Brief Title: Expanding the practice of optometry.

HB 2212 - DIGEST

Directs the board to establish, by rule, specific guidelines for the prescription and administration of drugs by optometric physicians, so that licensed optometric physicians and persons filling their prescriptions have a clear understanding of which drugs and which dosages or forms are included in the authority granted by this act.

Provides that no optometrist shall prescribe, dispense, or administer a controlled substance for more than seven days in treating a particular patient for a single trauma, episode, or condition.
