TABLE 1. Department of Commerce Behavioral Health Capital Grant Facility Funding from the 2013-2015 Biennium to the 2021-23 Biennium	5

David Mancuso, PhD
Senior Research Scientist, DSHS Research and Data Analysis Division
RDA Report Number 3.57

Executive Summary

ENGROSSED SUBSTITUTE SENATE BILL 5187, passed by the 68th Washington State Legislature on April 23, 2023, directed the Health Care Authority (HCA) to contract with the Department of Social and Health Services (DSHS) to develop methods to track behavioral health community capacity through the community behavioral health Executive Management Information System (EMIS) reporting system, and to provide annual reports monitoring implementation of new behavioral health community capacity. This report has been prepared to meet the associated annual reporting requirement and was produced by the DSHS Research and Data Analysis Division (RDA) in collaboration with HCA, the Department of Commerce (Commerce), and the Department of Health (DOH).

Summary of Activities

- Commerce provided RDA with comprehensive grantee data spanning the required reporting period.
- A data sharing agreement was established between DOH and DSHS providing RDA with historical and ongoing licensing data required for utilization reporting.
- Initial linkage of Commerce grantee data to (a) a one-time DOH licensing data extract for currently licensed facilities and (b) ProviderOne claims and encounter data was completed.

Reporting of required non-utilization grantee information is provided in this report.

Reporting Limitations

The data sharing agreement between DOH and RDA providing historical and ongoing licensing data required for reporting could not be established in time to include utilization information in this report. A proof of concept was completed using a one-time extract for currently licensed facilities. This effort identified the following limitations that will constrain future reporting:

- In circumstances where a facility has additional service capacity not supported by Commerce capital grant funding, it is not possible to directly allocate service utilization to Commerce funding. In these circumstances, we expect to allocate observed bed-day utilization up to the level of “committed beds” identified in Commerce grantee data.
- Identifying when Commerce grant-funded bed capacity became operational could not be inferred with certainty for facilities with previously established licensed capacity. In these cases, we expect to infer the implementation of grant-funded bed capacity based on facility utilization patterns in the period following grant award.

All but three facilities receiving funding in the 2013-15, 2015-17, and 2017-19 biennia were linked to a subsequently active DOH license. Many facilities receiving funding in more recent biennia are still in development. Data has been shared with Commerce to assist project monitoring.

Next Steps

- Integrate historical DOH facility licensing data into the utilization measurement process.
- Incorporate bed-day utilization data into the HCA Community Behavioral Health Executive Management Information System (EMIS) report.
- Integrate grantee data for 2023-25 and future biennia as it becomes available.

BUDGET PROVISO LANGUAGE

Sec. 215. FOR THE STATE HEALTH CARE AUTHORITY—COMMUNITY BEHAVIORAL HEALTH PROGRAM

(87)(a) \$2,266,000 of the general fund—state appropriation for fiscal year 2024, \$14,151,000 of the general fund—state appropriation for fiscal year 2025, and \$19,269,000 of the general fund—federal appropriation are provided solely for services to Medicaid and state funded clients in behavioral health residential treatment facilities that are scheduled to open during the 2023-2025 fiscal biennium.

(b) Within the amounts provided in this subsection, \$125,000 of the general fund—state appropriation for fiscal year 2024 and \$125,000 of the general fund—state appropriation for fiscal year 2025 are provided solely for the authority to reimburse the department of social and health services for staffing costs related to tracking behavioral health community capacity through the community behavioral health executive management information system and providing annual reports on the implementation of new behavioral health community capacity.

(c) The department of commerce, the department of health, and the authority must cooperate with the department of social and health services in collecting and providing the data necessary to incorporate tracking of behavioral health beds into the behavioral health executive management information system and to prepare the required reports. The agencies must work to ensure they are using consistent definitions in classifying behavioral health bed types for the purpose of reporting capacity and utilization.

(d) The authority and the department of social and health services must begin tracking behavioral health bed utilization for Medicaid and state funded clients by type of bed in the executive management information system by October 1, 2023. The department of commerce shall identify to the department of social and health services all providers that have received funding through their capital grant program since the 2013-2015 fiscal biennium. The department of social and health services must incorporate tracking of services by provider including an element to identify providers that have received funding through the capital budget so that reports can be provided related to the average daily client counts for Medicaid and state funded clients being served by provider and by facility type.

(e) By November 1, 2023, the department of social and health services, in coordination with the department of commerce, the department of health, and the authority, must submit an annual report to the office of financial management and the appropriate committees of the legislature. The first annual report must provide information on the facilities that received funding through the department of commerce's behavioral health community capacity grant funding since the 2013-2015 fiscal biennium and the utilization across all behavioral health facilities for Medicaid and state funded clients. The report must provide the following information for each facility that has received funding through the capital budget: (i) The amount received by the state and the total project cost; (ii) the facility address; (iii) the number of new beds or additional bed capacity by the service type being provided; and (iv) the utilization of the additional beds by Medicaid or state funded clients by service type.

(f) By November 1, 2024, the department of social and health services must submit the second annual report to the office of financial management and the appropriate committees of the legislature. The second annual report must update the bed capacity and utilization information required in the first report and compare that capacity to demand by service type by geographical region of the state.

Scope and Purpose

ENGROSSED SUBSTITUTE SENATE BILL 5187, passed by the 68th Washington State Legislature on April 23, 2023, directed the Health Care Authority (HCA) to contract with the Department of Social and Health Services (DSHS) to develop methods to track behavioral health community capacity through community behavioral health Executive Management Information System (EMIS) monthly reporting, and to provide annual reports monitoring the implementation of new behavioral health community capacity. This report has been prepared to meet the associated annual reporting requirement, and was produced by the DSHS Research and Data Analysis Division (RDA) in collaboration with HCA, the Department of Commerce (Commerce), and the Department of Health (DOH).

ESSB 5187 requires reporting on facilities that received funding through the Department of Commerce's behavioral health community capacity grant program since the 2013-2015 biennium, including (i) the amount received from the state and the total project cost; (ii) the facility address; (iii) the number of new beds or additional bed capacity by the service type being provided; and (iv) the utilization of the additional beds by Medicaid- or state-funded clients by service type. A data sharing agreement with DOH providing RDA with historical and ongoing licensing data required for reporting could not be established in time to include utilization information in this report. A proof of concept was completed to support future utilization reporting based on a one-time extract of data for currently licensed facilities.

Data Linkages and Scope of Reporting

Required reporting relies on data linkages between:

- Community facilities receiving funding through the Commerce Behavioral Health Facilities Program since the 2013-2015 Biennium;
- DOH behavioral health facility licensing data; and
- Data from the ProviderOne and Behavioral Health Data Systems maintained by HCA.

Commerce staff provided a historical file of behavioral health community capacity grant funding since the 2013-2015 fiscal biennium. DOH provided a one-time extract of data for currently licensed facilities. Federal Tax Identifiers, facility addresses, and grantee/agency names were used to link Commerce Behavioral Health Facilities Program funding data and DOH behavioral health facility licensing data. The ProviderOne system includes a crosswalk between Federal Tax Identifiers and billing provider National Provider Identifier (NPI) values that enabled attribution of utilization at facilities associated with Commerce capital grant funding, with the limitations noted below.

Based on the proviso language, reporting requirements were understood to be limited to behavioral health facilities associated with bed capacity. As such, outpatient behavioral health services and long-term care facilities (e.g., dementia care facilities and enhanced services facilities) were assessed to be out of scope.

Table 1 below includes, for each community behavioral health facility receiving funding through the capital budget since the 2013-15 Biennium, the following required information:

1. The amount received by the grantee and the total project cost,
2. The facility address, and
3. The number of new beds or additional bed capacity by the service type being provided.

Facilities that could be linked to a subsequently active DOH license are bolded in the table. All but three facilities receiving funding in the 2013-15, 2015-17, and 2017-19 biennia were linked to a subsequently active DOH license. Many facilities receiving funding in more recent biennia are still in development. Data has been shared with Commerce to assist project monitoring.

The proof-of-concept effort identified the following limitations that will constrain future reporting of service utilization associated with facilities receiving capital grant funding:

- In circumstances where a facility has additional service capacity not supported by Commerce capital grant funding, it is not possible to directly allocate service utilization to Commerce funding. In these circumstances, we expect to allocate observed bed-day utilization up to the level of “committed beds” identified in Commerce grantee data.
- Identifying when Commerce grant-funded bed capacity became operational could not be inferred with certainty for facilities with previously established licensed capacity. In these cases, we expect to infer the implementation of grant-funded bed capacity based on facility utilization patterns in the period following grant award.

Next Steps

Bed-day utilization at grant-funded facilities is being incorporated into the HCA Community Behavioral Health EMIS report. Data linkage and utilization measurement processes will require continuous updating as new capital grants are awarded and previously funded facilities become operational.

TABLE 1.

Department of Commerce Behavioral Health Facilities Program Funding from the 2013-2015 Biennium to the 2021-23 Biennium

Bold font indicates facility could be linked to a subsequently active DOH license as of October 2023
