

WAC 332-17-440 Well spacing. The department will approve proposed well spacing programs or prescribe such modifications to the programs as it determines necessary for proper development, giving consideration to such factors as:

- (1) Topography of the area;
- (2) Geologic conditions of the reservoir;
- (3) Minimum number of wells required for adequate development;

and

- (4) Protection of environment.

[Statutory Authority: RCW 79.76.050(2). WSR 79-02-001 (Order), § 332-17-440, filed 1/4/79.]
