## Executive Summary

The Office of Superintendent of Public Instruction (OSPI) received data on 96 percent of elementary students in grades K–4 for the 2017–18 school year. Over 34.4 percent of students in reporting districts are reading below grade level.

The major partners in the work to measure K–4 reading levels are:

- English Language Arts (ELA) office at OSPI
- Learning Assistance Program (LAP) at OSPI
- Assessment and Student Information division at OSPI
- Regional Literacy Coordinators (RLC) who represent the Association of Educational Service Districts (AESD)

Over the past year, these partners have presented at state, regional, district, and school professional learning experiences.

These professional learning opportunities have focused on:

- The importance of using the [English Language Arts Menu of Best Practices and Strategies](#) (ELA Menu) for evidence- and researched-based best practices.
- Understanding and using implementation science.
- Elevating ELA Fellows knowledge of assessment literacy.
- Deepening the understanding of change management.
- Enhancing educators' understanding of the foundational skills for literacy development.
- Using strong instructional practices through a multi-tiered system of supports.

## Background

In 2013, the Legislature passed Senate Bill 5946, which set forth a vision for improving educational support systems for every student in grades K–12.

School districts, schools, and educators were informed of the legislative requirements through professional development opportunities at regional educational service districts (ESDs), state conferences, personal phone calls, emails to district offices, and formal correspondence from the Office of Superintendent of Public Instruction (OSPI).

### Strengthening Student Educational Outcomes

The Office of Superintendent of Public Instruction and the Association of Educational Service Districts (AESD) implemented Part I of Senate Bill 5946 (2013)—Learning to Read, Reading to Learn—during the 2014–15 school year. This legislation focuses on the importance of

collaborative partnerships essential to supporting students: using evidence- and research-based programs for all students, especially in grades K–4, and providing statewide models to support school districts in implementing a multi-tiered system of supports. The legislation also highlighted the importance of research-based family involvement and engagement strategies.

Revised Code of Washington (RCW) [28A.320.202](#) now requires school districts to be responsible for providing a comprehensive system of instruction and services in reading and early literacy that must include annual use of screening assessments to determine the reading levels and support instruction for students in grades K–4.

In addition to supporting students, Part 1 of ESSB 5946 (2013) identified how essential professional learning is for educators to enhance and expand their instructional practices and understanding of early literacy development ([RCW 28A.415.400](#)).

In 2016, the Legislature passed House Bill 1345. This legislation provided a statewide definition of ‘professional learning’ in order to advance student outcomes.

## **Identification and Reporting of Students Reading Below Grade Level**

Washington state schools and school districts are required to identify students’ reading levels according to the evidence-based state and district selected assessments.

School districts must annually report to OSPI ([RCW 28A.320.203](#)):

1. The number of students in grades K–4 who are reading below grade level, and
2. The intensive reading strategies and/or interventions being provided to improve the reading skills of these students.

The information must be disaggregated by groups of students.

To collect the required data, OSPI developed the K–4 Literacy Report, accessible through the Education Data System (EDS) portal. Users identified students reading below grade level from a comprehensive list of disaggregated student groups who were continuously enrolled in the same school during the 2017–18 school year.

Ninety-six percent (284 of 295) Washington school districts reported the reading levels of their K–4 students (see Table 1 and Table 2).

## Update Status

**Table 1: 2017–18 K–4 Students Identified as Reading Below Grade Level by Grade Band**

Grade Band	Total K–4 Continuous State Enrollment	K–4 Enrollment for Reported Districts	# of Students Identified as Reading Below Grade Level	% of Students Identified as Reading Below Grade Level	% Not Meeting Standard on SBA ELA Statewide (Level 3 or 4)
<b>Kindergarten</b>	76,845	72,239	23,274	32.2	--
<b>1st</b>	79,425	74,209	25,964	35.0	--
<b>2nd</b>	79,828	74,890	25,013	33.4	--
<b>3rd</b>	82,639	77,648	27,059	34.8	41.3
<b>4th</b>	84,331	79,224	28,725	36.3	41.5

## Conclusion and Next Steps

The data reported by schools are one measure of students' literacy development in Washington. The data are intended to be an initiator of conversation at the local and state levels.

For the 2018–19 school year, the Office of Superintendent of Public Instruction will support school districts by doing the following:

- Upon request, support districts in reviewing their literacy plans and assist in the selection of aligned literacy curriculum and assessments using evidence-based rubrics.
- Disseminate and provide professional learning on the English Language Arts Menu of Best Practices and Pathways to Early Literacy publication.
- Continue to provide and support professional learning for educators and administrators.
- Support districts with their Every Student Succeeds Act alignment and school improvement plans.
- Encourage discussions around the use of multiple measures including the use of formative, classroom, and interim assessments to ensure a student's progress is monitored in a variety of arenas.
- Collaborate with the Association of Educational Service Districts.

# APPENDICES

**Table 1: Number of Schools Offering Extended Learning Time Services 2017–18**

Extended Learning Time Service	Number of Schools Offering Service	Percent of Reported Schools Offering Service
Before/after school instruction	893	70.4%
Book programs	505	39.8%
Computer-based or online instruction	799	63.0%
Homework Club	378	29.8%
Saturday programs	18	1.4%
Structured summer programs	819	64.6%
