

RCW 28A.655.250 Graduation pathway options. (1)(a) Beginning with the class of 2020, except as provided in RCW 28A.230.320, graduation from a public high school and the earning of a high school diploma must include the following:

(i) Satisfying the graduation requirements established by the state board of education under RCW 28A.230.090 and any graduation requirements established by the applicable public high school or school district;

(ii) Satisfying credit requirements for graduation;

(iii) Demonstrating career and college readiness through completion of the high school and beyond plan as required by RCW 28A.230.090; and

(iv) Meeting the requirements of at least one graduation pathway option established in this section. The pathway options established in this section are intended to provide a student with multiple pathways to graduating with a meaningful high school diploma that are tailored to the goals of the student. A student may choose to pursue one or more of the pathway options under (b) of this subsection, but any pathway option used by a student to demonstrate career and college readiness must be in alignment with the student's high school and beyond plan.

(b) The following graduation pathway options may be used to demonstrate career and college readiness in accordance with (a)(iv) of this subsection:

(i) Meet or exceed the graduation standard established by the state board of education under RCW 28A.305.130 on the statewide high school assessments in English language arts and mathematics as provided for under RCW 28A.655.070;

(ii) Complete and qualify for college credit in dual credit courses in English language arts and mathematics. For the purposes of this subsection, "dual credit course" means a course in which a student qualifies for college and high school credit in English language arts or mathematics upon successfully completing the course;

(iii) Earn high school credit in a high school transition course in English language arts and mathematics, an example of which includes a bridge to college course. For the purposes of this subsection (1)(b)(iii), "high school transition course" means an English language arts or mathematics course offered in high school where successful completion by a high school student ensures the student college-level placement at participating institutions of higher education as defined in RCW 28B.10.016. High school transition courses must satisfy core or elective credit graduation requirements established by the state board of education. A student's successful completion of a high school transition course does not entitle the student to be admitted to an institution of higher education as defined in RCW 28B.10.016;

(iv) Earn high school credit, with a C+ grade, or receiving a three or higher on the AP exam, or equivalent, in AP, international baccalaureate, or Cambridge international courses in English language arts and mathematics; or receiving a four or higher on international baccalaureate exams. For English language arts, successfully completing any of the following courses meets the standard: AP English language and composition literature, macroeconomics, microeconomics, psychology, United States history, world history, United States government and politics, or comparative government and politics; or any of the international baccalaureate individuals and societies courses. For mathematics, successfully completing any of the following courses meets the standard: AP statistics, computer science, computer

science principles, or calculus; or any of the international baccalaureate mathematics courses;

(v) Meet or exceed the scores established by the state board of education for the mathematics portion and the reading, English, or writing portion of the SAT or ACT;

(vi) Meet any combination of at least one English language arts option and at least one mathematics option established in (b) (i) through (v) of this subsection (1);

(vii) Meet standard in the armed services vocational aptitude battery; and

(viii) Complete a sequence of career and technical education courses that are relevant to a student's postsecondary pathway, including those leading to workforce entry, state or nationally approved apprenticeships, or postsecondary education, and that meet either: The curriculum requirements of core plus programs for aerospace, maritime, health care, information technology, or construction and manufacturing; or the minimum criteria identified in RCW 28A.700.030. Nothing in this subsection (1) (b) (viii) requires a student to enroll in a preparatory course that is approved under RCW 28A.700.030 for the purposes of demonstrating career and college readiness under this section.

(2) While the legislature encourages school districts to make all pathway options established in this section available to their high school students, and to expand their pathway options until that goal is met, school districts have discretion in determining which pathway options under this section they will offer to students.

(3) The state board of education shall adopt rules to implement the graduation pathway options established in this section. [2021 c 7 § 3; 2019 c 252 § 201.]

Finding—Intent—Effective date—2021 c 7: See notes following RCW 28A.230.320.

Intent—2019 c 252: "The legislature intends to continue providing students with the opportunity to access a challenging learning environment and a meaningful diploma that supports every student in achieving his or her individualized career and college goals.

In an ongoing effort to create an educational system focused on individualized student learning that is culturally responsive to the needs of our diverse student population, the legislature must provide a system that allows each student to work with his or her teachers, parents or guardians, and counselors to identify the best ways to demonstrate appropriate readiness in furtherance of the student's career and college goals.

The legislature further recognizes that student-focused graduation pathways must be adaptable and allow students to change pathways as their goals shift. While standardized tests may be a graduation pathway option chosen by some to demonstrate career and college readiness, students should have other rigorous and meaningful pathway options to select from when demonstrating their proficiencies. The legislature, therefore, intends to create a system of multiple graduation pathway options that enable students to support their individual goals for high school and beyond." [2019 c 252 § 101.]
