# Where Seattle ranks in AI Startups

## A. The race for leadership

### Global distribution of AI startups

Top countries and cities by number of startups

#### Top Countries

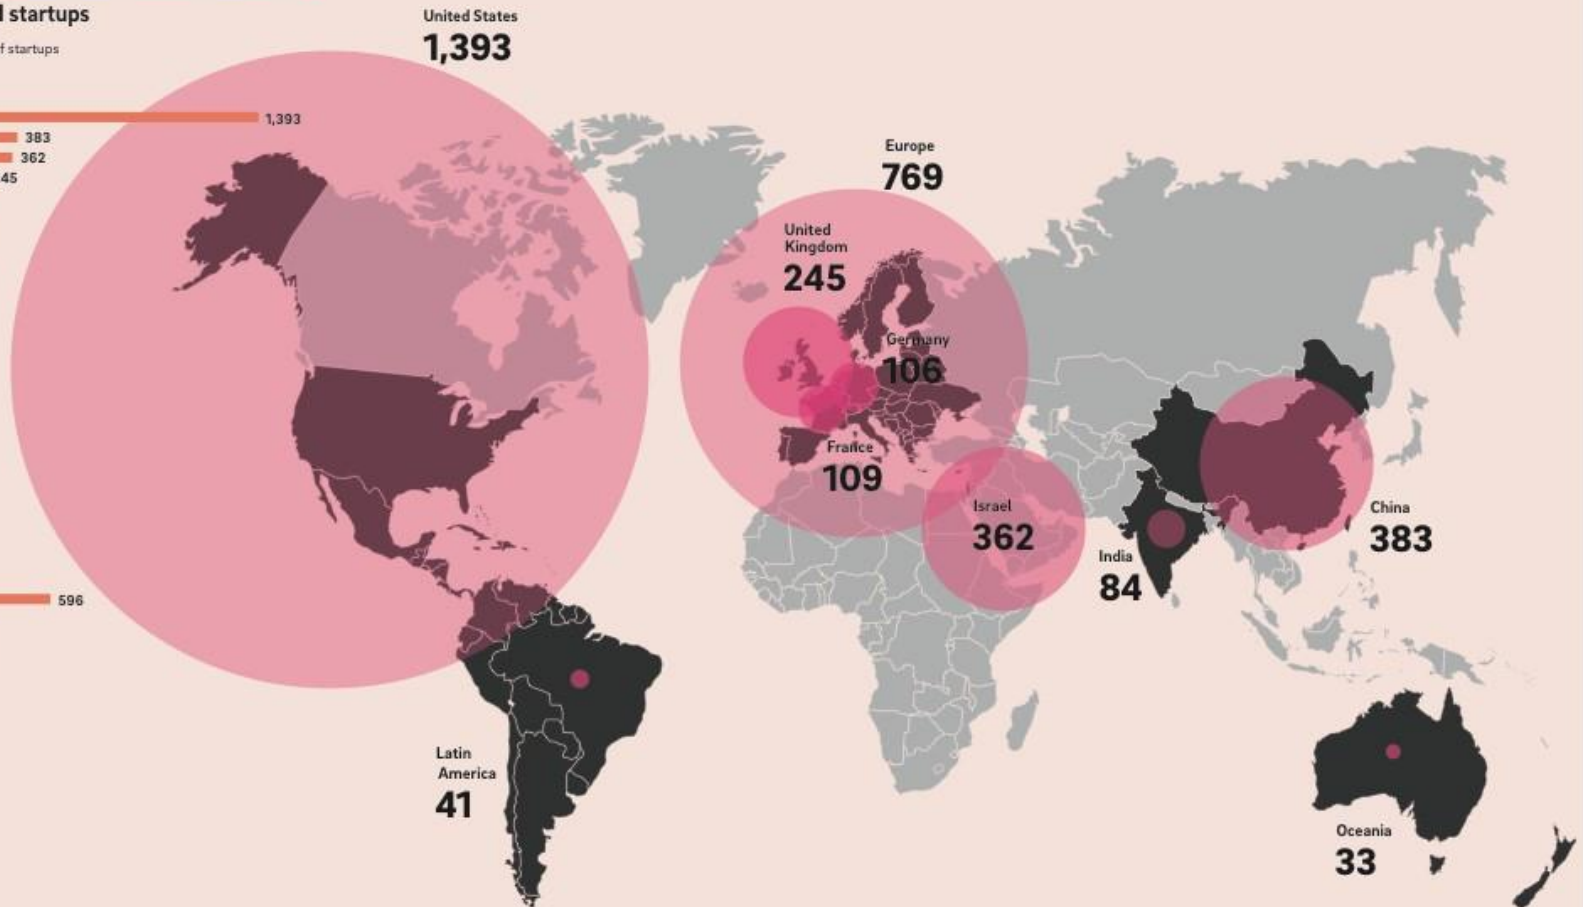

#### Top regional hubs

Cities' extended urban areas<sup>1,2</sup>

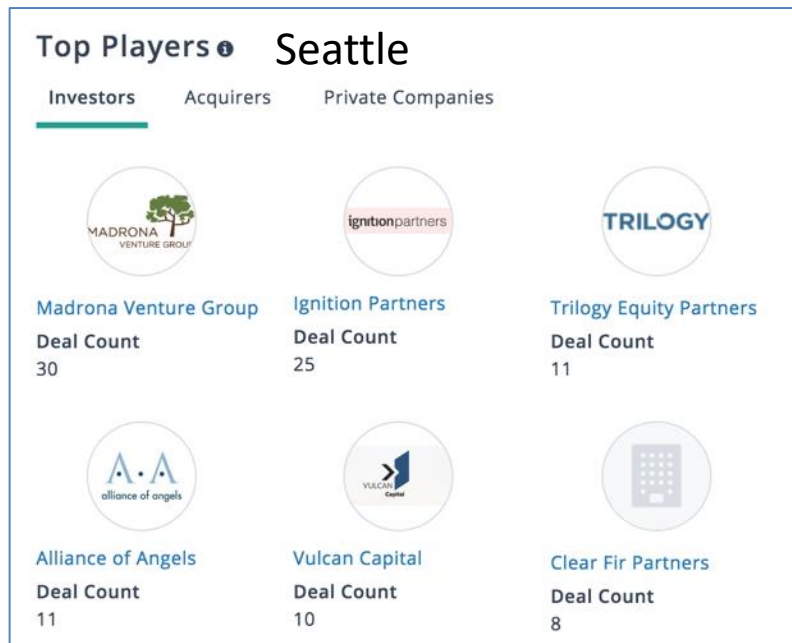

<sup>1</sup> Regional hubs comprise a core city plus its extended urban area and wider agglomeration: e.g. San Francisco plus Bay Area, London plus Oxford & Cambridge et al., Beijing plus Tianjin, Shenzhen plus Guangzhou et al., etc.

<sup>2</sup> Ranking excluding 180 startups for which information on city was not available - Among them, 130 are located in Israel

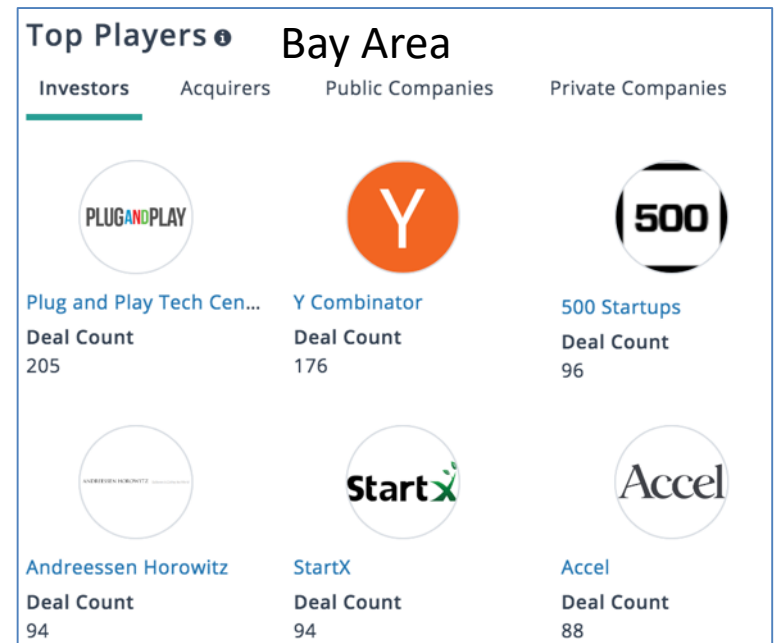

# Why we rank low in AI startups

- Lack of global awareness to attract out of area startups
- Smaller number of investors and deals
- Amazon and Microsoft dominate the local market

VS.

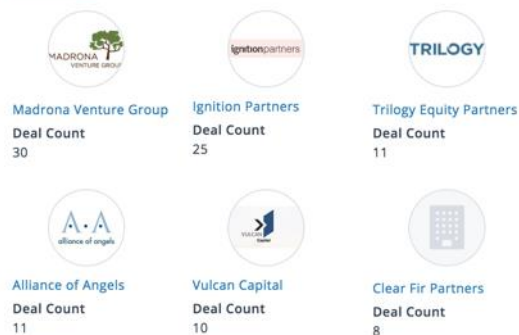

# Seattle versus two regional competitors in AI

# Quick Look at AI startups in Washington

since 2008 (having at least one successful funding round)

- 179 startup companies operated in Washington classifying themselves in a major way as AI/ML
  - Mostly in King County
  - A few in Clark, Pierce, Kitsap, Whatcom, Spokane
  - 96 of the active ones are still HQ'd in Washington
  - 28 previously WA-HQ'd AI startups have been acquired
  - 9 have gone out of business
- Valuation of about \$4B for active startups
- About 6,400 employees

# Beyond Startups, Washington is still an impact state for the AI economy

- Amazon and Microsoft dominate the landscape
- Boeing, Starbucks, Expedia, Concur are category leaders
- Pitchbook, Payscale, EagleView, Icertis are leaders in their niche
- Increasingly an important outpost hub for global companies looking for an AI Dev Center

# Variables in Washington's AI story

- AI workforce for startups is a scramble
- Cost of AI expertise may be out of reach for some key Washington sectors (maritime, forest products, Ag, tourism, public sector, non-profits)
- Rise of consulting firms offering AI services to a sector, such as DNV-GL to maritime
- Industry hiring of AI professors is negatively impacting educational capability

# Where Seattle stacks for the AI job market

# Workforce Development

- UW is heavily committed to AI
  - Computer Science & Engineering
  - iSchool
  - eScience Institute
- Other universities and colleges offer CS degrees with several courses in AI
- Apprenticeship programs in CS, no AI emphasis yet
- The graduation to job vacancies issues

# AI workforce economics

Typical AI specialists, which include newly-graduated Ph.D.s and those with just a few years of experience, can rake in a salary of \$300,000 to \$500,000 a year, according to a recent [New York Times report](#). Salaries are growing so quickly that there have been joking references to the National Football League-style salary cap on AI professionals.

Specifics are still under development, but possible collaborators in the IPZ are noted below. Proposal expected in January.

Department of Commerce

# What Will the AI IPZ Do?

- Build the community notion of an AI cluster
- Promote the Seattle brand for AI
  - Recruiting companies
  - Recruiting workforce
  - Recruiting faculty and students
  - Recruiting capital
- Provide a structure platform for international engagement
- Provide a mechanism to invest in advancing the state as an AI Hub

# Washington Trade and AI

- Japan AI Summit
  - 3 inbound missions per year to Seattle
  - 1 outbound mission per year to Tokyo
- Chilean Ambassador to the US AI briefing (2018)
- Spanish retail delegation (2017)
- Hannover-Messe trade show: shifting from EU's Industrie 4.0 to Seattle's Digital Transformation
