

**WAC 352-66-220 Procedure for reporting defects and discrepancies.** (1) Mariners should notify the nearest Coast Guard facility immediately of any observed aids to navigation defects or discrepancies.

(2) The Coast Guard cannot monitor the many thousands of aids in the U.S. Aids to Navigation System simultaneously and continuously. As a result, it is not possible to maintain every aid operating properly and on its charted position at all times. Marine safety will be enhanced if persons finding aids missing, sunk, capsized, damaged, off station, or showing characteristics other than those advertised in the *Light List*, or other publication, promptly inform the Coast Guard.
