Contracted Telecommunication and Electronic Media Services for Inmates in State Correctional Facilities

2023 Report to the Legislature

Legislative Directive

"By July 1st of each year, the contractor that provides inmates with access to telecommunication services and electronic media services under subsection (1) of this section shall report to the department the following information:

- (a) A summary of services offered at each correctional facility;
- (b) Rates charged for, or associated with, providing each type of service including, but not limited to, monthly financial account maintenance fees, transaction fees associated with money transfers, per call and connection surcharges, bill statement fees, and refund fees;
- (c) A total accounting of commissions provided to the department or correctional facility;
- (d) A summary and accounting of services used by inmates categorized as indigent;
- (e) One-time and ongoing costs incurred for installing and maintaining hardware;
- (f) Average customer service response time rates per facility and the average time taken to resolve an issue or provide a refund for defective services; and
- (g) An accounting of all revenues or losses incurred by the contractor by quarter.

In compliance with RCW <u>43.01.036</u>, the department shall report to the governor and legislature on contracts for telecommunication services and electronic media services under this section and the contractor's annual compliance with this section.

This section applies to any contract in effect on the effective date of this section, and to any renegotiation, renewal, or extension of such contract."

Substitute Senate Bill 6476 (2020)

Executive Summary

Background

The Washington State Department of Corrections (DOC) is a public safety agency responsible for the confinement and supervision of individuals convicted of felony crimes and sentenced to more than one year of incarceration within the State of Washington. Per RCW 72.09.010, the correctional system should positively impact the incarcerated, discourage recidivism, reduce idleness, and link the receipt or denial of privileges to responsible behavior and accomplishments. DOC recognizes the importance of acquiring and providing appropriate phone call services for incarcerated individuals and the department's mission of improving public safety by positively changing lives.

The department's Incarcerated Technology Services (ITS) contract provides a wide variety of services, such as telecommunication technology to make phone calls via traditional wall mounted phones. Tablets also are issued to individuals, providing access to e-messaging, video visitation, movie rentals, music downloads and digital games. These services enable incarcerated individuals to maintain ties with family, friends, and the community. Further, these services seek to reduce recidivism and idleness as well as promote responsible behavior as the use of these services is an earned privilege.

In contracting for these services, the department seeks to provide the highest level of services to incarcerated individuals, their families, and friends at the lowest cost. The department does not pay the contractor to perform these services. The contractor receives 100% of its compensation by charging incarcerated individuals and their friends/family members a cost or fee to use certain services (i.e., \$.05 per minute for a telephone call, \$2.00 service charge to fund an account with a credit/debit card, as low as \$.16 to send an e-messages, etc.).

Contracted commission rates from the sale of certain telecommunication and electronic media services to incarcerated individuals is received monthly from the contracted vendor and deposited into the Incarcerated Individual Betterment Fund (IIBF). According to DOC 200.200, assets of the betterment fund are used solely for incarcerated individual betterment activities (such as television cable, recreational sports equipment and supplies, extended family visiting, law library, etc.), .that enhance the security and orderly operation of a DOC facility by reducing idleness and encouraging positive family and community ties.

Report Overview

In this report to the Governor and the Legislature, the department is required to report on the contracts for telecommunication and electronic media services, and the contractor's annual compliance with reporting requirements.

Incarcerated Technology Services Contract

The department executed a contract with Securus Technologies, an Aventi Company, in May 2022. Following implementation, all DOC facilities began using Securus Technologies services in March 2023. Contractual services include:

- Telephone Services (including wall mounted phones and individual tablets)
- E-Messaging
- Digital Games
- Media Content (movies, music, audio books, television episodes, podcasts, etc.)
- Video Visitation (as a supplement to in-person visitation)
- Commissary Ordering
- Incarcerated Banking Services
- Legal Library Access

A copy of the current Incarcerated Technology Service contract as well as additional information can be found on the department's website at Contracts | Washington State Department of Corrections.

Contractor's Annual Compliance

Securus is in compliance with all terms of the contract, with the exception of Service Level Agreements (SLA) contained in Attachment B relating to "Securus Service Response Times and Escalations" as noted below:

Priority 1 (P1) event: A P1 is any event or defect significantly impacting the ability of users to use the services, for example, being unable to make telephone calls, video visits not working, wi-fi inoperable, etc. The contract requires Securus to resolve P1 service issues in its control within 24 hours.

The current average hours to close P1 events is 100 hours (more than four days)

Priority 3 (P3) event: A P3 is any event or defect that causes minor problems to occur that can be circumvented without difficulty or disruption to users. A service may be out of order but can be resolved in a simple way with nominal impact. For example, a commissary tablet application is not working but individuals can order from the commissary from another device. Or, tablet phone calls are not working but calls can be made via the wall mounted phones, etc. The contract requires Securus to resolve P3 service issues in its control within 72 hours.

> The current average hours to close P3 events is 230 hours (more than nine days)

Although the contract provides a mechanism for the department to impose financial penalties for non-compliance, such as failure to maintain operable telephones, tablet services, video visits, etc., Securus is required only to develop a performance improvement plan (with department oversight) for timely resolution of Priority 1 and Priority 3 service interruptions.

Per the terms of the contract, Securus has developed the required performance improvement plan to address deficiencies in meeting the required SLAs related to "Securus Service Response Times and Escalations".

The performance improvement plan identifies several actions Securus is taking to improve the resolution of P1 and P3 events, over the course of 30, 60, and 90 days including:

✓ Continuing clean-up and focused daily management of the service ticket backlog due to issues experienced during implementation.

- ✓ Enhanced facility supports to ensure service tickets are being entered and routed to the proper office (Securus/facility services vs. incarcerated account services).
- ✓ Ensuring Securus/facility-based service events are escalated to Securus Management and not just within technical support employees.
- ✓ Monitoring of Securus' internal service dashboard and reporting system to identify events related to SLA requirements and more quickly identify and escalate events interrupting service.
