- WAC 173-98-410 Refinancing. (1) There are two kinds of refinance with different rules: Standard refinance and interim refinance.
- (2) **Standard refinance** refers to a completed project funded with funds from a source other than the department. It is limited to water pollution control facilities where project construction began after March 7, 1985.
- (a) Applicants requesting standard refinancing must meet all the requirements contained in the act;
- (b) Standard refinance projects will only be funded if there is limited demand for funds for new projects;
- (c) All department prerequisites and revolving fund conditions must have been met at the time the project was undertaken;
- (d) If multiple standard refinance applications are received, priority will be given based on impacts to the ratepayers in the service area of the project;
- (e) Standard refinance projects are not eligible for hardship financial assistance; and
- (f) Repayment begins six months after a funding agreement becomes effective.
- (3) **Interim refinance** applies to a project that is in progress using funds from a source other than the department. Interim refinance retires existing debt and also covers the remaining eligible project costs. Interim refinance projects must meet all applicable requirements of this chapter.
