluated against the GREW waiver requirements."

"Data was collected and disaggregated by race, ethnicity, gender, and federal program to ensure equitable administration."

"[We] developed an equity lens and met with administrators and counselors. Looked at barriers to graduation and ongoing data review."

"To ensure equity of administration we met with each eligible student to make a plan that fit their specific needs."

"The Emergency Graduation Credit Waiver application along with a written district plan was submitted and approved by OSPI. The district plan included the process available to all students for equity access and how the information would be communicated in a culturally responsive way as outlined in the application and plan requirements."

One school district provided a brief definition of "equity" which captured the elements of many of the responses. "Equity in education is the notion that every student will receive the necessary resources they need individually to thrive in ***** schools regardless of race, ethnicity, religion, language, disabilities, socioeconomic status, country of origin, immigration status, sexual orientation, gender, and gender identity." Some common themes found in the open ended response are as follows.

THEME ONE: IDENTIFICATION OF NEED

Nearly every school district or school reported that staff reviewed student course-taking history, grade history, and credit attainment for every student for the purpose of identifying the students at risk of not meeting graduation requirements. This most often occurred at the beginning of the school year so that any requirement deficiencies could be corrected.

"Evaluated all graduating seniors doing a credit checks. Identified students not on track. Contacted all seniors not on track and requested a meeting with them and a parent via zoom. Set up a plan with the school counselor and the student. Monitored their progress weekly. Worked with teachers on individual cases to adjust classroom as appropriate."

"District ensured all students not yet meeting graduation pathway requirements were offered personal counseling explaining options regarding credit/pathway waivers. The district Title IX officer reviewed the list of waivers to ensure broad representation among applicants. The district reviewed its "good faith effort" regarding support for all students requesting the GREW to ensure equitable application of support services. The district consulted with students and families regarding GREW waivers in their native language."

THEME TWO: COMMUNICATION AND OUTREACH

Respondents wrote of widespread communication to all high school seniors and parents in multiple ways (district website, school administration weekly family messages, telephone calls, and emails) and in multiple languages. After identifying students at risk of not graduating, survey respondents more often than not reported that every identified student had an individualized conversation with the school counselor, parent/guardian, administrator, and a

teacher, at which time options to meet graduation requirements were discussed. An example of communication and outreach is shown below.

"The district's Research and Assessment office developed extensive reports for each school containing credit and assessment information for every student. Counselors, school and district administrators met several times to discuss [with] each student and to develop a support plan for credit attainment. Counselors and administrators met with students and families through a variety of methods including in-person meetings, Zoom meetings and phone calls to finalize plans for each student based on the student's High School and Beyond Plan goals."

THEME 3 – DEVELOP A PLAN AND MONITOR PROGRESS

Most survey respondents reported that the counselor worked in conjunction with the student, parent/guardian, and teacher to develop a plan by which each student could meet graduation requirement deficiencies without the emergency waiver. The plans often included the scheduling of intervention courses and enrollment in in-person and online credit recovery classes.

Respondents noted that the intervention plans were closely monitored to ensure that both students and school staff were making a concerted effort to remedy the deficiencies. In some cases, students were assigned mentor teachers to support the student, and in other cases the student met with a counselor or intervention specialist to check in on the students' progress.

"The district provided outreach to all students to encourage and support the completion of all credits required for graduation. Student Support Teams were developed and systematically identified students who required additional support. Individual plans were developed for students prior to granting the waiver. The team worked to remove barriers when possible. Other options were offered before utilizing the waiver."

"Throughout the entire 2020-2021 school year, students in the class of 2021 were monitored for on-time graduation metrics and provided with opportunities for in-person instruction during school closure."

"The counselor and principal conducted senior interviews for every senior to assess individual needs at the beginning of the year. Then they worked with teachers and students throughout the year to help students finish requirements. Every student/family was engaged in the graduation process."

OTHER PROTOCOLS

A number of school districts and LEAs implemented additional protocols to ensure fair and equitable emergency waiver usage. Some of the protocols are included below.

"We created a board approved emergency waiver decision flow chart to ensure the process was the same for all students. If a student disputed a decision a community led team heard the dispute and made a decision."

"We established a standards of practice to ensure that all students were afforded the opportunity and guided by high school counselors."

"The district convened a multi-disciplinary team to consider each request. The team used a standard protocol to ensure that all other options had been exhausted and to ensure that the student was fully informed of the implications of a waiver. Every effort was made to support the student and families were involved in the process where appropriate."

"[We] took several steps to ensure equity in administration of the emergency waiver including (1) emphasizing equity in initial staff training, (2) making sure the emergency waivers were promoted and available to all students/families, (3) providing information in family's home language, (4) ensuring that students/families understood their options, (5) collecting equity demographics information to monitoring purposes, and (6) overseeing implementation by district personnel with an equity lens."

Conclusion

This report is preliminary, as not all school districts have provided waiver information and details to the SBE and the OSPI. When the class of 2021 graduation outcome file is finalized, the OSPI delivers the finalized waiver data to the SBE, and districts and LEAs provide certain waiver details to the SBE, this **preliminary report** will be updated.

Not all school districts and LEAs granting high school diplomas applied to use the GREW program and not all those who were approved to use the GREW actually granted waivers. Per the preliminary data file provided to the SBE by the OSPI, 150 school districts and LEAs waived a total of 9,524 courses for students. In addition, the preliminary results from the basic education collection show that even fewer school districts and LEAs granted approximately 4,030 graduation pathway waivers. While we anticipate that the final number of waivers may be higher, these preliminary results are evidence that school districts and LEAs used their waiver authority judiciously.

Students identifying as Asian or White were granted waivers of graduation requirements at rates lower than the groups' representation in the adjusted cohort, while students identifying as another race or ethnicity were granted waivers at rates higher than the groups' representation in the graduation cohort. It is virtually impossible to attribute the greater use of GREW by students identifying with race and ethnicities that are non-Asian and non-White to any single factor or condition. Rather, it is most logical to attribute the greater use of GREW by non-Asian and non-White students to the combination of an inequitable educational system and disparate impacts resulting from the COVID pandemic rather than inequitable program administration.

After reviewing the totality of the responses collected through the basic education collection, there is evidence that most school districts and LEAs followed GREW program rules requiring school and district staff to make a good faith effort to provide the advising and supports necessary for students to meet graduation requirements. Further, the open-ended responses describe the districts' and LEAs' effort to establish and implement a fair and equitable emergency waiver program. As was stated earlier in the report, the SBE is committed to updating this report when the graduation data is finalized.

Appendix A

Table A1: shows the number and percentage of students in the class of 2021 graduation cohort granted a waiver of one or more course or credit requirements through the COVID Emergency Waiver Program by school district or LEA.

Note: school districts or other local education authorities (LEAs) not included in the table indicates the district did not have any students in the class of 2021 final adjusted cohort, did not receive waiver requests from students, have not reported waiver usage to the OSPI, or did not grant waivers under the emergency waiver program. N.R. indicates results not reported because the adjusted graduation cohort was less than 10 students.

Table A2: shows the number of students in the class of 2021 graduation cohort granted a waiver of one or more course or credit requirements through the COVID Emergency Waiver Program by school district or LEA and by content area.

Note: school districts or other local education authorities (LEAs) not included in the table indicates the district did not have any students in the class of 2021 final adjusted cohort, did not receive waiver requests from students, have not reported waiver usage to the OSPI, or did not grant waivers under the emergency waiver program. N.R. indicates results not reported because the adjusted graduation cohort was less than 10 students.

Table A3: shows the number of credit and pathway waiver requests made by students and the number of denials by school district or LEA.

Note: school districts not included in the table indicated that the district did not have any students in the class of 2021 final adjusted cohort, did not report the information to the SBE, or did not receive waiver requests from students under the emergency waiver program. N.R. indicates results not reported because the student count was less than 10.

DETAILS-GOOD FAITH EFFORT

Information about the school districts' and LEAs' good faith effort to help students meet graduation requirements is anecdotal and self-reported through the SBE's annual basic education compliance reporting. Self-reported data can result in embellishment to make the school districts' good faith effort appear better. Also, it is noteworthy that some school districts and LEAs selected responses unfavorable to the school district (e.g., Did Not Provide a support) when, in fact, the school district or LEA described the provision of the support in the open-ended response option.

As stated at the beginning of Part 2, the SBE wrote some of the questions in a manner in which we expected to have 100 percent of the respondents replying that all students being considered for a waiver received a particular support. In retrospect, the SBE envisioned multiple scenarios whereby school staff could respond to a prompt with "Provided to Most Students" rather than

“Provided to All Students” as a result of the staffs’ unique experiences. Even though certain advising was a requirement of GREW for all students, we came to accept that school districts and LEAs could be following program rules and not be providing certain advising and supports to all students. In these cases the SBE had to carefully scrutinize other responses to develop a clearer picture of the school districts’ good faith effort. In some cases, the SBE followed-up verbally with school district staff to learn more about the districts’ good faith effort.

Question 86: To what degree did the district or LEA provide individual student advising on the following topics to students being considered for the emergency waiver?

1. To what degree did the district or LEA advise and provide supports the individual student needs to be successful?
 - a. Not Provided = 2/179 (1%)
 - b. Provided for Some = 4/179 (2%)
 - c. Provided for Most = 7/179 (4%)
 - d. Provided for All = 166/179 (93%)
2. To what degree did the district or LEA advise on strategies the individual student might use to meet the graduation requirements, including the feasibility of summer or a partial or full additional year of high school enrollment?
 - a. Not Provided = 3/179 (2%)
 - b. Provided for Some = 9/179 (5%)
 - c. Provided for Most = 8/179 (4%)
 - d. Provided for All = 159/179 (89%)
3. To what degree did the district or LEA advise on whether the emergency waiver is appropriate for the individual student?
 - a. Not Provided = 2/179 (1%)
 - b. Provided for Some = 14/179 (8%)
 - c. Provided for Most = 7/179 (4%)
 - d. Provided for All = 156/179 (87%)

Question 88: To what degree did the district or LEA use the following options to support individual students in meeting credit and course-based graduation pathway requirements?

1. To what degree did the district or LEA tend to the provision of additional academic supports to aid student completion of graduation requirements?
 - a. Not Provided = 4/179 (2%)
 - b. Provided for Some = 32/179 (18%)
 - c. Provided for Most = 23/179 (13%)
 - d. Provided for All = 120/179 (67%)
2. To what degree did the district or LEA award credits based on the student's demonstrated proficiency/mastery of the state's learning standards under WAC 180-51-050, 180-51-051, and 392-410-300, including credits, grades, and courses transcribed on the high school transcript?
 - a. Not Provided = 31/179 (17%)
 - b. Provided for Some = 66/179 (37%)

- c. Provided for Most = 5/179 (3%)
 - d. Provided for All = 77/179 (43%)
3. To what degree did the district or LEA award credit through expanded learning opportunities, dual credit programs, work-based learning (WAC 392-410-315), traditional online, summer learning, CTE course equivalencies, and other local credit options for awarding credit outside of school?
- a. Not Provided = 11/179 (6%)
 - b. Provided for Some = 65/179 (36%)
 - c. Provided for Most = 19/179 (11%)
 - d. Provided for All = 84/179 (47%)

Question 90: To what degree did the district or LEA use the following options to support individual students in meeting an exam-based graduation pathway requirement?

1. How widely applied were the district's or LEA's efforts to ensure students are aware of the SAT, ACT, ASVAB, AP, IB, Cambridge International, and state assessment options?
- a. Not Provided = 6/179 (3%)
 - b. Provided for Some = 18/179 (9%)
 - c. Provided for Most = 10/179 (6%)
 - d. Provided for All = 145/179 (81%)
2. How widely applied were the district's or LEA's efforts to ensure students can access, online or by other alternative access options, the applicable assessment?
- a. Not Provided = 7/179 (4%)
 - b. Provided for Some = 30/179 (17%)
 - c. Provided for Most = 10/179 (6%)
 - d. Provided for All = 132/179 (73%)
3. How widely applied were the district's or LEA's' efforts to reduce or eliminate any cost to students in using these options?
- a. Not Provided = 8/179 (4%)
 - b. Provided for Some = 45/179 (25%)
 - c. Provided for Most = 14/179 (8%)
 - d. Provided for All = 112/179 (62%)

OTHER ADVISING PROVIDED TO STUDENTS

Table A4: shows the open-ended responses regarding the advising provided to students on the waiving of credit requirements and graduation pathway requirements.

Other advising for individual students regarding strategies for meeting graduation requirements, please describe below.
1. Senior fall transcript analysis by counselor 2. Senior tracking for status 3. Fall and winter conference with seniors- parents invited 4. Intervention support is offered, both academic and social/emotional 5. Letter sent home- written documentation provided
A small number of students were referred to the Open Doors/Fresh Start program with Tacoma Community College.
Administration and counseling teams identified all credit deficient graduating seniors and met with them about whether or not they were eligible for the waiver.
Advised to take the ASVAB (if they were planning to go to the military and the students HSBP was Career Tech/Military; advised to take the ACT/SAT (if they didn't work), met with individual teachers and students, and developed specific academic support plans and individual high school and beyond plan supports.
All high school counselors review credit, pathway and (waiver) options as necessary.
All students are assigned a teacher advisor during their "family time" (advisory) in which graduation requirements including credits, graduation pathways, scholarships, financial aid information is provided for students to explore and apply to their high school and beyond plan Counselors also have class meetings by grade level with individual students.
All students meet with the administration and/or counsellor a minimum of once per year to advise on appropriate pathways
All students who were deemed at risk of not meeting graduation requirements met individually with counselors and parents were included in those meetings. A graduation plan was created, with plan distributed to student and parents. Credit Retrieval was used for students who had previously failed a class, and frequent check ins with students and teachers were taken to make sure students stayed on track for graduation. Some students, based on individual circumstances, also were enrolled our contract learning program.
All students who were granted the emergency waivers met the state guidelines.
Alternative programs were also considered
Assigned an adult to each individual student as a case manager to monitor their progress, communicate with parents, and finalize waiver plan.
Counselors and school administration looked at Board Policy approved district waivers prior to applying for state emergency waivers for students. http://go.boarddocs.com/wa/ohsd/Board.nsf/goto?open&id=BRB7VX1B3085 http://go.boarddocs.com/wa/ohsd/Board.nsf/goto?open&id=BRB7VX1B3085
Counselors communicated directly with all students making waiver requests. Based on the student's current reality for credits as well as their post high school plan counselors may have made course adjustments, enrollment in our credit retrieval program, summer options and continuing for a 5th year of education either at the high school or through running start.
Counselors considered any students who met the criteria for waiver status.
Counselors provided additional support to individual students when the committee did not initially approve a waiver.
Credit recovery

Other advising for individual students regarding strategies for meeting graduation requirements, please describe below.
Credit recovery opportunities Family services HSBP summer school
Credit retrieval, world language competency exam.
Discussions on the use of the waiver included the student's future goals as outlined in their High School and Beyond Plan.
Each student meets with their parent, advisor, and their counselor to make sure that they are on track to graduate. Any student that is not on track is given multiple opportunities such as in school credit retrieval, after school credit retrieval and the ability to turn any course that was an "I" (incomplete) to complete with a Pass or Fail grade by working with that teacher to demonstrate mastery. In addition, counselors reviewed transcripts to see if the policy regarding "next higher-level course" (Policy 2413) could be used.
Each student was assigned a mentor. They met 2 times weekly with their mentor. We had before and after school tutoring and support.
Each student was met with individually to explore the different options that best fit their college/career.
GEAR UP, 9th grade success program, AVID
IEP meetings. 504 meetings CARE team meetings Individual counseling
IEP Team Meetings Student Support Meetings Individual meetings with students/counselor/admin/parents
In our advisory program teachers met with credit deficient students to sign up for summer school, enroll in credit recovery, connect with the counselor for a waiver, and to discuss supports for passing classes.
Individual advising and career college advising for every student. Parent conferences as needed.
Individual advising took place for individual circumstances.
Individual advising took place with students served by IEPs and 504s and also those students that were enrolled in academic intervention courses, in a team approach with administrator, counselor, teacher and case manager alongside student and parent/guardian.
Individual conferences included discussions of what might best meet the student's needs, this included consideration of GED, and straight to college without a diploma as well as more conventional approaches.
Individual counselors and our graduation success coordinator reviewed with each student one on one who might benefit from the GREW. Considerations included the student's plan after high school, a review of the transcript and previous test and classroom performance to determine the feasibility of the GREW enabling the student to have success based upon their individual goals and aspirations.
Individual students met with Counselors
Meet at the end of Junior year, review a watch list, scheduling meetings every two weeks
meetings with students and their parent/guardian to discuss plans
Mentoring programs, staff-to-student Connections and re-connections conferences
N/A was reported by 19 school districts
No students were considered for a waiver of credits.
none
NONE
Not provided
one on one counseling check-in
Other advising included strategies such as -local credit requirements -flexible credits due to individual student circumstances -considering excusing from PE as allowable -considering waiving the non-credit

Other advising for individual students regarding strategies for meeting graduation requirements, please describe below.
requirement of WA State History instead of core credits as allowable -completing other graduation pathways
Our counselor meets one on one with each senior twice each school year to ensure students are on track for graduation
Our high school counselors and principals did a nice job of supporting our seniors who were lacking necessary credits with additional support before and after school to attempt every available opportunity for them to earn the necessary credit.
Our high school is "small" and our counseling team goes above and beyond to help individual students.
Our HS counselor meets with each senior in the 2nd quarter of the year to ensure they are on track and to provide options for those that are not.
Parent conferences were held as well.
XXX used our Student Intervention Team to monitor student progress and issues on a weekly basis. Action steps were developed and reviewed for effectiveness each week. If action steps were ineffective new steps were developed and implemented for all students facing failure for credits and/or high stakes testing. Pathways to graduation were developed in conjunction with students and parents for all that did not pass their high stakes state testing.
Removed due dates, identified priority standards and allowed students to demonstrate competency versus requiring all assigned work to demonstrate proficiency.
School administrators and counselors met with all students who were in danger of failing a course that would impact graduation to develop a plan of action.
Seniors in need of further advising were assigned to the graduation specialist at each site to provide direct support with coursework and pathway completion.
Some students were advised to transition to our 1418 Open Doors Program.
Specific for students failing to meet basic education graduation requirements, individual contact was made with each student.
Staff members met with students throughout the year to advise on graduation requirements and how best to meet them. These included phone calls, emails, and home visits.
Student navigators worked with individual students in need of assistance.
Students participate in graduation planning in 10th and 11th grades, so all requirements are known. There are also parent meetings to cover this information and make a plan for individuals who are lacking credits, etc. We also had during and after school tutoring to help, students stay on track, or make up deficient credits, etc.
Students were advised that online courses could be utilized to meet the graduation requirement.
Students worked with the school counselor and principal to ensure that they were on track for graduation. The waiver was only used where other means were not appropriate.
Take ACT/SAT/ASVAB Take credit retrieval courses Take a CTE course to complete a pathway
Teacher modified student work to meet proficiency, teacher provided extended learning opportunities or credit recovery (district and offsite), reviewed second semester proficiency for first semester gaps, and reviewed district policy to award credit through proficiency testing
The advising strategies that are checked are what the district provided.
The district established addition credit retrieval on an accelerated timeline in order to meet the needs of graduating seniors and underclass-students. Administrators worked with teams to allow many students who were "nearly-passing" at the end of each semester to make up work or improve their learning and grades by completing additional work outside the semester.
The district had student mentors available to students who wanted this support.

Other advising for individual students regarding strategies for meeting graduation requirements, please describe below.
The district provided advising on graduation requirements to all students.
The district provided an advisory mentor program and graduation specialists throughout the school to monitor and advise students through the graduation process/status. Individual counseling sessions were provided each semester.
The school counselor offered academic support for all students to help them meet graduation requirements. She arranged tutoring, individual counseling, and regular check-ins with her.
The school provided individual advisors for all students.
There were multiple individual meetings with counselors and home visits.
Utilized Period 8 and E grades to recapture failed grades
We also offered both internal and external mental/behavioral health support.
We changed schedules for students to meet requirements. We offered credit retrieval to student beyond the school day. We offered a "mastery: assessment for students to earn credit for a prior year incomplete.
We created a support class called Focus 10-12. Students were able to receive individual support to pass classes.
We offered APEX online credit retrieval during and after the school day. We provided APEX online credit retrieval during the summer to complete graduation requirements. We provided extended school year opportunities in core subject areas to allow students more time to complete courses.
We offered one-on - one advising, home visits, intervention courses, credit retrieval. We brought in students that were at the highest level of academic need.
We offered summer school as an option free of charge to all students.
We sat with the student who needed the waiver and spoke to him about his options, both for graduation and in life.

OTHER ACADEMIC SUPPORTS PROVIDED TO STUDENTS

Table A5: shows the open-ended responses regarding the supports provided to students on meeting graduation requirements and avoiding use of the emergency waiver program.

Other academic supports provided by the district to help the student meet graduation requirements or awarded credits in another manner.
1. After school tutoring 2. Credit retrieval 3. Summer School
A few students, based on previous SBA scores were awarded mastery credit as per school district policy. Other academic supports included our Academic Success class, and increased monitoring by counselors and teachers for students who were deemed at risk to not meet graduation requirements.
Ability to retrieve lost credits during the school day
Academic success coach, student support advocate.
Additional supports included early re-entry to in-person learning for students most in need and Tuesday evening tutoring.
Advised to take the ASVAB (if they were planning to go to the military and the students HSBP was Career Tech/Military; advised to take the ACT/SAT (if they didn't work), met with individual teachers and students, and developed specific academic support plans and individual high school and beyond plan supports.
After school work, summer opportunities when needed
APEX Online for credit retrieval
As outlined in #64
Based on the needs of individual students and as allowed by statute, the district worked with families and students to grant credit in ways that are allowed.
Credit retrieval provided additional time, conferences with students to understand what they would need, provided translation services. Provided connection groups for students identified as needing SEL support.
Each counselor, advisor, and student reviewed all options that were available in the 20-21 school year or prior years that a student could be awarded credit for any credits that the student was missing. This included review of their past SBA grades, STAMP assessment scores, cross or dual credited programs. The goal was to be able to award any and all credit in helping to graduate on time.
Each student was assigned a mentor. They met 2 times weekly with their mentor. We had before and after school tutoring and support.
Increased use and application of distance learning course offerings.
Individual students had the opportunity to participate at XXX High School (our alternative school)
Local board policy was used whenever possible. http://go.boarddocs.com/wa/**sd http://go.boarddocs.com/wa/**sd2
Mentoring and tutoring
N/A was reported by 17 school districts
3 school districts reported that no other supports provided noted in #57
XXX School District expanded the summer school course work for students to have an opportunity to make up credits. The district continues to seek out work-based learning credits through CTE.
Offered credit retrieval courses within the school day.
One-on-one meetings. Additionally a credit retrieval program was building within our master schedule. Every student within our 9-12 system received an additional block of time for intervention/credit retrieval based upon essential learnings.

Other academic supports provided by the district to help the student meet graduation requirements or awarded credits in another manner.
Online courses were available for credit in both core and flexible credits through Edgenuity. Core and flexible credits were also available during summer school to earn up to one credit.
PASS - Migrant students had option for credit recovery
XXX applied our MTSS for students that needed additional support. Support was given in the way of home visits, online classes for credit retrieval, InvestEd funding to support student academic needs, Chromebooks and hotspots were provided to any home without technology and internet, after-school tutoring, plans of improvement, and many other supports.
RTI for all students based on local assessments.
Summer credit retrieval. Summer college and HS credit retrieval at XXX College.
Summer learning, credit retrieval, evidence of mastery
Summer Running Start Pilot through SPSCC, Summer School
Summer School/Credit Retrieval
support as needed
The academic supports that are checked are what the district provided.
The district offered accelerated credit retrieval through APEX for courses previously attended.
The district provided tutoring, study hall and counseling supports.
The District utilized a flexible scheduling of hybrid/in-person and night school for students who were required to work throughout the Pandemic to meet family needs.
Tuition free summer school.
tutoring and focused study skills
Tutoring, after school and before school help by teachers, taking additional online courses, advisor meetings and goal setting.
We changed schedules for students to meet requirements. We offered credit retrieval to student beyond the school day. We offered a "mastery: assessment for students to earn credit for a prior year incomplete.
We discussed the possibility of awarding credit based on his completion of an online real estate course we were supporting him with but he did not complete the course.
We offered APEX online credit retrieval during and after the school day. We provided APEX online credit retrieval during the summer to complete graduation requirements. We provided extended school year opportunities in core subject areas to allow students more time to complete courses.
We offered one-on - one advising, home visits, intervention courses, credit retrieval. We brought in students that were at the highest level of academic need.
We provided opportunities for SAT, ASVAB, and AP exams as well as for dual credit and CTE opportunities
We provided summer school opportunities for both credit recovery and advancement.

OTHER SUPPORTS TO MEET ASSESSMENT-BASED GRADUATION PATHWAYS

Table A6: shows the open-ended responses regarding the efforts made by districts to support students in meeting an assessment-based graduation pathway.

Other supports provided by the district to help students meet the exam-based graduation pathway requirement.
AP Online
ASVAB was offered in schools during the school day. AP exams were paid for by a grant.
Credit Recovery program and specific plans to support incompletes
Dual Credit/College in the High school, Running Start, Bridge to College
During the 20-21 school year there were no current exam-based pathways available. This included SAT, ACT, ASVAB or other exam-based graduation pathways that were used in years past. As answered in question 90 all of these options would have been used and available to all students, but they were not available. The only exam-based option would have been the SBA score that they would have passed as a 10th grade student.
Each student was assigned a mentor. They met f2 times weekly with their mentor. We had before and after school tutoring and support.
Individual students met with Counselors
Letter from employer and letter of acceptance from college or university.
N/A was reported by 22 school districts
No other supports was reported by 6 school districts
Offered district-wide testing dates for SAT, ACT, and ASVAB.
Offered in school assessment for ASVAB
Offered testing during the school day, awarding partial credit.
Supports were provided to any student who needed it.
The district communicated and provided a way for these options to be accessed by all students.
The district offered the ASVAB multiple times, rather than once a year, and opened it to all students that are eligible to take the assessment rather than target one-grade level.
The district waived all fees for summer school credit recovery.
The supports that are checked are what the district provided.
Waived for some.
We scheduled multiple days of ASVAB testing during the school day. In addition, this year we will offer SAT testing during the school day and provide it for free.
We were prepared to test students but it was not available.

DISTRICT RESPONSES ON THE EQUITABLE ADMINISTRATION OF THE WAIVER PROGRAM

Table A7: shows the open-ended responses regarding the school districts' protocols to ensure the emergency waiver program was administered in an equitable manner.

Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority
1:1 meetings with trained counselors, secured family consent, administrative authorization
1. Education of all counseling and administrative staff of law/provisions 2. School board policy change 3. Documentation of steps for at risk/need students.
1. Senior fall transcript analysis by counselor 2. Senior tracking for status 3. Fall and winter conference with seniors- parents invited 4. Intervention support is offered, both academic and social/emotional 5. Letter sent home- written documentation provided
A committee was convened to look at waiver requests to ensure equity.
A good faith effort was required for each student to meet the graduation requirements before considering a waiver regardless of demographic identification or program qualification. We ensured equity by reviewing every student's record.
A systemic process (Policy 2418) and protocols (Procedure 2418P) in place at all high schools. Students met with assigned counselor early in the year to develop an individual plan to meet graduation requirements.
Accessible to all students, if needed.
Administrator and counselor recommendations followed by superintendent sign-off or designees. Documented in Skyward
Administrators and counselors reviewed student data, disaggregated for subgroups, met with all identified students to develop a plan to complete graduation requirements. In addition, students were provided supports each needed to achieve success on their plan.
Administrators, counselors and families completed a waiver request form. Form approved by School principal and Asst. Supt. for Secondary Schools. Form filed in student's cumulative file.
Advertised to all students and families in languages spoken at home. Counselors called all students who were in danger of not meeting graduation requirements. Established criteria for approval prior to reviewing student applications.
All buildings followed the same procedures using the same forms. Counselors and administrators were trained around the requirements.
All XXX School District seniors had access to the use of the emergency waiver if needed. However, no emergency waiver was needed.
All final waiver requests submitted by YHS faculty were granted. All requests fell within the SBE waiver guidelines and followed a systematic process which involved multiple district and school-level stakeholders. An equity protocol was developed in advance. It proved unnecessary to implement in 2020-21 because all waivers put forward met the SBE criteria and were fully granted.
All graduating students of Classes 2020 and 2021 who had not met graduation requirements by end of the 3rd quarter were reviewed to determine the best course of action. Those who, due to Covid related issues, could not meet the requirement for graduation were counseled regarding the graduation waiver opportunity. All waivers requested were granted.

Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority
<p>All of our students are screened for need. All options are explained to students; Follow-up with at-risk students is initiated by the counselors. All students were informed of the waiver and the waiver was applied to any student who exhausted all other options.</p>
<p>All student data was reviewed monthly. Interventions were carried out systematically. Waivers were applied based on individual student needs and situations.</p>
<p>All student progress was reviewed and one student was identified as needing the GREW program benefit.</p>
<p>All student transcripts were reviewed. Any student with graduation deficiencies received a counselor team review. Counselors developed a plan to ensure best efforts to meet standard graduation requirements were met by students. A review of options from local board policies to state emergency waivers were then determined if they were appropriate on a case by case basis through the team review.</p>
<p>All student who were at risk were notified. Counselors worked with all these students on a graduation plan. Teachers provided makeup opportunities for class and work. We used phone calls and mentoring to ensure students has opportunities to access the waiver. For students and families who made a good faith effort to stay on track to graduate during the pandemic could access the waiver.</p>
<p>All students at risk were contacted. Students and parents were given an opportunity to discuss and decide their options.</p>
<p>All students' graduation requirements were based individually upon need.</p>
<p>All students had access to the waiver. All student records were reviewed and all students who needed the waiver were granted it</p>
<p>All students had same access to ensure equity.</p>
<p>All students had the opportunity to apply for an emergency waiver if needed. The counselor reviewed and met with all seniors to determine if a waiver may be necessary and works with the student to achieve the requirements of the waiver.</p>
<p>All students met with the counselor to discuss graduation requirements, no students needed this option</p>
<p>All students not meeting requirements for graduation were considered for a waiver by a multi-disciplinary team with knowledge of the students.</p>
<p>All students were provided information on the GREW and given opportunities to meet with counselors</p>
<p>All students who met requirements received the emergency waiver.</p>
<p>All Students who needed a waiver for graduation were given the opportunity to receive get one.</p>
<p>All students who needed an emergency waiver were granted the waiver. We worked with the students and families to help the student(s) graduate.</p>
<p>All students who were in jeopardy of not graduating were offered a waiver. We had guardian conferences, student weekly meetings, extended timelines for course completion, and modified work.</p>
<p>All students who were not on track to graduate were counseled individually to create a plan for success. The waiver was used if students could not reach the target without them.</p>
<p>All students' High School and Beyond Plans, graduation requirement progress and credits needed for graduation are reviewed with students and parents/guardians by their high school counselors. Information about potential waiver options were shared with each student that might be in need of a waiver. Each school principal maintains and monitors a log of all potential students in need of waivers.</p>

<p align="center">Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority</p>
<p>High school principals share the information with their district office supervisor. District office staff review students' progress documented in PowerSchool regarding credits, testing progress along with all graduation requirements to ensure there are checks and balances in place. Information regarding waiver options, requirements, and procedures are reviewed with building administrative staff during regularly scheduled district hosted meetings.</p>
<p>All waivers were reviewed by counselors, principals and the Executive Director of Student Learning. Waiver approvals were disaggregated by race and subprograms. If inequities are identified then the On Time Graduation committee will convene a subcommittee to determine how to rectify the gaps.</p>
<p>Any student can initiate the process. Meet with counselor for transcript review. If good, then meet with principal. School board and superintendent have final approval.</p>
<p>Any student that all resources have been utilized and student was still not able to meet graduation status, GREW was used.</p>
<p>Building Team (i.e. principal, counselor, teacher reviewed each waiver request.</p>
<p>Buildings review process for all potential waivers. Counselors review process for each student on caseload that may be eligible for waiver. District communication to families through email, translated letters and information, posted on website.</p>
<p>Case by case for each student</p>
<p>Clear and open communication was established and maintained with all students that were in danger of not meeting graduation requirements. A campus committee worked with each student to identify the roadblocks to graduation and the possible waivers that were available. Students and their families were involved in the process and supported equally.</p>
<p>Communicated availability- Counselors/administrators communicated to students who may have been in need of emergency waiver.</p>
<p>Communicated waiver process and multiple methods to families and students. Ensured equity in administering the emergency waiver. Granted waivers on individual basis for students who were eligible. Each student addressed credit deficiency and met course and pathway requirements prior to granting a waiver. Met individually with each family and student multiple times prior to granting the waiver.</p>
<p>Communication with all families, communication with all students, counselors met 1:1 with student, all who were qualified received the waiver</p>
<p>Communication with every senior/graduate and parent to explain the GREW process. Counselors met with each senior in need of a potential waiver to progress monitor transcripts/credit checks/graduation pathway to review possible needs and GREW solutions. Counselors contacted parents to review the GREW need and share solutions and plans</p>
<p>Counselors and administrators at each high school identified and counseled every student who might benefit from a waiver to determine if they met eligibility requirements and whether a waiver would be in their best interests.</p>
<p>Counselors and administrators identified needs with all students.</p>
<p>Counselors and administrators in each high school worked with individual students.</p>
<p>Counselors and administrators met with each student who had a potential need for waiver along with their families. They followed the guidance outlined in WAC180-111-020 and used the OSPI developed GREW form to document.</p>

<p align="center">Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority</p>
<p>Counselors at each high school evaluated student transcripts to determine if waivers were necessary. Information was then sent to all students and families who needed waivers, and waivers were granted.</p>
<p>Counselors determined minimum credits necessary to be on-track for graduation and counselors reached out to all students who met the minimum criteria and who were in jeopardy of not meeting the full credit requirements through multiple means including phone, e-mail, and individual meetings with students and families.</p>
<p>Counselors met personally with every senior. Credit recovery was provided free of charge. Waiver applications were offered to those who qualified within the waiver policy guidelines.</p>
<p>Counselors met with each credit deficient student. Based on the information, individual alternative graduation pathways were identified and implemented.</p>
<p>Counselors met with each student and family to identify need(s) and as applicable submit waiver request(s). Principals attested and waiver submission reviewed by a central office committee. Counselors and staff all had access to the same tools and processes for submission. A review was scheduled for leadership to review waiver data such as district totals and waiver types.</p>
<p>Counselors met with students 1:1 to share options and how to apply for waivers as appropriate</p>
<p>Counselors were trained to meet in-person or virtually with students for whom a waiver may apply. The form included required request sections for disability, health conditions, homelessness, limited English proficiency, transfer, and other/emergency. These requests were reviewed by the team before submission.</p>
<p>Created a spreadsheet of student data, evaluated each student on any deficiencies in graduation pathway based on HSBP; also interviewed each identified student to examine/determine credit needs.</p>
<p>Created a spreadsheet of student data, evaluated each student on any deficiencies in graduation pathway based on HSBP; also interviewed each student identified as needing assistance.</p>
<p>Data was collected and disaggregated by race, ethnicity, gender, and federal program to ensure equitable administration</p>
<p>Developed an equity lens and met with Administrators and counselors. Looked at barriers to graduation and ongoing data review.</p>
<p>District adopted form is completed and approved by HS Principal and submitted to the Superintendent.</p>
<p>District ensured all students not yet meeting graduation pathway requirements were offered personal counseling explaining options regarding credit/pathway waivers. The district Title IX officer reviewed the list of waivers to ensure broad representation among applicants. The district reviewed its "good faith effort" regarding support for all students requesting the GREW to ensure equitable application of support services. The district consulted with students and families regarding GREW waivers in their native language.</p>
<p>Each and every case is looked at thoroughly, individually and through multiple lenses.</p>
<p>Each and every student eligible for the waiver was notified and advised of the pros and cons of applying for the waiver.</p>

<p align="center">Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority</p>
<p>Each high school took the time to share the information with parents, students and the greater school community in multiple languages and in multiple modalities. In addition seniors, met with counselors one on one to prepare them for graduation and complete a needs assessment to explore the possible need (and appropriateness) of accessing the emergency waiver.</p>
<p>Each student met with their advisors to review the requirements and get assistance should any of the students be found to be deficient.</p>
<p>Each student transcript was examined individually to determine waiver eligibility. Students were contacted and individualized graduation plans were established in cooperation with the students and their families.</p>
<p>Each student was assessed on an individual basis to determine the need for a waiver.</p>
<p>Each student's situation was considered. All student received waiver information with contact information for questions.</p>
<p>Each student's situation went through an academic review to see if their pathway had been met. Decisions were advanced to a Child Study Team to ensure equity was met.</p>
<p>Equity is providing the right support to each student.</p>
<p>Equity plan adopted. However, no waivers were needed anyway.</p>
<p>Established a form for counselors and/or principals had to complete in order to match criteria needed for the waiver.</p>
<p>Evaluated all graduating seniors doing a credit checks. Identified students not on track. Contacted all seniors not on track and requested a meeting with them and a parent via zoom. Set up a plan with the school counselor and the student. Monitored their progress weekly. Worked with teachers on individual cases to adjust classroom as appropriate.</p>
<p>XXX School District ensured access of equity by analyzing students' graduation requirement needs and ways to meet the grad pathways through the waiver. Counselors were educated on the process as well as students. Any student who was 'at-risk' for not graduating was evaluated against the GREW waiver requirements.</p>
<p>Every student indicator is checked by the high school counselors, the Special Education teachers and the building Principal to ensure all students are given the opportunity to access the emergency waiver if needed to graduate.</p>
<p>Every student was evaluated by a guidance counselor to determine whether or not the waiver was necessary/appropriate.</p>
<p>First our entire community was notified of the emergency waiver option. The district provided a form with all the options available as well as reference to the SBE rules. This form requires signatures from each stakeholder.</p>
<p>High school administrators and counselors calibrated practice with the Executive Director of Equity and Instructional Leadership and the Executive Director Equity, Assessment/Accountability and Highly Capable around the emergency waiver of graduation requirements for the purpose of ensuring equity in the process.</p>
<p>High school counselors met with every student who was in danger of not meeting graduation requirements as they relate to credits and/or pathways. Waiver options were explained to each student in this category and parents/guardians were notified as well</p>

Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority
XXX applied the standard used for accessing other supplementary resources, for instance: Homeless, Foster Care, Students furthest from educational justice, and students with unique socioemotional challenges.
Individual conferences with students and parents of those in need of a waiver. Evaluation of circumstances and need in each situation. Explore and reject other options before instituting the waiver. Monitoring of demographic statistics of students receiving waivers.
Individual conferencing with students and families regarding options to earn credits, impact of potential waiver(s), and graduation planning
Individual meetings were held with all potential students demonstrating the possible need for a waiver. Information was shared to all students and families in the home language.
Individual student conference/communication Data dashboards Results data with student sub-group info
Individually met with each student and developed an individual graduation plan.
Information on the waiver was provided to all students and was granted to all students that applied.
It was available to all students and there were several adults who served as advocates for each student.
K-12 Summer School and Credit Retrieval
Lots of meetings and outreach, case by case support to individual barriers
Meet as a district to identified plan. Met with students individually who may qualify. Met with parents to discuss waiver. Took waiver to team and was approved or denied.
Met with all 12th grade students to advise on graduation and waiver options. We are small school so we were able to meet with all our students regarding this requirement.
N/A was reported by 5 school districts
No students needed the waiver for graduation.
No students were considered for a waiver of credits.
Offered to all high school seniors who were credit deficient.
Once student requested the waiver for physical education credit. This student provided proof of completion of an ROTC physical fitness program, therefore the .5 credit was waived. This was the only student who the waiver was applied to.
Our counselor met individually with our 12 seniors and recommended an emergency waiver of graduation requirements for all students who qualified.
Our high school counselors and principals did a nice job of supporting our seniors who were lacking necessary credits with additional support before and after school to attempt every available opportunity for them to earn the necessary credit.
Our HS staff worked with each student to ensure that they met requirements and used the tools available to assist students.
Our principal and counselor considered all circumstances to ensure equity.

<p align="center">Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority</p>
<p>XXX SD considered the issues facing all students in jeopardy of not graduating. A path to graduation was supported for all students. Issues facing students of color and financial hardship were overcome for all students in those demographics.</p>
<p>Posted notice on our school website</p>
<p>Principals and high school counselors identified which seniors were eligible for the Graduation Requirement Emergency Waivers. Counselors individually met with all of the identified students and parents to review HS&B plans, credit retrieval opportunities, graduation pathways, and create individual plans.</p>
<p>Process for review at the school level, principal sign off, committee to review/arbitrate; deputy superintendent to appeal.</p>
<p>Professional judgment and communication with counselors and administration.</p>
<p>Provided to all students-did not deny emergency waiver to any student</p>
<p>Review of students in need of waiver due to being at risk of graduating</p>
<p>Reviewed each waiver on case-by-case basis. Used equity tool to guide review.</p>
<p>Reviewed every student's needs for graduation and applied emergency waiver accordingly</p>
<p>Reviewed needs for all students. Conferenced with students in need to determine if the waiver met their future goals.</p>
<p>Reviewed student by student graduation status and provided each eligible student the waiver</p>
<p>School administrators reviewed requests using objective criteria to ensure approvals were administered in an equitable manner. Review of approvals to evaluate equity.</p>
<p>School counselors met one on one with all eligible students about the emergency waiver and gave them the opportunity to request the waiver or turn it down. All waiver requests were reviewed by district staff and approved. We had a process in place to review appeals for any waivers that were initially denied, but we did not need to use it.</p>
<p>Schools identified all students who qualified for the waiver, and initiated broad outreach to students and families about its availability. Schools also communicated directly, and repeatedly, with all students who qualified, through our counselors and other student support staff. Finally, schools reviewed our lists of eligible students through the dual lenses of our school improvement plans, and our local definition of educational equity: "Equity in education is the notion that every student will receive the necessary resources they need individually to thrive in XXX schools regardless of race, ethnicity, religion, language, disabilities, socioeconomic status, country of origin, immigration status, sexual orientation, gender, and gender identity." With this as an additional and central foundation, our staffs embedded our equity values in supporting students in the application of the waiver process</p>
<p>shared information with waiver with all students behind in credits counselors met with individual students to discuss options assessment TOSA tracked all seniors graduation plan was created for each senior</p>

Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority
Staff met with students/parents that were not on track to graduate. Review waiver requirements. Issued waivers accordingly, with appropriate documentation
Student demographics and special program data was collected and reviewed at building and district levels.
Students in the class of 2021 and their Parents/Guardians were provided information about the GREW waiver option. Counselors met with students to discuss impact of waiver, and conferenced (via phone or zoom) with parents/guardians to review the implications of applying the waiver to graduation requirements. Students were given the opportunity to request the waiver AND also provided with recovery options to earn a course grade through the last day of the Spring 2021 grading period. Waivers were applied only for those students that did not meet the passing threshold for each class that they requested to waive. Throughout the entire 2020-2021 school year, students in the class of 2021 were monitored for on-time graduation metrics and provided with opportunities for in-person instruction during school closure. Also, students were provided with recovery options through online platforms (Edgenuity) via credit recovery plans with individual teachers, and as a summer school option to earn a grade.
Students were identified to be considered for the waiver through a review of graduation requirement data. High school counselors and administrators provided individual advising to help each student determine: What supports they need to be successful; how they might meet the graduation requirements, including the feasibility of summer or a partial or full additional year of high school enrollment; and whether the emergency waiver was appropriate for the individual student.
Systemic approach through site-level graduation assurance teams with oversight from the College and Career Readiness Department.
The counselor and principal conducted senior interviews for every senior to assess individual need at the beginning of the year. Then they worked with teachers and students throughout the year to help students finish requirements. Every student/family was engaged in the graduation process.
The counselors completed a credit check, all students were considered for this review and consultation. The students that qualified were referred to the committee equitably.
The District applied for and was granted a waiver, but did not use the waiver. All students graduated without use of the waiver.
The district closely followed the guidance from the state and the rules found in chapter 180-111 in the WAC.
The district convened a multi-disciplinary team to consider each request. The team used a standard protocol to ensure that all other options had been exhausted and to ensure that the student was fully informed of the implications of a waiver. Every effort was made to support the student and families were involved in the process where appropriate.
The district developed a guide for counselors and high school administrators to follow. Staff also developed a list of students who met minimum qualifications and directed counselors to review and contact student to investigate if GREW was appropriate choice. Then staff had to complete a GREW request attesting that the student qualified that was signed by the principal prior to the CEDARS administrator submitting the request. The rules were consistent for all students and ensured that all eligible were reviewed for GREW access.
The district developed an application process that met all the requirements for students, parents, and school personnel. A team of required personnel met to review all waiver requests.

<p style="text-align: center;">Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority</p>
<p>The district held trainings and meetings with high school counselors and administrators. The assistant superintendent for secondary education reviewed and approved all waivers.</p>
<p>The district provided outreach to all students to encourage and support the completion of all credits required for graduation. Student Support Teams were developed and systematically identified students who required additional support. Individual plans were developed for students prior to granting the waiver. The team worked to remove barriers when possible. Other options were offered before utilizing the waiver.</p>
<p>The District reviewed all potential graduates and any graduate that qualified for an emergency waiver was able to receive one.</p>
<p>The district reviewed individual student files and provided additional supports for individual students. The district also worked with students and families.</p>
<p>The district reviewed progress of each student throughout the school year. Students who were failing to make progress received multiple forms of support and direct contact by intervention staff.</p>
<p>The district team reviewed every student's credits and needs. This was a team comprised of counselor, principal, teachers, and support staff. The identified students in need and created individual plans for them.</p>
<p>The district's Research and Assessment office developed extensive reports for each school containing credit and assessment information for EVERY student. Counselors, school and district administrators met several times to discuss each student and to develop a support plan for credit attainment. Counselors and administrators met with students and families through a variety of methods including in-person meetings, Zoom meetings and phone calls to finalize plans for each student based on the student's High School and Beyond Plan goals. Translation services were utilized when appropriate. Home visits were also conducted when other methods of contact were unsuccessful.</p>
<p>The Emergency Graduation Credit Waiver application along with a written district plan was submitted and approved by OSPI. The district plan included the process available to all students for equity access and how the information would be communicated in a culturally responsive way as outlined in the application and plan requirements.</p>
<p>The emergency waiver of graduation requirements was shared with all seniors. Those who wanted to apply were able to participate in the program.</p>
<p>The emergency waiver was offered to all students based on need. The school counselor and principal met with each student and parent individually to discuss the emergency waiver.</p>
<p>The high school administrators worked with the high school counselors to review each student individually. They reviewed credits, courses, grades, attendance, etc. to determine if any additional supports were necessary to help individual students meet graduation requirements in light of COVID impacts.</p>
<p>The high school counseling team evaluated every senior's records and met with all students who may have needed the emergency waiver. Only 20 seniors received the Graduation Requirements Emergency Waiver because 50 students were able to complete a CTE Pathway and 76 students completed Bridge to College course(s) for the Math (40), ELA (4), or both Pathways (32). This resulted in 163 out of 174, 93.6%, of our Seniors at Quincy High School (QHS) who graduated in 2021. 11 students were too far away from the graduation requirements and are expected to return to XXX HS next year to finish.</p>

<p align="center">Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority</p>
<p>The high school met with each senior to determine what the need was for waivers and created a plan for students that could potentially not need the waiver.</p>
<p>The needs of each student were taken into consideration.</p>
<p>The option was available to all students via the guidance office with coordination from the school administration.</p>
<p>The principal and counselor met with students, parents, and teachers to determine if a waiver was needed. Collectively they determined when a student needed a waiver to graduate on time.</p>
<p>The school board passed the policy. A copy of the documentation on each waiver is in the student file.</p>
<p>The school contacted each student in June who qualified for an emergency waiver. All the students who qualified and submitted a complete application were approved. All the families were contacted again in the fall if the school thought they qualified.</p>
<p>The school district counseling and administrative staff reached out to ALL students who potentially were eligible for the waiver.</p>
<p>The school district staff reviewed applications for waivers including the use of a demographic lens. In addition, school counselors under the direction of the school administrator reviewed all waiver requests to determine alternate and more complete solutions.</p>
<p>The steps that the XXX School District took to ensure equity in administration of the emergency waiver for graduation were: â€¢</p>
<p>The waiver was considered for ALL students with a graduation requirement deficiency.</p>
<p>The waiver was granted on a case by case basis after all other graduation avenues had been exhausted. There was a checklist to ensure all avenues were exhausted and the waiver was a last resort.</p>
<p>The waiver was used for a transfer Special Education student to TSD. We felt the waiver was equitably used.</p>
<p>There was only one applicant and the waiver was granted. All other students met graduation requirements.</p>
<p>There were was one student who needed the waiver and it was a student of special needs. All other students met the graduation requirements.</p>
<p>To ensure equity of administration we met with each eligible student to make a plan that fit their specific needs.</p>
<p>Trained administrator & HS Counselors of waiver process. Reviewed student transcripts and worked with students individually around waiver needs. Waivers approved by principal and included in student file. Data collected re: waivers granted and submitted to District.</p>
<p>Transcript analysis, student by student, to create a graduation plan and identify which students would benefit from a waiver.</p>
<p>Use of equity analysis tool</p>
<p>XXX took several steps to ensure equity in administration of the emergency waiver including (1) emphasizing equity in initial staff training, (2) making sure the emergency waivers were promoted and available to all students/families, (3) providing information in family's home language, (4) ensuring that</p>

Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority
students/families understood their options, (5) collecting equity demographic information to monitoring purposes, and (6) overseeing implementation by district personnel with an equity lens.
Waiver was available for all students and students that qualified/needed the waiver were met with by counselors.
Waiver was available to all students. Counselors met with every student who qualified with their parents. All rules and requirements were reviewed as well as the downside of waiving certain credits. Plans were reviewed by the principal.
Waivers were designated to all students who needed it. All students were reviewed for eligibility, to ensure every student who did qualify, received a waiver.
Waivers were granted to all students who demonstrated consistent effort using remote learning and met the qualifications.
Waivers were made available to all students for which it was appropriate.
We analyzed the demographic and student characteristics of the students recommended for the GREW and examined whether or not we exercised the GREW option disproportionately
We communicated in a variety of modalities and languages. We hosted individual conferences with students and families; our GREW panel members represented a wide variety of stakeholders, including mental health professionals and members of color; members of our GREW panel were trained in trauma-informed practices.
We contacted every student
We did not have any students access the waiver.
We did not have to administer the waiver.
We established a standards of practice to ensure that all students were afforded the opportunity and guided by high school counselors
We followed all guidelines and worked with our counselors and staff to identify all students in danger of not graduating.
We followed the emergency waiver program through the state board of education. Every student had an individualized conversation with the school counselor, parent/guardian, administrator and mentor teacher. We created a board approved emergency waiver decision flow chart to ensure the process was the same for all students. If a student disputed a decision a community led team heard the dispute and made a decision.
We had a committee of professionals who understood the students, school, community, and requirements of the ruling who reviewed any application for waiving credits and determined approval.
We had a graduating class of two in 2021. One student needed the help to graduate and the other student did not.
We have the board approved waiver but were fortunate not to have to use it.
We met with every student who qualified. They submitted a written request for the waiver for specific credits. Each application was reviewed by the counselor and administrator.
We met with students/families at risk of not graduating. Notified them of options for credit retrieval. An emergency waiver was used as our last resort.

<p align="center">Strategies undertaken by district to ensure equitable use of Emergency Waiver Authority</p>
<p>We offered to all students who were credit deficient due to COVID - 19. We offered one-on - one advising, home visits, intervention courses, credit retrieval. We brought in students that were at the highest level of academic need.</p>
<p>We provided students and families with communication in both writing and through personal phone calls. The messaging was also translated for parents.</p>
<p>We reviewed all students who were credit deficient and applied a waiver where needed. District reviewed all applications where waiver was denied.</p>
<p>We reviewed the demographics of students requesting waivers and provided multiple opportunities for communication of requirements (posted on the website, in person, 1:1 conferences; reviewed transcripts, etc.)</p>
<p>We took the waiver to the Board of Directors for approval. Once it was approved the waiver was made available to all students at Sequim High School. Communication went out multiple ways. The administration and counseling teams met numerous times to analyze all graduating seniors and their credit status. Then we reached out to anyone eligible for the waiver and met with them.</p>
<p>We tracked student achievement by student groups. We focused specifically on our identified students with disabilities and students of poverty.</p>
<p>We worked with each impacted student furthest from educational justice, especially those traditionally marginalized students to ensure they met the requirements to graduate</p>
<p>Widespread communication to all high school seniors and parents through district web site; school administration weekly family messages in multiple formats; and counselor and administration conversations with students. Continuous review of equitable administration of waiver by central administration oversight team through use of district Equity Lens tool and review of student data.</p>
<p>Working with SPED and the student's former district. All forms were completed and board approval was provided.</p>
