

# HOUSE BILL REPORT

## SB 6070

---

**As Reported by House Committee On:**  
Agriculture & Natural Resources

**Title:** An act relating to disposal of dredged riverbed materials from the Mt. St. Helen's eruption.

**Brief Description:** Regarding disposal of dredged riverbed materials.

**Sponsors:** Senator Hatfield.

**Brief History:**

**Committee Activity:**

Agriculture & Natural Resources: 3/17/09, 3/26/09 [DPA].

**Brief Summary of Bill  
(As Amended by House)**

- Reinstates until December 31, 2017, a provision that creates authority to remove dredge materials resulting from the eruption of Mount St. Helens from state-owned aquatic lands without compensating the Department of Natural Resources (DNR) for the value of the materials.
- Requires the DNR to provide a summation of funds that would have accrued to the state if landowners were required to compensate the DNR for the materials.

---

### HOUSE COMMITTEE ON AGRICULTURE & NATURAL RESOURCES

**Majority Report:** Do pass as amended. Signed by 12 members: Representatives Blake, Chair; Jacks, Vice Chair; Chandler, Ranking Minority Member; Smith, Assistant Ranking Minority Member; Grant-Herriot, Kretz, Liias, McCoy, Nelson, Ormsby, Pearson and Warnick.

**Minority Report:** Do not pass. Signed by 1 member: Representative Van De Wege.

**Staff:** Jason Callahan (786-7117)

**Background:**

---

*This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.*

### Aquatic Lands.

The Washington state Constitution declares that the beds and shores of all navigable waters in Washington are owned by the state. The Legislature subsequently designated the Department of Natural Resources (DNR) as the steward of these lands. The DNR acts as a proprietor, subject to legislative direction, of all state-owned aquatic lands and holds these lands in trust for all current and future residents of the state.

The Legislature has also vested specific authority for the DNR to sell valuable resources from state lands. The DNR sells a variety of resources from state lands, including timber, stone, gravel, and geoducks. When a valuable material is removed from state-owned aquatic lands, the proceeds of the sale are split evenly between the DNR's aquatic lands program and the Aquatic Lands Enhancement Account.

### Mount St. Helens.

The 1980 eruption of Mount St. Helens caused a significant amount of material to enter several of Washington's navigable rivers systems. These rivers were subsequently dredged, and much of the dredge spoil was deposited on the public and private land adjacent to the riparian areas.

Between 1980 and 1995, dredge spoils could be removed without paying the DNR for the value of the materials from the shores of the Toutle River, the Coweeman River, and the section of the Cowlitz River from two miles above its confluence with Toutle River to its mouth. This authorization expired on December 31, 1995.

---

### **Summary of Amended Bill:**

The authority to remove dredge materials resulting from the eruption of Mount St. Helens from state-owned aquatic lands without compensating the DNR for the value of the materials is reinstated until December 31, 2017. The geographic area from where materials can be removed remains the same as the original time period: the shores of the Toutle River, the Coweeman River, and the section of the Cowlitz River from two miles above its confluence with Toutle River to its mouth.

The permission to remove materials without compensating the DNR is limited to properties not already used for the collection and resale of the materials. Prior to removing and selling the materials, the landowner must notify the DNR as to how much of what type of material is being removed. The DNR must provide a biennial report to the Legislature that provides a summation of funds that would have accrued to the state if landowners were required to compensate the DNR for the materials.

### **Amended Bill Compared to Original Bill:**

The original bill proposed to reinstate until December 31, 2035, the authority to remove dredge materials resulting from the eruption of Mount St. Helens from state-owned aquatic lands without compensating the DNR for the value of the materials.

---

**Appropriation:** None.

**Fiscal Note:** Available.

**Effective Date of Amended Bill:** The bill takes effect 90 days after adjournment of the session in which the bill is passed.

**Staff Summary of Public Testimony:**

(In support) Problems surfaced early on during the recovery from the Mount St. Helens eruption with private landowners expressing a disinterest in using their lands for storing materials dredged out of the area rivers. Landowners were persuaded into accepting the dredge materials once the state allowed them to use the materials without paying a royalty.

(With concerns) The DNR has proprietary management authority over all state-owned aquatic lands. Removing the authority for the DNR to charge royalties for these materials means that there will be less money available to manage aquatic resources. Currently, there are no restrictions against using the dredge materials. Payments to the state are required only if the materials are sold for profit.

(Opposed) None.

**Persons Testifying:** (In support) Ken Stone, Cowlitz County.

(With concerns) Rich Doenges, Department of Natural Resources.

**Persons Signed In To Testify But Not Testifying:** None.
