SENT VIA EMAIL

Director David Schumacher Office of Financial Management

Representative Jake Fey, Chair House Transportation Committee Senator Marko Liias, Chair Senate Transportation Committee

Dear Director Schumacher, Senator Liias, and Representative Fey:

This letter transmits to you the quarterly project delivery status reports for the eighth quarter of the 2019-21 biennium and the first quarter of the 2021-23 biennium, as required in Section 313 of Chapter 333, Laws of 2021 (Substitute Senate Bill No. 5165). A copy of the Section 313 is attached. In both documents, the first report provides status on scope, schedule, and budget through the quarters ending June 2021 and September 2021 for all capital projects. This report includes new projects added using programmatic funding provided by the Legislature. Not included in the report are public transportation projects funded through the department's operating program or projects being constructed for Sound Transit under a reimbursable agreement. Brief explanations for variances have been provided according to the following:

- Cost: An estimated cost increase or decrease greater than \$500,000 of the project's total cost or 2019-21 or 2021-23 appropriation.
- Schedule: A milestone delay that extends the project in excess of one quarter.
- Scope: A proposed change in the nature of the work included in the project that deviates from the legislative intent of the project.

This report aligns with the LEAP Transportation Document 2021-2 ALL PROJECTS as developed April 23, 2021. This project list does not reflect the reductions of certain appropriations the legislature included in the 2020 supplemental budget that were based on an assumption of under expenditures at the program level.

The second report is a list of projects charging to the environmental mitigation reserve (OBI4ENV) funded by the 2003 Nickel, 2005 Transportation Partnership, and 2015 Connecting Washington Accounts. The format for these reports was designed to provide the information as directed in the proviso and was developed in cooperation with staff from the Office of Financial Management and Legislative transportation committees.

Director Schumacher, Senator Liias, and Representative Fey December 14, 2021

Jay Alexander, Director Capital Program Development and Management Division

WASHINGTON LAWS, 2021 Ch. 333

NEW SECTION. Sec. 313. QUARTERLY REPORTING REQUIREMENTS FOR CAPITAL PROGRAM

On a quarterly basis, the department of transportation shall provide to the office of financial management and the legislative transportation committees a report for all capital projects, except for ferry projects subject to the reporting requirements established in section 309 of this act, that must include:

- (1) A TEIS version containing actual capital expenditures for all projects consistent with the structure of the most recently enacted budget;
- (2) Anticipated cost savings, cost increases, reappropriations, and schedule adjustments for all projects consistent with the structure of the most recently enacted budget;
- (3) The award amount, the engineer's estimate, and the number of bidders for all active projects consistent with the structure of the most recently enacted budget; and
- (4) Risk reserves and contingency amounts for all projects consistent with the structure of the most recently enacted budget.

The I-4DS corridor program Master Plan approved in 2002 includes a new half interchange south of Northeast 4th Street in Bellevue to improve access to/from the south. Amazon's recent announcement of its expansion to Bellevue has spurred a new wave of developments in and around the proposed project area. This has created a pressing need for the City to identify a preferred alternative location and configuration to provide greater certainty to support and guide future development. Believue is funding the I-dOS South Downtown Access Study (Study) and has partnered/hired WSDOT to assist the city in this effort. WSDOT's contribution in reviewing the engineering and cost estimates supports the Study, ensuring the preferred alternative is consistent with the I-

RW expenditure delay due to COVID-19 pandemic related directives. In response to potential revenue impacts from the pandemic, the Governor ordered a suspension of all new consultant contracts and task orders beginning in April 2020. OFM created a process where agencies could request that OFM review specific contracts and be provided an exemption to allow the contract to move forward. In response to this, WSDDT convened an Assistant Secretary Review Board to review exemption requests put forward by projects and determine if the project is contial to WSDDT's mission and if WSDDT should formally request exemption from OFM. If the project/contract was not deemed to be critical, the ASRB did not move the request forward. For projects that did receive exemption approval, there are delays associated

11	300504A	I-5/Tacoma HOV Improvements (Nickel/TPA)	154,215,000	148,169,264	(6,045,736)	1,478,546,000	1,347,949,000	(130,597,000)		3/28/2005		10/15/2023		155,410,996	7/23/2018	159,875,295	3	x		Reduced to reflect projected savings due to favorable bids. 19-21 expenditures are updated due to the design-builder recently submitting an innovative staging plan that makes up for slower than expected construction progess due to COVID-19. 1) It is not uncommon on Design-Build projects to receive better bids than anticipated because the Design-Builder's proposal provides an innovative solution for staging and/or design efficiencies. That was the case with the MOV Connectors Project (3005664). The Design-Builder came up with a very
																				INOV connectors Project (300506A). Ine Design-Builder came up with a very innovative solution for staging and developed some design innovations as a part of their proposal which were different than WSDOT's conceptual plan. In addition, the WSDOT project team used a conservative Engineer's Estimate. When the project was advertised, there were a number of other projects underway and some that were out for bids at the same time. The project team anticipated that due to the large number of competing projects, bids would come in high. That was not the case as each of the three proposers provided WSDOT with competitive bids for the HOV Connectors project. 2) The savings on this project were released and were not shifted to other nomierts.

11	G200098	1-5/Columbia River Bridge	35,000,000	15,401,000	(19,599,000)	35,000,000	44,000,000	9,000,000											x	Additional \$9M is local/ODOT contribution. Biennial variance is an expenditure delay from 19-21 due to the need for additional time to finalize program office establishment, continue planning work, and start the draft EIS effort. The Interstate Bridge Replacement (IBR) program is currently advancing on schedule. DODT and WSDOT executed an intergovernmental agreement that established the IBR program office as directed by Governors Brown and Insidee in November of 2019. The IBR program office consists of a Program Administrator, staff from ODOT and WSDOT and support from a General Engineering Consultant. Hiring a program administrator and selecting a GEC took a little longer than initially scheduled while the program is moving forward on schedule. The IBR program team has delivered several milestones that were outlined in ESHBI160, including re-engaging the program stakeholders, submittal of progress reports in 2019 and 2020 and submittal of a conceptual finance plan on December 1, 2020. The IBR program team is currently in the process of working with the community, program partners and recently formed advisory groups to re-evaluate the purpose and need and make progress towards advancing the NEPA process for the program.
I1	11000022	Lake Washington Congestion Management	287,000	287,000		86,931,000	86,931,000			6/15/2009		12/29/2011						х		
I1	L1000098	SR 520/124th St Interchange (Design and Right of Way)	19,800,000	4,830,000	(14,970,000)	40,900,000	40,900,000			10/10/2022		1/20/2026							х	Expenditure delay is due to a revised project schedule. This project is currently not funded for CN phase, so a slower start will mitigate the design and environmental documentation becoming obsolete to soon.
I1	L1000099	I-5/Slater Road Interchange - Improvements	2,000,000	1,320,000	(680,000)	20,969,000	20,969,000			10/10/2022		10/5/2024							х	This delay is mainly due to the current COVID-19 pandemic; the Governor has issued directive 20-05 to freeze hiring, personal service contracts, and equipment purchases. This caused delays in completing the environmental documentation.
11	L1000110	I-405/NE 132nd Interchange - Totem Lake	56,376,000	10,650,000	(45,726,000)	83,000,000	83,000,000			1/15/2021	3	12/15/2023							х	The original schedule for the 1-405, Northeast 132nd Street Interchange Project (132nd Project) included \$37M for construction in the 2019-21 biennium. In spring 2019, WSD0T determined there could be contractual efficiencies by combining the 132nd Project with the 1-405, Northeast 85th Street Interchange Project (85th Project). When these project scopes were combined, the aging was adjusted to better match the delivery schedule for the 85th Project, moving construction to the 2021-23 biennium. The projects have since been separated while the Sound Transit Board of Directors realigns its Sound Transit (ST3) program to meet the reduction in revenue due to COVID-19. The 132nd Ad date was February 12, 2021 with an anticipated award in summer 2021.

11	11000111	I-5/179th St Interchange	67,000	67,000		50,500,000	50,500,000			5/26/2026		10/1/2028							x	Though the project was several years out, it was recognized at a very high level that the Preliminary Engineering (PE), Right of Way (RW) and Construction (CN) phases could not be completed within one biennium. At that time, a rough schedule was created based on experience with this type of project and limited knowledge of the existing conditions. It was assumed the project would start PE early in the 23-25 biennium and it would take approximately 3 years to get to advertisement. The PE phase includes time for community engagement to identify the affected project area footprint which allows the environmental analysis to begin so environmental documentation and permitting could be completed. Right of Way needs would be identified and appraisals completed so once environmental documentation was complete RW acquisition could take place. It was estimated the project would be advertised for CN in 2026. Construction was assumed to take two seasons to complete which provided an Operationally Complete (OC) date in Fall 2028. The funds were aged in CPMs according to this rough schedule in July 2015 as shown below. 21DOTOO1 picked up this aging for the first time in October 2020. (Note: In 2018, the legislature provided an additional \$5000 KMVA funds to start early coordination efforts and scoping to determine how this project ties in with future Clark County projects in the area.)
11	L1000113	I-90/SR 18 Interchange Improvements	73,821,000	11,797,000	(62,024,000)	150,527,000	210,527,000	60,000,000		9/8/2020		10/30/2023							х	Increase is due to additional fish passage structures identified within the project limits that must be addressed as part of the project, as well as additional storm water retrofit requirements. The 19-21 expenditure delay is mainly due to the current COVID-19 pandemic and increased storm water retrofit requirements; the Governor has issued directive 20-05 to freeze hiring, personal service contracts, and equipment purchases. This caused delays in completing the environmental documentation and has delayed the advertisement date.
12	L1000114	SR S31/43rd Ave NE to 67th Ave NE - Corridor Improvements	4,898,000	1,102,000	(3,796,000)	39,300,000	39,310,000	10,000		10/10/2022		1/15/2025							X	Adding local funds to the project per reimbursable agreement with Snohmish County Public Works. These funds are Traffic Impact Mitigation funds collected for roadway improvements in Snohmish County. To date, no agreement is made with this developer in regard to mitigation. The \$10,000 local funds shown is not from this large development. It is funds collected by Snohmish County from smaller developers in the area. Increased project coordination is required due to required time for Federal Awaiton Administration (FAA) and Burlington Northern Santa Fe (BNSF) review and design approval, additional work for utility relocation, and additional wetland impacts be mitigated in the Quil Ceda watershed instead of using a mitigation bank. In addition, due to the current COVID-19 pandemic; the Governor has issued directive 20-05 to freeze hiring, personal service contracts, and equipment purchases. All of this has caused delays in completing the environmental documentation.
I1	L1000120	SR 18 Eastbound Off-Ramp	14,196,000	425,000	(13,771,000)	15,000,000	15,000,000			10/7/2019		10/15/2020							х	This Non-State lead project is experiancing delays due to the current COVID- 19 pandemic; which has delayed tribal coordination and selecting a preferred

Ad and OC dates have been further delayed due to the start of geotechnical work being delayed. Total increase is \$1M local contribution. The \$1M local funds (place holder) is for water line relocation cost for the city of Bellevue and additional work that city of Redmond wants added to the project.
I1	L1100110	I-5/Marvin Road/SR 510 Interchange	44,489,000	17,547,000	(26,942,000)	72,268,000	72,268,000			4/9/2018		12/30/2020		32,593,625	9/6/2018	25,935,935	9		х	Anticipated practical design savings are moved to "Future". Upon final
																				closure of the project any savings will be transferred to the futures account.
11	L2000057	SR 26/Dusty to Colfax - Add Climbing Lanes	11,150,000	1,653,541	(9,496,459)	11,150,000	11,150,000			3/10/2025		11/14/2025							х	Expenditure delay from 19-21 due to a delayed RW acquisition schedule. The real estate negotiations for all parcels are active. However, several of the property owners have requested full appraisals. This has delayed the right of way phase.
I1		US 195/Colfax to Spangle - Add Passing Lane	845,000	845,000		11,650,000	11,650,000			4/24/2017		11/29/2018		4,073,203	10/2/2017	4,073,200	5	Х		
I1	L2000061	SR 28/SR 285, North Wenatchee Area Improvements	1,300,000	897,116	(402,884)	23,000,000	23,017,300	17,300		5/30/2023		12/20/2026							x	These are developer funds that will be contributing to the funding of the design phase. This is not an increase to the IAP fund source as the funds are being furnished by a developer through a reimbursable agreement. Expenditure delay from 19-21 to 21-23 biennium is due to additional time needed for stakeholder engagement.
I1	L2000094	I-90/Medical Lake & Geiger Interchanges	23,928,000	16,121,000	(7,807,000)	27,285,000	27,285,000			3/25/2019	(7)	11/30/2020	22	6,735,342	12/10/2020	4,983,653	3		х	Expenditure delay from 19-21, primarily due to the change from a one to a two construction season deliwery assumption. Additionally, there are delays associated with the 1976 pause. Project total reduction is Anticipated project savings. A 2018 1-90 Operations Study recommended a speed limit reduction to 60 MPH and installation of ramp meters at select locations. These operational changes eliminated the need to rebuild the interchange ramps previously part of the project scope.
I1		I-5/Mill Plain Boulevard				97,700,000	97,700,000			2/17/2026		10/8/2028								
11	L2000102	SR 14/I-205 to SE 164th Ave - Auxiliary Lanes	19,631,000	2,230,000	(17,401,000)	25,000,000	25,400,000	400,000		6/15/2020	15	7/26/2022	16						x	Expenditure delay from 19-21 due to multiple reasons: additional time needed for community engagement on noise mitigation, additional time needed for time needed to acquire environmental permits and ROW, and COVID-19 delays. This project's total cost has increased by \$400K from \$25,000,000 to \$25,400,000. This increase is due to long term environmental mitigation needs. The initial Construction phase schedule and cost estimate did not account for the long-term environmental mitigation needs. During design, the Regional Landscape Architect performed a project review and identified that this project needs 5 years of environmental establishment work. This includes environmental mitigation, planting area maintenance and establishment, weed control and removal, planting, traffic control, bark mulch, seeding, trees, shrubs, emergent or wildflowers (Forb Plugs) and irrigation system management. This has extended the expenditures into future biennia.
I1		SR 162 Study/Design	86,000		(86,000)	396,000		(396,000)											х	Completed.
11	L2000118	SR 539/Guide Meridian				40,000,000	40,000,000			1/20/2026		12/31/2027								(The original legislative expenditure plan / schedule is not realistic. The legislative schedule assumed beginning and completing the design, R/W acquisition, and starting the construction phase all in one biennium and all funds were programmed in two biennia. This is a large mobility project. Our proposed delivery schedule is based on 12 months for a pre-design phase to complete the Basis of Design (80D) and getting design approval, followed by 18 months for final design and Right-of-Way acquisition. We can then advertise for bids. Construction will take about two years and another 6 months for project dose out. The total time is expected to be about 5 years.
I1	L2000119	I-5/Northbound on-ramp at Bakerview	8,616,000	6,736,648	(1,879,352)	9,915,000	10,974,384	1,059,384		10/12/2020		10/15/2021		3,691,665	12/15/2020	2,585,000	4		Х	Increase is due to an updated ROW estimate based on the most recent appraisals. The expenditure delay from 19-21 is due to additional time needed for ROW acquisition due to a parcel going through the condemnation process and the I-976 pause.

																				home order, WSDOT directed a temporary construction suspension on most
																				projects throughout the state. This caused construction delays in the project's
																				delivery. A large portion of the cost for this contract is the noise walls which
																				were to be installed in 2020, per the contractor's schedule. The contractor
																				requested a suspension due to weather conditions during the winter months of 2019/2020 and 2020/2021 resulting in less spending for that time period.
																				of 2013/2020 and 2020/2021 resulting in less spending for that time period.
11	L2000202	SR 240/Richland Corridor Improvements	5,000,000	2,219,705		5,000,000	5,000,000			10/14/2019		5/28/2021)	In response to the current COVID-19 pandemic, the Governor has issued
		,																		directive 20-05 to freeze hiring, personal service contracts, and equipment
																				purchases. This has caused delivery delays due to workforce constraints and
																				project prioritization. In addition, the project requires a noise study that will
																				require additional time to complete and is staging construction for the
11	L2000204	I-5/North Lewis County Interchange	 	1		50,500,000	50,500,000			2/20/2029		11/30/2030						-		Duportail Rd intersection. Though the project was several years out, it was recognized at a very high
11	L2000204	1-5/ North Lewis County Interchange				30,300,000	30,300,000			2/20/2023		11/30/2030							'	level that a different level of biennial spending would be needed to complete
																				the Preliminary Engineering (PE), Right of Way (RW) and Construction (CN)
			1																	phases. At that time, a rough schedule was created based on experience with
			1																	this type of project and our limited knowledge of the existing conditions. It
			1																	was assumed the project would start PE early in the 25-27 biennium and it
																				would take approximately 3 ½ years to get to advertisement. The PE phase
			1																	includes time for community engagement to identify the affected project
			1																	area footprint which allows the environmental analysis to begin so
			1																	environmental documentation and permitting could be completed. Right of Way needs would be identified and appraisals completed so once
			1																	environmental documentation was complete RW acquisition could take
																				place. It was estimated the project would be advertised for CN in early 2029.
			1																	This means a majority of the CN funds wouldn't be spent until the 29-31
			1																	biennium. Construction was assumed to take two seasons to complete which
			1																	provided an Operationally Complete (OC) date in Fall 2030. The funds where
			1																	aged in CPMS according to this rough schedule in July 2015 as shown below.
																				21DOT001 picked up this aging for the first time in October 2020.
			1	1								1		l .	1	1

I1	L2000223	I-5/Rebuild Chamber Way Interchange Improvements	4,628,000	4,509,000	(119,000)	76,100,000	98,686,000	22,586,000		2/14/2017		11/20/2024		10,929,951	5/4/2017	10,930,002	3	x		This increase and delay are mainly due to recently identified additional work for fish barrier that is within the injunction area and additional work to incorporate the south bound auxiliary lanes.
																				During pre-design, the Project Engineer's office performed a project review an identified a fish barrier that Is within the project limits. This fish barrier is located within the injunction area on I-5 at MP 78.11 and crossing I-5 at the SR 6 ramps. In addition, during the project review, the Project Engineer's office identified
																				that the additional South Bound auxiliary lanes will shift the freeway east and impact the two existing North Bound lanes. This further delayed the project and increases the project's construction cost.
I1	L2000229	I-5/NB Marine View Dr to SR 529 – Corridor & Interchange Improvements	50,494,000	13,406,000	(37,088,000)	84,233,000	99,240,000	15,007,000		4/15/2019	12	8/4/2022	4					х		Increase is due to increased market conditions, a community engagement process that resulted in a preferred alternative to build a permanent fourth lane, and additional environmental permitting requirements. The expenditure delay is due to delays with completing environmental documentation and permitting.
																				Local funding increase. The Freight Mobility Strategic Investment Board (FMSIB) contributed local funding for environmental mitigation of impacts to estrian wetlands. In addition, the Tulalip Tribes contributed local funding for the redesign of the I-5 off ramp.
11	L2000234	I-405/SR 522 to I-5 Capacity Improvements	82,991,000	29,187,000	(53,804,000)	605,002,000	640,018,000	35,016,000						30,425	11/30/2020	19,955	2	х		The overall project cost for L2000234 is \$640M; this estimate has not changed. There were favorable bids on the I-405 Bellevue to Lynnwood BIN, resulting in \$339M in Nickel/TPA savings in the 17-19 biennium. In early 2019, WSDOT used the legislative budget authority to use these savings within the corridor by moving the savings to the Renton to Bellevue BIN in 17-19. The 2019 legislative budget moved those funds of RTB and to this project as part of the initial funding of \$640 in the 19-21 biennium. The governor vetoed that expenditure and the funds were moved back to RTB, making the project total \$650M. We have been communicating since that time that there is a need to backfill the additional \$35M in 23-25.
																				The governor's budget moved funding associated with bonded toll revenue out to the 2023-25 biennium. The expenditure delay covers preliminary engineering and right of way required between now, through the 2023-25 biennium. The \$35M is part of the total need (\$640M) to design and construct the project (L2000234).
11	L2000246	SR 104 Realignment for Ferry Traffic	463,000	463,000		500,000	500,000			11/5/2018	(2)	6/28/2019						х		
I1 I1	L2000255 L2000259	I-5/Exit 274 Interchange Replacement Bridge on Interstate 5 across the Columbia River	482,000	482,000		550,000 179,000	1,550,000	1,000,000 (179,000)										X	_	Shift of funds from the Y program. Completed.
I1	L2000280	SR 241/Sunnyside Vicinity Improvements	1,500,000		(1,500,000)	1,500,000	500,000	(1,000,000)										х		The city of Sunnyside is the lead on this project. The \$1M of local funds was removed from the proposed budget to only show WSDOT's \$500k contribution to this city lead project. No reduction to WSDOT's portion of the project is anticipated. The city is currently working on refining the scope and establishing the proposed project schedule.
11	M00100R	I-S JBLM Corridor Improvements	197,055,000	165,103,000	(31,952,000)	494,400,000	494,400,000			11/21/2016		6/20/2025		249,269,601	5/17/2018	180,895,595	3	х		establishing the proposed project schedule. A requested exemption to the consultant hiring freeze was not approved and required certain project elements to be delayed.
																				In response to potential revenue impacts from the pandemic, the Governor ordered a suspension of all new consultant contracts and task orders beginning in April 2020. OPM created a process where agencies could request that OPM review specific contracts and be provided an exemption to allow the contract to move forward. In response to this, WSDOT convened an Assistant Secretary Review Board to review exemption requests put forward by projects and determine if the project is critical to WSDOT's mission and if WSDOT should formally request exemption from OPM. If the project/contract was not deemed to be critical, the ASB did not move the request forward. For projects that did receive exemption approval, there are delays associated with the added time needed.
																				A CEVP was conducted for I-5/Mounts Rd to Steilacoom-Dupont Rd (300504T) in November 2019. Over the period of time that the CEVP results were being defined and updated in CPMs, the project was delayed several months due to the evaluation/decision to implement HOV lanes. This resulted in revising the schedule which adjusted the spending plan.

													0								Comments 19-21 Q8 ⁽³⁾ and (4)
SubProg	BIN	Project Title	19-21 20CONF ⁽¹⁾	19-21 Plan LEGFIN	19-21 Difference	Total 20CONF ⁽¹⁾	Total Plan LEGFIN	Total Difference	Amount Reserved for Risk ⁽²⁾	Advertisement 20CONF	Advertisement Variance (months)	Operationally Complete 20CONF	Operationally Complete Variance (months)	Engineers Estimate	Award Date	Award Amount	No. of Bidders	Completed	In Progress	Future	
11	M00400R	SR S20 Seattle Corridor Improvements - West End	422,615,000	356,467,000	(66,148,000)	1,643,315,000	1,643,315,000			2/28/2018		4/1/2027		389,859,195	10/24/2018	455,349,888	3		х		Expenditure delay is primarily due to the I-976 pause. The SR 520/I-5 Express Lanes Connection Project was originally scheduled to begin construction in 2020. Following the passage of I-976, WSDOT was directed to pause contract procurement for projects including the SR 520/I-5 Express Lanes Connection Project. This pause, in addition to budget and revenue effects of the ongoing COVID-19 pandemic, have delayed the start of construction into spring/summer 2021, postponing project construction expenditures largely into the 2021-29 biennium. We will continue to review our construction spending and evaluate potential changes to our delivery plans as needed, as the Legislature considers the Governor's proposed 2021 supplement and 2021-2023 biennial transportation budget.
11	M00600R	SR 167/SR 509 Puget Sound Gateway	310,469,000	164,418,785	(146,050,215)	1,953,900,000	2,036,156,000	82,256,000		8/30/2017		6/18/2030		315,825,964	12/11/2020	263,975,895	3		х		Increase is the funding gap identified in the most recently completed CEVP and due to inflation. The expenditure delay is primarily due to the I-976 pause. 19-21 decrease is due to a delay in receiving the King County trail local contribution and a Sound Transit noise wall construction change order that moved work out of the biennium. The 21-23 decrease is due to the SR 167 Stage 18 having a permit delay and also updated the aging model to comply with the recently submitted federal finance plan.
11	M00800R	US 395 North Spokane Corridor	170,445,000	149,007,791	(21,437,209)	879,638,000	880,238,000	600,000		3/26/2018		6/30/2029		9,533,491	1/14/2021	9,493,333	3		х		The \$600K local increase is the BNSF portion of the cost for the hazardous material cleanup on the US 395/NSC DNSF - 2nd Railroad Realignment contract. Expenditure delay is due to the 1-976 pause and a more lengthily environmental permitting process for the selected river crossing structure on the US 395/NSC Spokane River Crossing project. One of the projects was recently awarded and the contractor provided an updated schedule.
I1	M00900R	i-405/Renton to Bellevue - Corridor Widening	470,002,000	220,771,780	(249,230,220)	1,271,420,000	1,326,640,000	55,220,000	26,500,000	12/30/2015		12/28/2028		710,000,000	10/5/2019	704,975,000	3		х		Increase is the funding gap identified in the most current project estimate. Additional funding is needed for newly identified fish barriers and newly identified risk items. The expenditure delay is due to an updated contractor's schedule. Expenditure delay from 19-21 to 21-23 biennium due to updated contractor's spending plan.
11	N00900R	SR 9/Snohomish River Bridge Replacement	5,210,000	4,169,000	(1,041,000)	142,100,000	142,100,000			2/14/2022		11/30/2026	(24)						х		Expenditure delay due to COVID-19 pandemic related directives. OC date advanced 2 years as it was determined that the construction could be completed in 2, rather than 4, construction seasons.
11	N52600R	SR 526 Corridor Improvements	7,557,000	1,941,000	(5,616,000)	47,197,000	47,197,000			1/11/2021	21	11/26/2022	23						х		The expenditure delay is due to project delays associated with adding nearly all of the SR 526 corridor to the project, additional stakeholder engagement to reach a preferred alternative, and mitigation for congestion on 1-5. The Ad and OC delays are mainly due to the current COVID-19 pandemic; the Governor has issued directive 20-05 to freeze hiring, personal service contracts, and equipment purchases.
11	N92040R	SR 9/SR 204 Interchange	34,620,000	11,716,969	(22,903,031)	69,430,000	69,430,000			1/25/2021	12	10/22/2022	12						х		Expenditure delay is due to additional time needed to find in-budget alternatives, which delayed project advertisement. This is a change that has been in the works for a while based on the previous legislative scope change and has only recently been requested in the agency budget request. The project addressed the legislative change in scope to include most of the SR 526 corridor. The project engineering office worked with stakeholders for almost a year to come to agreement on project need and alternatives, and were ready to recommend a preferred alternative when concerns were raised regarding potential impacts the project would have on an already congested I-S. To address these concerns, metering the EB SR 526 to NB I-S on-ramp will be included in the project. Confirming the impact to I-S and identifying mitigation added further delays to the schedule. Advertisement date delayed 1 year due to the time needed to complete Right of Way/Access Hearing, Right of Way Acquisition, and relocation of one business.

11	T20400R T20700SC	I-5 Federal Way - Triangle Vicinity Improvements I-5/116th Street and 88th Street Interchanges - Improvements	11,590,000	2,198,000	(9,392,000)	85,000,000 49,729,000	85,000,000 49,729,000			12/11/2023 9/13/2017		10/30/2026 10/28/2022							x	Expenditure delay is due to aligning with the Tribal-led delivery schedule. In 2019 the Tribe made the request to the Legislature, through WSDOT, to split the remaining funding in BIN T02700SC between the 88th St NE UF (21005S1S) and the SR 528/Marine Drive I/C (1005S1S). This decision delayed the Tribe in issuing the notice to proceed (NTP) to their design consultant. The NTP was issued in October 2019, and per the consultant schedule, the AD Date is 11/21/2022.
11	T20900R	US-12/Walla Walla Corridor Improvements	118,595,000	53,297,740	(65,297,260)	168,807,000	183,208,000	14,401,000		8/19/2019		12/6/2024		108,510,000	4/13/2020	113,995,875	3		x	Increase is the funding gap identified to complete the legislative scope of completing PE and RW for Stage 8. Expenditure delay is due to the 1-976 pause and to to align with the contractor's schedule. Design-Build delivery method. The scope of the original appropriation of \$168.8 million was to fund both the completion of Phase 7 and the design and right of way acquisition for Phase 8. The increased cost of Phase 7 used up most of the original appropriation, but the full amount was not known until the Phase 7 design-build contract was awarded last spring. The \$14.4 million additional appropriation now requested would be to complete the scope associated with the original appropriation - Phase 8 design and right of way. The cost increase for the Phase 7 portion is generally a result of the uncertainty of programming a project out in the future.
I1	T21100R	I-82 Yakima - Union Gap Economic Development Improvements	2,000,000	322,605	(1,677,395)	64,413,000	64,413,000			2/5/2024		11/20/2026							х	Expenditure delay is due to additional time needed to complete the pre- design phase of the project and COVID-19 related impacts.
I1	T30400R	SR 3 Freight Corridor	9,981,000	2,343,000	(7,638,000)	66,910,000	66,910,000			5/23/2022	19	10/24/2024	19						х	The Ad was delayed to Dec. 2023 due to environmental documentation and permitting process. Because of COVID-19, WSDOT was not able to go out in the field to do the work needed for the cultural survey and wetland delineation. This caused a domino effect of pushing back everything else for the project.
11	T32700R	SR 510/Yelm Loop Phase 2	33,606,000	3,082,000	(30,524,000)	58,500,000	58,500,000			11/12/2019	37	6/30/2022	33						х	Expenditure delay is due to additional time needed to satisfy new environmental mitigation requirements necessary to protect endangered pocket gopher. Contract Freeze Exemption request was denied due to inability to accelerate AD date to June 2021. Result is consultant agreement limited to current approved budget. Based on this, design work has been stopped.
I1		SR 518 Des Moines Interchange Improvement	732,000	119,236	(612,764)	13,426,000	12,809,972	(616,028)		4/10/2017	(1)	10/1/2018		9,273,461	6/2/2017	8,230,000	5	х		Anticipated savings is unrealized project risk. 																				Increase is needed for long term evironmental mitigation. If this increase is approved it would then be transferred to to 08H4ENV in the 2022 Supplemental budget request. During construction, the South West region's Landscape Architect reviewed the environmental mitigation and plant establishment for the two permit planting areas. They identified that the initial estimate did not account for the long term success of the site meeting the permit performance standards overall. The permit performance standards require a more intensive work on the front end of the plant establishment period. This work will include maintaining the mitigation site for 10 years per permit requirements.
12	L2000091	SR 432 Longview Grade Crossing	18,203,000	8,088,000	(10,115,000)	85,000,000	85,000,000			5/24/2021	20	10/1/2023	20						x	Expenditure delay is due to additional time needed to coordinate with local stakeholders and agree on a preferred alternative. The cost decreases in 19-21 and 21-23 reflect a more realistic delivery schedule. The project's AD date isdealyed due it taking longer than expected to select a preferred alternative within budget. While WSDOT and the local stakeholders continue to discuss viable options for this area, a preferred alternative has not been selected that improves operations, is agreeable to the stakeholders, and adheres to budgetary constraints. Some of the delay has been due to COVID-19.
12	L2000128	US 395/Safety Corridor Improvements	14,072,000	12,690,802	(1,381,199)	15,000,000	13,618,360	(1,381,640)		2/11/2019		11/27/2019	10	11,888,332	6/13/2019	12,195,889	3	х		Anticipated savings at project completion where scope refinement and community engagement eliminated the need for RW acquisition. The operationally complete date was delayed by 10 months due to the number of working days and to allow time for procurement of the illumination poles, which will require a 2nd CN season to complete. Any savings at project closure will be transferred to the transportation futures account.
12 12		US 101/Lynch Road Intersection Improvements	2,374,000	10,000	(2,364,000)	5,000,000 30,000,000	2,636,000 30,000,000	(2,364,000)		3/18/2019 10/8/2029	(9)	11/19/2019 3/31/2031	(13)	1,399,197	7/13/2018	1,823,870	3	Х	×	Completed. This reduction reflects the transfer to TFF.

																				the final scope of work. In Summer 2019, project stakeholders helped WSDOT identify the project's purpose of reducing various crash types for all modes of transportation. In Fall 2019, WSDOT met with Snohomish County, the impacted cities/towns, and received input from a community town hall meeting to develop a list of 31 potential projects. WSDOT analyzed these improvements and prioritized the improvements within the available budget. In Summer 2020, 16 independent improvements were selected. The selected improvements vary in size and complexity. 4 of these improvements require further coordination with the communities of Monroe, Sultan, Startup, and Gold Bar to assist with placement based on the individual community's needs. We anticipate this coordination occurring in Q2 2021. Because the improvements require 2 years to design and obtain permits, advertisement of this project has been delayed from Fall 2021 until Fall 2022 with construction expected to begin early 2023. In order to realize the safety benefits from these improvements as soon as possible, WSDOT is exploring opportunities to deliver some of the smaller enhancements prior to the 2023 construction season.

																					work and prioritize projects within the corridor. Coordinating R/W issues with the Suquamish Tribe is necessary. The CWA project (N30500R/330528C) is divided into individual safety projects. Specific project information is as follows: SR 305/Johnson Rd – Roundabout (330528D): this project is funded out of the Connecting Washington/SR 305 Safety Corridor project and is being constructed by the City of Poulsbo as part of their improvement project. The contract was awarded in 2020. SR 305/Day Rd – Roundabout (330528E): Environmental Complete has been delayed from Q4 2020 to Q3 2021. Right of Way Completion is delayed from Q1 2021 to Q4 2022. This delay aligns this project with current SR 305 corridor safety project priorities. SR 305/Port Madison, Agatewood Rd, Adas Will Ln – Roundabouts (330528F): Environmental was completed in Q3 2020. Right of Way Completion is delayed from Q4 2020 to Q2 2021. The Ad Date is delayed from Q4 2020 to Q2 2021. The AD Date is delayed from Q4 2020 to Q2 2021. The AD Date is delayed from Q4 2020 to Q2 2021. The AD Date is delayed from Q4 2020 to Q3 2021. SR 305/Suquamish Way – Roundabout (330528G): The PE start has been delayed from Q4 2020 to Q3 2021. Discussions with Suquamish Tribe are taking longer, which is delaying the project. SR 305/Totten Rd – Roundabout (330528H): Environmental Complete has been delayed from Q1 2021 to Q2 2021. In addition, stakeholder input has impacted the design of the roundabout twice, stormwater issues developed
																					during the design process, and this project is on an easement with the tribe, which increases coordination and planning with the tribe.

During design, the project timelines for BNSF reviews have exceeded the timelines laid out in BNSF's Guidelines for Railroad Grade Separation Projects. The initial project schedule assumptions were based upon the Union Pacific Railroad BNSF alimay's Guidelines for Railroad Grade Separation Projects. This project requires additional time to complete multiple reviews by BNSF. Several reviews are required as the railroad bridge and shoofly designs progress.
13	M00500R	I-90 Snoqualmie Pass - Widen to Easton	55,577,000	20,657,107	(34,919,893)	426,400,000	549,248,037	122,848,037	28,200,000	4/6/2020		10/14/2029		372,555	8/6/2020	242,333	5		x		Increase is due to the recently completed CEVP in which the inflation and unit bid item costs were updated to reflect the current market conditions, which had seen a fair amount of escalation since the 2015 initial scoping estimate. The refinement of the project's estimate indicated that the main cost increases for this project's scope is due to structural design and construction on this project. There are two drivers for the schedule adjustment: (1) an updated contractor's schedule and (2) the COVID-19 stay home order and the construction suspension delayed the Geotech's ability to complete needed work for structural anaylsis and design of the project's retaining walls.

P2		SR 290/Spokane River E Trent Br - Replace Bridge	14,405,000	15,239,000	834,000	23,523,000	25,786,000	2,263,000		8/13/2018	15	11/15/2020	23	18,428,247	1/31/2020	20,149,777	4		х	The low bid was 9.34% above the engineer's estimate. The driving factors for that were: The Contract Plans required the Contractor to construct a Work Access bridge next to the existing bridge in order to create a work platform to remove the old bridge, and construct the new one. This bridge came with environmental and hydraulics constraints that would become the Contractor's to manage. The Engineer's Estimate for that Item was \$1.32M, and Contractor bid \$2.73M, for an increase of \$5.14.4M.

		and Rail Rep			(2,22 ,,222)	,,	,_,_,_,_			,-,		_, _, _,			-,-,					spending plan resulted from COVID-19 impacts.
P2	L2000174	SR 241/Mabton Bridge	11,262,000	610,000	(10,652,000)	11,970,000	14,606,000	2,636,000	\$80,000	1/28/2019	34	11/27/2019	46						x	Expenditure delay due to COVID-19 pandemic related directives. Advertisement date delayed another year. The original project estimate was based on only replacing the existing superstructure on Bridge 241/2 over the Yakima River. A more detailed analysis performed during design determined the existing bridge piers and piles on the Slough bridge would not support a new superstructure and a full bridge replacement would be required in order to accommodate legal loads. The \$2.6 million increase is mostly due to the added cost for replacing the entire Slough bridge instead of just the existing superstructure. The cost for repairing Bridge 241/5 over the Yakima River has also contributed to a minor portion of the increase as the required repairs are more complex than previously estimated. The planned advertisement is fall 2021 with completion anticipated in late summer 2023. The schedule has been delayed due to additional time needed to evaluate alternatives for addressing the Yakima River Slough Bridge, complete geotechnical subsurface investigations, and environmental documentation and permitting.

																				WSDOT complete the design and construction of a fish-passable culvert,
																				which is located under the eastern leg of the roundabout, on South Lake
																				Stevens Road. This added work, and other cost increases, increased the local
																				contribution by \$4,845,000 (state funding is capped at \$2,000,000) and
																				lengthened the preliminary engineering duration to allow adequate time to
																				complete the required permits. This change has delayed the construction
																				delivery and impacted the cash flow of the preliminary engineering phase.

																					Environmental Impact Statement that was published in 2018 exceeded the
																					available funding provided by the 2015 Connecting Washington funding
																					package. This was followed by a series of concept revisions in an effort to
																					find a more affordable preferred solution. This effort did significantly reduce
																					the project's cost. However, the updated estimate was still above the
																					available funding. The Local partners, led by the City of Longview, applied
																					for several grants to bridge the funding gap needed, which have not been
																					successful. In addition, the uncertainty of the project funding has delayed
																					the construction delivery schedule.
																					Reappropriation/Re-Aging due to additional time required for project
																					coordination with stakeholders to select a preferred alternative and
																					additional coordination delays due to COVID-19 pandemic.

Notes:

- Represents final legislative TEIS versions (21LEGFIN)
- 2. In addition to risk reserves established to mitigate known risks, each project includes an amount for unknown risk or contingency. This amount may vary, but department guidelines state that it should typically be 4% of the contract amount.
- 3. Explanations are provided for variances greater than \$500,000/biennium or \$500,000/total project cost when compared to the latest legislative final TEIS version.
- 4. Explanations are provided for variances greater than 3 months in Advertisement Date or in Operationally Complete Date when compared to the latest legislative final TEIS version.
- 5. There may be more than one contract associated with a PIN or BIN. Also, the award amount will be different than the construction amount (sales tax, construction engineering, and contingency, etc.). Additionally, a contract may be associated with more than one BIN and the same information will be shown for each BIN.
- 6. Individual contract information in the programmatic BIN is not included in this report.
