RCW 47.60.815  Design-build ferries—Cost-benefit analysis—
Engineer's estimate—Subsequent request for proposals, when required.
(1) The Washington state institute for public policy must conduct a
cost-benefit analysis of the state's ferry vessel procurement
practices. This analysis must (a) compare in-state construction to
construction at shipyards across the United States, (b) identify
barriers to receiving three or more in-state bids to a request for
proposals, and (c) recommend policies to encourage three or more in-
state bidders to respond to a request for proposals. This analysis
must be provided to the governor, the transportation committees of the
legislature, and the department by December 1, 2016.

(2) In developing its engineer's estimate to procure a ferry
vessel, the department must identify significant project cost drivers,
including materials, labor, overhead, delivery, and profit.

(3) After July 1, 2017, if all responses to the initial request
for proposals under RCW 47.60.814 are greater than five percent above
the department's engineer's estimate for the project, the department
must reject all proposals and issue a subsequent request for proposal
that is not subject to RCW 47.60.814(1)(r). [2015 3rd sp.s. c 14 §
5.]

Effective date—2015 3rd sp.s. c 14: See note following RCW
47.60.005.
