**RCW 90.54.800 Policy guidelines.** Future development of hydropower and protection of river-related resources shall be guided by policies and programs which:

1. Create opportunities for balanced development of cost-effective and environmentally sound hydropower projects by a range of development interests;
2. Protect significant values associated with the state's rivers, including fish and wildlife populations and habitats, water quality and quantity, unique physical and botanical features, archeological sites, and scenic and recreational resources;
3. Protect the interests of the citizens of the state regarding river-related economic development, municipal water supply, supply of electric energy, flood control, recreational opportunity, and environmental integrity;
4. Fully utilize the state's authority in the federal hydropower licensing process. [1989 c 159 § 3.]

**Legislative findings—1989 c 159:** "The legislature finds that the task force on hydroelectric development and resource protection has recommended that:

1. The state adopt goals to direct future development of hydropower and protection of river-related resources;
2. The state take steps to enhance the existing hydropower permit review process; and
3. The state develop, in concert with appropriate interests, a comprehensive state hydropower plan." [1989 c 159 § 1.]

**Hydro task force—1989 c 159:** "(1) The Washington state energy office shall contract with an independent facilitator to reconvene and coordinate the task force assembled to implement section 301, chapter 7, Laws of 1987 1st ex. sess. The task force shall prepare by March 31, 1991, a state comprehensive hydropower plan to serve the broad public interest regarding development of cost-effective electricity and conservation of river-related environmental values. Task force meetings shall be open to the public. The facilitator shall assist the task force in appropriate efforts to inform the general public regarding project concepts and progress. Task force members shall make appropriate efforts to inform the interest groups they represent.

2. By December 15, 1989, the task force shall engage in a midpoint review whereby participants can jointly appraise the progress of the project. If, in the opinion of the participants, a consensus to continue as a task force cannot be achieved, the executive agencies shall use their existing statutory authority to develop a plan, with the assistance of all affected parties and participating agencies, building upon the work that has been done by the task force.

3. If the task force continues beyond December 15, 1989, it shall by July 1, 1990, recommend to the legislature a lead agency for implementation and management of the state comprehensive hydropower plan." [1989 c 159 § 2.]

**Plan content—1989 c 159:** "(1) At a minimum, the plan shall designate two categories of resource agreement areas: (a) Sensitive areas where hydropower development is likely to conflict with significant environmental values, and (b) less sensitive areas where development will not conflict with or may enhance environmental values. Some areas may remain unclassified due to lack of information
or if they fall between the two categories. The plan shall integrate
resource agreement area findings with existing state laws and programs
including instream flow basin plans prepared by the department of
ecology, watershed planning coordinated by the department of
fisheries, watershed planning coordinated through the Puget Sound
water quality authority, watershed planning for municipal water
supply, the scenic rivers program administered by the parks and
recreation commission, and the planning process developed through the
joint select committee on water resources policy and any actions
resulting from that process.

(2) At a minimum, the final plan report shall:
(a) List applicable laws, rules, and policies;
(b) Describe the waterways or basins covered by the plan;
(c) Designate the categories of resource agreement area for each
waterway or basin;
(d) Describe, for each waterway where hydropower is to be
affected, the significant resources that cause the waterway or basin
to be so designated;
(e) Identify goals, objectives, and recommendations for
improving, developing, or conserving affected waterways;
(f) Describe how the plan is to be integrated with other planning
activities and policy initiatives and how the plan will be implemented
and amended;
(g) Assess the anticipated effect of the plan on hydropower
development and resource protection; and
(h) Describe the plan development process." [1989 c 159 § 4.]
