EXECUTIVE SUMMARY

The 2023 Washington State Legislature mandated that the Department of Social and Health Services (DSHS) produce a report twice a year, beginning July 1, 2023, to track maintenance of effort and participation rates for the Temporary Assistance for Needy Families (TANF) program.¹ This report is provided to the Office of Financial Management, appropriate policy and fiscal committees of the legislature, and the Legislative-Executive WorkFirst Poverty Reduction Oversight Task Force (LEWPRO).

STATUTORY REQUIREMENT

[Chapter 376, Laws of 2024](#) Section 205(1)(h) requires this report to include the following:

- An overview of federal rules related to maintenance of effort, excess maintenance of effort, participation rates for TANF, and the child care development fund as it pertains to maintenance of effort and participation rates
- Countable maintenance of effort and excess maintenance of effort, by source, provided for the previous federal fiscal year
- Countable maintenance of effort and excess maintenance of effort, by source, for the current fiscal year, including changes in countable maintenance of effort from the previous year
- The status of reportable federal participation rate requirements, including any impact of excess maintenance of effort on participation targets
- Potential new sources of maintenance of effort and progress to obtain additional maintenance of effort
- A two-year projection for meeting federal block grant and contingency fund² maintenance of effort, participation targets, and future reportable federal participation rate requirements
- Proposed and enacted federal law changes affecting maintenance of effort or the participation rate, what impact these changes have on Washington's TANF program, and the department's plan to comply with these changes.

OVERVIEW OF FEDERAL RULES

When Congress created the TANF program through the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, states were required to meet “maintenance of effort” (MOE) and federal Work Participation Rate (WPR) requirements to receive the full federal TANF block grant and avoid penalties. Additionally, congress passed changes to TANF (June 2023), via the Fiscal Responsibility Act (FRA). While this legislation does not alter what qualifies as MOE, the amount of MOE will be impacted by two aspects:

- The recalibration of the caseload reduction credit; and

¹ This report has been in existence since July 1, 2016, and was formerly required quarterly. In 2023, the report frequency was changed to twice a year: due on January 2nd and July 1st of each year.

² Contingency funds for state welfare programs are additional federal funds available to states, at their request, when unfavorable economic conditions exist. They are considered provisional payments, according to section 403(b) (3) (A) of the Social Security Act. Unfavorable economic conditions are determined based on calculations using a state's unemployment rate, or calculations using a state's SNAP caseload.

- A required minimum benefit payment threshold of \$35 for programs like Washington’s Working Families Support (WFS) program, which the WFS benefit level does not currently meet. This threshold must be met if our state wants to continue to count these families’ efforts towards WPR.

On the heels of the FRA, in October 2023, the federal Administration for Children and Families (ACF) published a [proposed rule](#) for TANF, which ~~if approved as currently written~~ could [have](#) negatively impacted MOE in Washington state. ~~As of December 2024, ACF has not yet published the final rule.~~ [The rule was officially withdrawn, effective January 14, 2025.](#)

The last section of this report includes relevant changes passed in the FRA as well as analyses of [how the proposed rule \(now withdrawn\) may have impacted Washington state](#)~~the proposed rule~~. Prior to the FRA ~~and the proposed rule~~, the most recent and substantial changes to federal TANF requirements passed almost two decades ago in 2005 as part of the Deficit Reduction Act.

Maintenance of Effort

Federal regulations applying to state MOE requirements are outlined in [45 CFR 263.1 through 263.9](#). States must generally spend at least 80% of the general fund state amount spent on Aid to Families with Dependent Children related programs in FFY 1994. This may be reduced to 75% if the state met its WPR targets for the year prior. Since ACF does not announce WPR results for any given period until years later, all our planning uses the higher 80% threshold of \$272,964,476.

Excess Maintenance of Effort

Federal regulations outlined in [45 CFR 260.20](#) and [45 CFR 263.2](#) allow states to count funds expended in addition to the amount spent in direct support of the TANF and WorkFirst program as MOE. Referred to as “third-party” spending, this may include spending by:

- Other state agencies (e.g. Office of the Superintendent of Public Instruction)
- Local governments
- Private and non-profit charitable organizations

To be eligible as excess MOE, this third party spending must be directed toward a TANF-eligible population and advance one of the primary purposes of the TANF program:

- Providing assistance to needy families so that children may be cared for in their own homes or in the homes of relatives
- Ending dependence of needy parents on government benefits by promoting job preparation, work, and marriage
- Preventing and reducing the incidence of out of wedlock pregnancies and establishing annual numerical goals for preventing and reducing these pregnancies
- Encouraging the formation and maintenance of two parent families

TANF Participation Rates

WPR requirements are outlined in [45 CFR 261.20 through 261.25](#). States must meet both the All Family (50%) and Two-Parent (90%) participation targets to avoid penalties.

The All Family WPR is calculated by dividing the total number of TANF families with a work-eligible individual who has successfully met the requirements outlined in [45 CFR 261.31](#) (numerator = X), by the total number of TANF families subject to work requirements (Y), minus certain families in sanction for refusal to participate (a) or eligible for the 12-month infant exemption or other allowable exemptions (b) [denominator = Y – (a+b)]. A visual representation of this equation is as follows:

X = All families with a work-eligible individual who are satisfying work requirements

Y = All families with a work-eligible individual (those who are satisfying work requirements as well as those not meeting work requirements) minus those sanctioned or exempt.

$$\text{All Family WPR} = X/Y$$

A family is considered engaged in work for the purposes of the All Family WPR if a work-eligible individual participates in a work activity at least 30 hours per week³, provided the following conditions are met:

- At least 20 hours per week must involve participation in one or a combination of the following ‘core’ activities:
 - Unsubsidized employment
 - Subsidized private-sector employment
 - Work experience
 - On-the-job training
 - Job search or job readiness assistance
 - Community service programs
 - Vocational education training
 - Providing childcare services for the child of an individual participating in a community service program
- The remaining 10 hours per week (‘non-core’) may involve the above noted activities or the following:
 - Job skills training directly related to employment
 - Education directly related to employment
 - Satisfactory attendance at high school or a high school equivalency program

The Two-Parent WPR is calculated by dividing the total number of TANF families with two work-eligible parents who successfully met the requirements outlined in [45 CFR 261.32](#) by the number of TANF households that have two work eligible parents, minus certain families in sanction for refusal to participate. Two-Parent households are not eligible for the federal Infant exemption exclusion mentioned above.

A family with two work-eligible parents counts as engaged in work activities for the purposes of the Two-Parent WPR if the parents in the family are participating in work activities for a combined average of at least 35 hours per week⁴ and the following conditions are met:

- At least 30 hours per week must involve participation in one or a combination of the following ‘core’ activities:

³ Single parents with a child under age six in the household are only required to engage in 20 hours of ‘core’ activities per week.

⁴ Washington state funds child care for two-parent households.

- Unsubsidized employment
 - Subsidized private-sector employment
 - Work experience
 - On-the-job training
 - Job search or job readiness assistance
 - Community service programs
 - Vocational education training
 - Providing child care services for an individual participating in a community service program.
- The remaining five hours per week ('non-core') may involve the above noted activities or the following:
 - Job skills training directly related to employment
 - Education directly related to employment
 - Satisfactory attendance at high school or a high school equivalency program

Calculating Work Participation Rate

In general, states must maintain a minimum All Family WPR of 50% ([45 CFR 261.31](#)) and a Two-Parent WPR of 90% ([45 CFR 261.32](#)). However, actual WPR targets that the state must meet vary based upon multiple factors.

The caseload reduction credit detailed in [45 CFR 261.40 through 261.44](#) and amended by the FRA, allows states to reduce their target WPRs based on the number of percentage points by which the size of the state's caseload has fallen since 2005 for reasons other than changes in eligibility rules. Health and Human Services (HHS) calculates the state's caseload reduction credit for each year by comparing the average monthly number of families receiving assistance funded by federal TANF or state MOE funds of the prior FFY with the state's average monthly caseload in 2005. For example, if the state's 2011 average caseload is 10% less than its 2005 average monthly caseload, the state would receive 10 percentage points of caseload credit toward its WPR for 2012, lowering the rate it must meet for All Families from 50% to 40% ([CBPP, Changes in TANF Work Requirements, 2013](#)). States may not include caseload reductions associated with changes in federal law or changes the state made to its eligibility criteria compared to the criteria used prior to 2005. Effective in FFY 2026 per FRA, the caseload reduction credit base year will be recalibrated to 2015.

[45 CFR 261.43](#) also permits states to further reduce its target requirements if it is investing state and third-party MOE in excess of grant and contingency fund matching requirements ("excess MOE" discussed above). The number of cases with assistance-related expenditures from excess MOE may be subtracted from the total caseload for the FFY.

For example, if \$45,000,000 is determined to be excess MOE from assistance-related expenditures, and the average expenditure per case is \$4,500, the current FFY caseload can be reduced by $\$45,000,000 / \$4,500 = 10,000$ cases. This reduction provides what is termed the "adjusted caseload," which is used during caseload comparisons when calculating the caseload reduction credit referenced above.

Below is a formula that further explains the caseload reduction credit formula:

- Step 1: Total MOE - Total Required MOE = Excess MOE
- Step 2: Excess MOE Assistance Cases / Expenditure Per Case = Cases Funded by Excess MOE

- Step 3: Actual FFY Caseload – Assistance Cases Funded by Excess MOE = Adjusted Final Caseload
- Step 4: Adjusted Final Caseload is compared to FFY 2005 to determine percent of caseload decrease = Caseload Reduction Credit

Child Care Development Fund

The following child care subsidy expenditures may be counted as TANF MOE, per [45 CFR 263.3](#):

- State funds used to meet the requirements of the Child Care Development Fund (CCDF) up to the amount the state must expend for quality CCDF matching funds. These dollars can be double-counted as both CCDF match and TANF MOE.
- Other child care expenditures that have not been used as matching funds or MOE for any other federal child care.

MOE Penalties

Consequences for failure to meet MOE requirements outlined in [45 CFR 263.8](#) include a dollar-for-dollar reduction in the TANF block grant the subsequent year, and the requirement to expend additional state funds equal to the amount the state fell short.

Lingering Effects of the COVID-19 Pandemic on WPR

The reported WPR began to drop off in April 2020. This decline is reflected in the achieved WPR for FFY 2021, 2022 and 2023 and was the result of effects of the COVID-19 pandemic and subsequent policy changes Washington state made to support families during the public health crisis. Even though the economic impacts of the pandemic have begun to ease and work requirements have resumed, reported WPR has yet to reach pre-pandemic levels. Since summer 2023, both reported WPRs appear to have leveled off.

Rates have not returned to pre-pandemic norms for a number of reasons, including:

- Current caseload level paired with current DSHS staffing levels, resulting in case managers with larger caseloads having less time to engage clients in activities.
- More families facing destabilizing barriers such as homelessness and substance abuse disorder, which impacts their ability to engage initially in work or work activities.
- The large influx of immigrants who were initially not eligible to engage in work or certain work activities due to their federal immigration status, particularly for our two-parent families.

Note: Recently, some of these newly arrived immigrant families became eligible to engage in work activities, and thus we expect this WPR impact to be short-term.

COUNTABLE MOE AND EXCESS MOE, BY SOURCE FOR PREVIOUS FFY (2023)

Washington state successfully met its WPR for FFY 2022. For FFY 2023, its requirement was:

FFY 1994 expenditures \$341,205,595⁵ x 0.75 = \$255,904,196 required for FFY 2023

FFY 2023 MOE EXPENDITURES

Source	2023
DSHS – Budgets	\$122,285,562
Working Connections Child Care	\$33,211,579
Department of Labor and Industries – Medical Assistance Fund	\$93,992,281
Office of Public School Instruction – Learning Assistance Program	\$249,905,872

STATUS OF REPORTABLE FEDERAL WORK PARTICIPATION RATE⁷

*Supplemental State Programs

*Supplemental State Programs

⁷ Includes impact of excess MOE and caseload reduction on participation target. Sources: EMAPS and TARDIS

MOE: PROGRESS AND NEW SOURCES

In 2023, DSHS reestablished Northwest Harvest Food Bank’s MOE partnership. Through collaborating with the Department of Revenue, DSHS has also secured the Working Families Tax Credit (WFTC), as a new state MOE expenditure. In addition, beginning in 2024, DSHS will begin counting state funds that support the pass-through of child support payments to TANF families (if disregarded from the family’s income when determining continued benefit levels)⁸ as another new source of MOE.

Currently, the state share of child support pass-through is a relatively small amount, around \$2 million per year, but this will likely increase in the future due to passage of [Engrossed Substitute House Bill 1652](#) (Chapter 174, Laws 2024). ESHB 1652 passes-through all current child support to TANF families and will not count it as income for the purposes of TANF, effective January 1, 2026.

The State Auditor’s Office reviewed and found no exceptions with the FFY 2022 MOE process between DSHS and external partners, and found DSHS in compliance with federal MOE guidelines. DSHS submitted the ACF-204 report (FFY 2023) to its federal grantor in December 2023. The Auditor’s Office is currently reviewing the FFY 2023 MOE reporting process.

⁸ This is practice which DSHS has been doing since Feb. 2021, pursuant to [Second Substitute Senate Bill 5144 \(Chapter 349, Laws of 2020\)](#).

PROPOSED AND ENACTED FEDERAL CHANGES AFFECTING MOE AND WPR

Federal Law Changes

In 2023, Congress passed the [Fiscal Responsibility Act](#) (FRA), making several changes to TANF that impact the caseload reduction credit including the recalibration of the base year from 2005 to 2015. This credit allows a state to reduce its required WPR target. The greater the drop in caseload between the base year and the current fiscal year, the higher the credit and the lower the WPR targets. It is a disadvantage for Washington state that the base year was recalibrated to 2015, as the caseload was considerably higher in 2005 when compared to 2015. This will make it more challenging for Washington to meet the federal WPR.

Once ACF publishes the proposed federal rule detailing the changes to the caseload reduction credit, DSHS will be able to more fully evaluate the program impact of the change. [The new rule is projected to be published in late 2024.](#) FRA changes impacting WPR go into effect on October 1, 2025.

~~DSHS finds that if current mitigation strategies are continued and/or bolstered, clients should not see a significant change to services or engagement practices and the state should be able to continue to meet federal WPR requirements. It would, however, require additional state budget investment in the TANF program to increase the Working Families Support benefit payment level from \$40 to \$35 per month.~~

Proposed Federal Rule Changes

~~As discussed above,~~ in October 2023, ACF issued a federal Notice of Proposed Rulemaking - Regulation Identifier Number [0970-AC97](#). This proposed rule would [have:](#)

- ~~• Amended~~ allowable MOE uses for TANF, ~~which will further~~ negatively impacting Washington's ability to meet federal WPR requirements based on current practice.
- ~~• If this draft rule is finalized as is, it would limit~~ state flexibility in spending federal TANF and claiming state MOE funds to a narrower population and band of program areas.
- ~~• It also would entirely eliminate~~ third party non-governmental MOE sources, ~~ending which would end~~ DSHS's MOE partnerships with Second Harvest of Inland Northwest and Northwest Harvest.

Washington provided formal feedback to ACF, suggesting [additional clarity and ways in which it could amend the rule to be clearer and allow](#) more flexibility for states. [The rule was officially withdrawn, effective January 1, 2025. At this time, the earliest the rule could go into effect would be FFY 2026, or October 1, 2025.](#)

Commented [AM1]: I believe this proposed rule has since been withdrawn. Given that this report will be published following the withdrawal, should a statement about the withdrawal be added?

Commented [MK2R1]: Agree, made some adjustments throughout the report.

DSHS finds that if current mitigation strategies are continued and/or bolstered, clients should not see a significant change to services or engagement practices and the state should be able to continue to meet federal WPR requirements, despite changes tied to the FRA. It would, however, require additional state budget investment in the TANF program to increase the Working Families Support benefit payment level from \$10 to \$35 per month.

Considering the potential changes in the draft rule and the FRA adjustments to TANF, if Washington wants to continue to provide flexible case management that focuses on finding meaningful work activities and training for clients, the state at a minimum will need to make the Working Families Support program a more robust benefit for families—increasing it from \$10 to \$35, effective in the next Biennial Budget (2025–2027).
