## EXECUTIVE SUMMARY

Background As Washington State becomes more diverse, the state's Transitional Bilingual Instruction Program (TBIP) served 8.3 percent of the total state student population for the 2009-10 school year. English language learners (ELLs) are defined by state law as those whose primary language is a language other than English and who have English language skill deficiencies that impair their learning in regular classrooms. As accountability for all students continues to be a paramount focus, the education of students with limited English proficiency and issues related to their educational needs are receiving greater scrutiny.

Results in Brief

The state's Transitional Bilingual Instruction Program provides additional funding to districts for services to ELLs. In the 2009-10 school year, total direct bilingual expenditures were $\$ 88.4$ million, of which $\$ 75.2$ million were from state appropriations. State appropriations had a 5.9 percent increase and total state and local funding represents a 0.4 percent decrease from the 2008-09 school year.

ELLs of school age, who must acquire English in the context of schooling, need to develop full proficiency in all language domains (listening, speaking, reading, and writing) and in all content language to access the curriculum. Language used in school is unique to that context and becomes increasingly complex from one grade level to the next.

Even though research has found that long-term academic performance is more likely to occur when students have significant exposure to instruction in their primary language, only 11 percent of ELLs receive instruction in their primary language because of a shortage of teachers endorsed or certified in bilingual education. For districts that serve ELLs from multiple language groups, instruction in the primary language may not be practicable.

Staffing and Instruction

Most TBIP funding is used for staff salaries and benefits. The 2009-10 school year showed a 2.1 percent increase in FTE teachers and a 7.0 percent increase in FTE instructional aides. The trend continues that districts rely on instructional aides to provide supplemental instruction to ELLs. Instructional support in the student's primary language is typically provided by instructional aides. Because ELLs require specialized instruction, there is a continued need to provide professional development to both teachers and instructional aides to enable them to provide better access to the curriculum.

Students
Served

In the 2009-10 school year, a total of 91,469 ELL students were enrolled statewide; an increase of 1,952 from the previous year. The TBIP funded an average of 84,855 ELL students; a 2.2 percent increase from the
previous year $(82,925)$. During the 2009-10 school year, the pattern of uneven distribution of ELLs that existed in previous years continued to exist among school districts. For example, of the school districts serving ELLs in the 2009-10 school year, 28 districts served populations of 1,000 or more ELLs in Grades K-12.

Languages Spoken

Length of
Participation

A total of 203 different languages were represented in the state Transitional Bilingual Instruction Program in the 2009-10 school year. Spanish was spoken by 67 percent of ELLs; more students than students speaking all other languages combined. Eighteen percent of all ELLs in Washington spoke one of the following seven languages in descending order: Russian, Vietnamese, Somali, Ukrainian, Chinese, Korean, and Tagalog. The number of students speaking Somali, Vietnamese, Chinese and Spanish has increased, while the number speaking Ukrainian, Korean, Russian, and Tagalog declined. In 41 districts, at least 20 different languages were spoken; however, in 59 school districts, Spanish was the dominant language spoken by at least 95 percent of the ELL population.

The Transitional Bilingual Instruction Program is intended to provide temporary support services until ELLs can develop English language skills that will enable them to fully participate in an all English classroom setting. ELLs may be provided this support in the TBIP until they meet the exit criteria established by the state. Approximately 13 percent of the state's ELL students transitioned out of the program in 2009-10, with a median time of 2.8 years.

The Washington Language Proficiency Test (WLPT-II), which measures a student's English language proficiency in reading, writing, listening, and speaking, is annually administered. This assessment is required of all TBIP enrolled students, and the assessment results determine student's continued eligibility or transition from program services.

ELLs are also required to participate in the state's academic assessments. Analysis of the Measurements of Student Progress (MSP), the High School Proficiency Exam (HSPE) and WLPT-II data shows that smaller percentages of ELLs meet the state standard than native English speakers, regardless of the grade or subject matter.

There remains a significant achievement gap between ELLs and the percentage of all Washington's students in terms of the academic performance on the standardized math, science, reading and writing academic assessments. Even ELLs scoring at Level 4 (Transitional) fall behind all students statewide, with lower percentages meeting academic standards of 15 percent in math, 25 percent in science, 17 percent in reading, and 10 percent in writing.

## I. INTRODUCTION

## BACKGROUND

According to estimates from the U.S. Census Bureau's American Community Surveys, Washington State ranks tenth (10th) in diversity in the United States and is among twelve states with the highest English Language Learners (ELLs) student enrollment. State data reported through the Consolidated State Performance Report (CSPR), estimated that 5,318,164 ELLs were enrolled in public schools (pre-K through Grade 12) for the 2007-08 school year. This number represents approximately 10.7 percent of the total public school student enrollment.

Some ELLs are recent arrivals from foreign countries while others are born and raised in the United States. The level of education, family socioeconomic status, and cultural background may vary greatly among this population. Students coming from the same country may speak different languages or dialects, and differences may exist within groups. Thus, generalizations about any group of students may mask background characteristics that are important to understand when designing appropriate curricular and instructional interventions.

For school year 2009-10, the state's Transitional Bilingual Instruction Program (TBIP) enrollment showed a 2.2 percent increase from the previous school year. A concentration of ELLs continues to be found in the urban areas along the Interstate 5 (I-5) corridor and rural areas such as the Yakima Valley. For a geographical distribution of Washington's ELL population see the map inserts on the next page, Figures 1-1 and 1-2.

When students with little or no previous exposure to the English language enter the public school system, they are most often unable to fully benefit from instruction in English and may experience a high risk of academic failure. Challenges occur for both ELLs and the educational system. Issues related to their academic progress, including meeting higher academic standards, are receiving greater scrutiny. Thus, there is a greater urgency to address the educational needs of ELLs.

To address these challenges, the Legislature requested educational research on effective practices for ELLs. The report published on November 1, 2008, What Teachers Should Know About Instruction for English Language Learners: A Report to Washington State, provides educational research findings on effective instructional practices for ELLs. The research identified a series of 14 key principles that teachers of ELLs should know (Figure 1-3). The detailed report can be accessed at http://www.k12.wa.us/MigrantBilingual/pubdocs/NWREL-Report-ELLInstruction-Nov2008.pdf

Figure 1-1. Percent ELLs of Total Enrollments by District (School Year 2009-10)

Figure 1-2. Number of ELLs by District (School Year 2009-10)

Figure 1-3. Key Principles of English Acquisition
These principles are the "big ideas" or concepts from a review of current research about second language acquisition and the academic challenges ELLs face.

Principle 1: ELLs move through different stages as they acquire English proficiency and, at all stages, need comprehensible input.

Principle 2: There is a difference between conversational and academic language; fluency in everyday conversation is not sufficient to ensure access to academic texts and tasks.

Principle 3: ELLs need instruction that will allow them to meet state content standards.

Principle 4: ELLs have background knowledge and home cultures that sometimes differ from the U.S. mainstream.

Principle 5: Assessments measure language proficiency, as well as actual content knowledge.

Principle 6: The same basic approach to learning to read and write applies to ELLs and non-ELLs, but ELLs need additional instructional supports.

Principle 7: Many literacy skills transfer across languages.
Principle 8: Mathematics has its own language and representational system, and ELLs struggle to understand math concepts in this language.

Principle 9: Mathematic word problems are particularly challenging for ELLs.
Principle 10: The density and complexity of social science textbooks and other texts can be particularly challenging for ELLs.

Principle 11: Some ELLs bring background knowledge that differs from what is assumed in textbooks.

Principle 12: Social studies courses require sophisticated and subject specific uses of language.

Principle 13: Science inquiry poses particular linguistic challenges for ELLs.
Principle 14: The norms and practices of science may or may not align with the cultural norms of ELLs.

## WASHINGTON'S PROGRAM FOR ELLs

The state's Transitional Bilingual Instruction Act of 1979, amended in 1984, 1990, and 2001, provides for a Transitional Bilingual Instruction Programs (TBIP) under RCW 28A. 180.010 to address additional instructional supports for ELLs. Chapter 392-160-003 WAC authorizes the Superintendent of Public Instruction to promulgate rules for the implementation of a transitional bilingual instruction program. The rules include school board duties, student identification, eligibility testing, district application, board approval, application content and approval, program exit requirements, alternative instructional programs, and students with disabilities.

While the state legislated a transitional bilingual instruction program, relatively few districts provide formal instruction in student's primary language (see section II. Staffing and Instruction). Thus, for the majority of ELLs in the state, their instructional program is more accurately defined as an English-as-a-Second Language (ESL) program.

Federal support for ELLs is provided through the Elementary and Secondary Education Act (ESEA) Title III-Language Instruction for Limited English Proficient and Immigrant Students. The intent of the Title III statute is to ensure that ELLs, including immigrant children and youth attain English proficiency and attain high levels of academic English. It requires the state to develop and enhance its capacity to prepare ELLs to enter English instructional setting and promotes parental and community participation in language educational programs for parents and communities of ELLs.

The TBIP legislation allows for one or more methods of instruction that are consistent with the requirements of state law and stipulates that the language instruction curriculum must be tied to scientific-based research on teaching ELLs.

Title III section 3115 of ESEA requires that funds be used "to supplement the level of federal, state, and local public funds that, in the absence of such availability, would have been expended for programs for limited English proficient children and immigrant children and youth and in no case to supplant such federal, state, and local public funds."

Guidelines in a question and answer format were developed to assist districts with the legal and programmatic requirements of TBIP and Title III, and can be accessed at http://www.k12.wa.us/MigrantBilingual/pubdocs/TBIPProgramGuidelines.pdf.

## Program Funding

In addition to basic education funding, districts receive state funds to provide supplemental instructional support to ELLs. Funding to districts is based on an October through May average bilingual headcount. In the 2009-10 school year, the state provided a per pupil allocation of $\$ 886.11$ for an average of 84,855 ELLs ${ }^{1}$, a 5.9 percent increase from the previous year. In the 2009-10 school year, total bilingual expenditures were $\$ 88.4$ million, of which $\$ 75.2$ million were from state resources. The total in state and local funding represents a 0.4 percent decrease. Figure 1-3 shows the growth of state funding for the program over the last 25 years. The figure does not adjust the funding amounts for inflation and does not include district indirect costs for operating the program.

Figure 1-3: Growth in State Funding for the TBIP by School Year

Current year source: Report 1191SN OSPI Apportionment for Aug 31, 2010
The state is not the only source of revenue for the program. Districts may choose to supplement their state and federal program support with local levy funds. In the 2009-10 school year, districts reported contributing approximately $\$ 13.2$ million to provide instructional services to ELLs beyond state TBIP funding. However, accurate data that reflects actual district and levy funds used to support local programs for ELLs is not available because these amounts are coded to programs other than program 65 (the designation for TBIP).

[^0]
## Program Eligibility

Program funding is intended for those students with the greatest need. Therefore, not all students who have a primary language other than English qualify for program services. Eligible students must have a primary language other than English and their English language skills must be sufficiently deficient or absent to impair learning in an all-English classroom setting. The program serves eligible students in Grades K-12.

A two-phase process is used to identify potential English language learners:
a) The district must first identify students with a primary language other than English, and
b) The student must be assessed to determine his/her level of English proficiency.

Students are eligible if they score at the limited English proficiency level on the Washington Language Proficiency Test-II (WLPT-II) placement test administered by the district. To continue receiving program services, ELLs are annually assessed on the WLPT-II annual test, which measures their English language proficiency level in listening, speaking, reading, and writing. Eligibility ends when a student scores at the Transitional Level (Level 4) on the WLPT-II.

## OBJECTIVES, SCOPE, AND METHODOLOGY

The Legislature requires the Office of Superintendent of Public Instruction (OSPI) to annually review the TBIP and submit the results. This report provides information on the program for the 2009-10 school year and also includes historical program information. Specifically, this report provides information on the following areas:

- Staffing and instruction.
- ELL enrollment patterns and pattern changes over time.
- Languages spoken by students in the program.
- Length of participation (time) in program services.
- ELLs' academic and linguistic performance.

Data for the report was obtained from districts with an approved program for ELLs in the 2009-10 school year and submitted electronically to the Migrant Student Data and Recruitment (MSDR) office. Assessment data was provided by OSPI's assessment department. Historical data reported in previous years was also used. The report provides data aggregated at the state and district levels.

The state continues to improve the data collection system to ensure that the most accurate numbers are captured. This is a transitional year for OSPI data collection. It is anticipated that OSPI will revise the data collection procedures for the TBIP for next school year by having the districts enter student enrollment data only into the Comprehensive Education Data and Research System (CEDARS), thus avoiding the necessity of dual data entry into both systems. CEDARS is a longitudinal data warehouse of educational data, including data on courses, students, and teachers.

## II. STAFFING AND INSTRUCTION

Nearly all expenditures used to educate ELLs were for staff salaries. Although research has found that students perform better when provided more intensive instruction in their primary language, few students (11 percent) received primary language instruction. Many districts have ELL populations representing multiple languages, in sixteen districts more than 50 languages. In addition, there is also a critical shortage of certificated or endorsed bilingual teachers who can provide content level instruction in a language other than English. This continues to be the case even though the ELL student population has grown for over 30 years and Spanish-speaking students represent more than 67 percent of the ELL population. Statewide, over half the teachers in the TBIP have an ESL or bilingual endorsement. However, many of the ESL-endorsed teachers speak only English.

## PROGRAM EXPENDITURES

Nearly all of the Transitional Bilingual Instruction Program (TBIP) funding for educating ELLs was used for instruction-related activities. Fifteen percent of the total program expenditures reported was funded by funds other than state resources. Figure 2-1 shows the amounts and proportions spent on various categories in the 2009-10 school year.

Figure 2-1: Program Expenditures (School Year 2009-10)

| Type of Program Expenditures | Total <br> Expenditures | Percent <br> of Total |
| :--- | ---: | ---: |
| Salaries-certificated staff | $\$ 37,746,499$ | $42.7 \%$ |
| Salaries-classified staff | $\$ 24,451,738$ | $27.7 \%$ |
| Benefits | $\$ 23,465,056$ | $26.6 \%$ |
| Instructional Supplies | $\$ 1,560,950$ | $1.8 \%$ |
| Other | $\$ 1,128,554$ | $1.3 \%$ |
| Total | $\$ 88,352,797$ | $100.0 \%$ |

[^1]
## STAFFING ISSUES

ELLs require highly qualified teachers knowledgeable and skilled in first/second language acquisition theory, ESL, and sheltered instruction methodologies. This knowledge base provides teachers with the instructional skills to assist ELLs to develop the academic knowledge and English language proficiency needed to meet state standards. However, one significant obstacle facing the education of ELLs is the shortage of properly trained teachers to provide effective instruction. Many districts report difficulties recruiting teachers qualified to teach students with limited English proficiency. Providing training to teachers of ELL students also appears to be an important issue. The National Center for Education Statistics reported in 2002 that while 41 percent of teachers in the United States teach ELLs, less than 13 percent have received any training or professional development. ${ }^{2}$

In the current education reform movement that aims to have all students meet high academic standards, schools are challenged to find and train teachers to meet the academic and linguistic needs of the growing number of ELLs. The federal Elementary and Secondary Education Act (also known as the No Child Left Behind Act of 2001) requires teachers of ELLs to be "highly qualified" if they teach core academic subjects. To address this challenge, many districts are combining state TBIP and federal Title III funding.

## Qualifications and Training of Program Staff

Of the 964 TBIP funded Washington teachers ( 529 FTE) who provided instruction to ELLs in the 2009-10 school year, 41 percent had an ESL endorsement, 9 percent had a bilingual endorsement, and 8 percent had both a bilingual and an ESL endorsement. Seventy-nine percent of the 192 districts with a TBIP provided ESL and bilingual education in-service training to teachers and instructional aides. Many teachers and instructional aides who teach ELLs are not funded by the TBIP and data are not collected on the qualifications of these staff.

TBIP and Title III require districts to provide research-based, on-going professional development to build capacity to instruct ELLs. The state is required to report on specific types of professional development provided by districts and the number of participants in these trainings. The tables below reflect the number of staff trained and the content of those trainings (Figures 2-2 and 2-3).

[^2]Figure 2-2: Professional Development Participants (School Year 2009-10)

| Professional <br> Development Audience | Number of <br> Districts | Number of <br> Participants |
| :--- | ---: | ---: |
| Classroom Teachers | 135 | 21,560 |
| ELL/Bilingual Teachers | 109 | 6,398 |

*Other category includes multicultural education, parent involvement, ELLs with disabilities, dual language training and Spanish to facilitate communication with parents.

## Types of Staff

In the 2009-10 school year, 2,642 staff provided instruction in the TBIP. Those providing instructional services to ELLs included 1,678 instructional aides and 964 teachers. As reflected in the tables below (Figure 2-4 and 2-5), districts continued to rely on instructional aides to provide instruction to ELLs. The number of staff involved in the program who were charged to the TBIP budget (code 65) increased by more than 6.7 percent from the previous year.

Of the full-time equivalent (FTE) staff reported on the Apportionment Personnel Summary Report S275, instructional aides represented about 52 percent of the total FTEs in the 2009-10 school year, an increase of 1 percent from the previous year. Figures 2-4 and 2-5 provide more information on the FTE staffing trends.

Figure 2-4: ELL Student/Program Staff Ratios by School Year

| Staff \& Student Ratios | 2008-09 |  |  | 2009-10 |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Teachers | Aides | All | Teachers | Aides | All |
| Total Staff | 873 | 1,602 | 2,475 | 964 | 1,678 | 2,642 |
| Staff FTE | 519 | 545 | 1,064 | 529 | 583 | 1,113 |
| Student/staff ratio <br> Based on total students <br> served and total staff | 103 | 56 | 36 | 95 | 55 | 35 |
| Student/staff ratio <br> Based on average number <br> and total staff | 95 | 52 | 34 | 88 | 51 | 32 |
| Student/staff ratio <br> Based on average number <br> of students funded <br> and FTE staff | 160 | 152 | 78 | 160 | 145 | 76 |

These data are collected from Final School District Personnel Summary Report S275, Table 11,
Program 65 (TBIP), duty routes 31, 32, 33, and 91 . Staff data includes staff funded by TBIP and other funding sources. Student counts from Report 1251H Summary of Head-count Enrollment as Reported on P223. FTEs reflect rounding and may not sum to total.

## Program Support Student/Staff Ratios

The TBIP provided additional instructional support to ELLs basic education program. Student/staff ratios can be measured in different ways: by using the total number of students and staff in the program, by the average number of students served per month, and by the total number of FTE staff. The ratios are slightly smaller when calculated in terms of the average number of students served and much larger when measured in terms of FTE staff.

Figure 2-4 shows various ratios for the 2009-10 school year. When more instructional aides are involved in the program, the ELL student per aide ratio is lower than the ratio of ELL students per teacher. As reflected in Figure 2-5 below, instructional aides continue to provide a significant percentage of the instructional support to ELLs. Therefore, effective supervision of instructional aides and coordination of program services are essential to student outcomes.

Figure 2-5: Five-Year Staffing Trends (in FTEs) by School Year

| Type of Staff (FTE) | 2005-06 | 2006-07 | 2007-08 | $\mathbf{2 0 0 8 - 0 9}$ | $\mathbf{2 0 0 9 - 1 0}$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Teachers | 535 | 521 | 495 | 519 | 529 |
| Percent of Total FTEs | $49 \%$ | $49 \%$ | $48 \%$ | $49 \%$ | $48 \%$ |
| Instructional Aides | 555 | 538 | 545 | 545 | 583 |
| Percent of Total FTEs | $51 \%$ | $51 \%$ | $52 \%$ | $51 \%$ | $52 \%$ |
| Total FTEs <br> (teachers + aides) | 1,089 | 1,059 | 1,040 | 1,064 | $\mathbf{1 , 1 1 3}$ |

These data are collected from Apportionment Personnel Summary Report S275, Table 11, Program 65 (TBIP), duty routes 31, 32, 33, and 91 . FTEs reflect rounding and may not sum to total.

## INSTRUCTIONAL MODELS AND INSTRUCTIONAL STRATEGIES

Nationwide, a variety of instructional models and approaches has been implemented with the goal of effectively instructing the growing ELL student population. These range from providing no instruction in the student's primary language to providing instruction in both English and the student's primary language. ${ }^{3}$ Descriptions of six instructional models below include statements of instructional focus for each.

## Program Models

- Dual language programs, also referred to as two-way bilingual education and two-way immersion, provide integrated language and academic instruction for native English speakers and native speakers of another language with the goals of high academic achievement, first and second language proficiency, and cross-cultural understanding (Christian, 1994).
- Developmental bilingual education (DBE), also referred to as late-exit bilingual education (Ramirez, 1992), is an enrichment program that educates English language learners using both English and their first language for academic instruction. DBE programs aim to promote high levels of academic achievement in all curricular areas and full academic language proficiency in the students' first and second languages.
- Transitional bilingual education (TBE), also known as early-exit bilingual education (Ramirez, 1992), is the most common form of bilingual education for English language learners in the United States. TBE provides academic instruction in English language learners' primary language as they learn English.
- Sheltered instruction (SI), also known as content-based ESL, is an approach used widely for teaching language and content to English language learners, particularly as schools prepare students to achieve high academic standards. In SI, academic subjects (e.g., science, social studies) are taught using English as the medium of instruction. SI is most often used in classes comprised solely of English language learners, although it may be used in classes with both native English speakers and English language learners when necessitated by scheduling considerations or by small numbers of English language learners. (In Washington State, this approach is most often associated with middle and high school ESL classes. ELLs at the elementary level, who receive pushin support from TBIP staff or limited pull-out in the context of a basic education grade-level classroom, would also fall under this model.)

[^3]- Newcomer Program-The goals of newcomer programs are to help students acquire beginning English language skills along with core academic skills and knowledge, and to acculturate to the United States school system. Some programs have additional goals, such as developing students' primary language skills and preparing students for their new communities.
- Parent Waiver—Students who are eligible for TBIP services, but whose parents have formally requested their child not participate. Although this is not a model of instruction, these ELLs are captured under this category because these students are required to be tested on the annual WLPT-II.

| Sheltered Instruction | 76,182 | 76,042 | 72,682 | 78,236 | 78,527 | 81,711 |
| Newcomer Program |  |  | 3 | 15 | 1,018 | 963 |
| Parent Waiver | 2 | 10 | 19 | 688 | 804 | 1,123 |
| Total | 83,109 | 85,762 | 83,971 | 88,612 | 91,246 | 93,368 |

Includes students served in more than one program model. Pre-SY2008-09 combines sheltered instruction and pull-out strategies.

## Instructional Strategies

With an increased emphasis on building the capacity of all teachers to meet the needs of English language learners, many districts have identified instructional strategies for all teachers that enhance the quality of instruction in basic education classrooms with diverse learners.

- Guided Language Acquisition Design (GLAD)—Project GLAD training provides research-based theory and practical, effective strategies for the development of academic language, literacy, academic achievement and cross-cultural skills of ELLs. Districts throughout Washington State have supported cohorts of teachers to complete GLAD training as well as investing in key trainers at the district level to offer ongoing GLAD training and support.
- Sheltered Instruction Observation Protocol (SIOP)—The Sheltered Instruction Observation Protocol is a valid and reliable, research-based observation instrument as well as a guide for planning instruction that focuses on the academic and linguistic needs of ELLs. The model is built on the premise that teachers possessing these skills will be prepared to provide English language learners with a better learning environment. Critical features of high quality instruction for English language learners are embedded within the SIOP model.
- Cognitive Academic Language Learning Approach (CALLA)—CALLA is a research-based instructional program that fosters the school achievement of students who are learning through the medium of a second language. This professional development program focuses on science and math.

The professional development programs described above are specifically designed to provide teachers with the instructional strategies most effective in educating ELLs.

These programs are among the most commonly used in Washington State to provide English language development strategies to TBIP and mainstream staff.

## Effectiveness of Strategies

Research on the effectiveness of different instructional approaches has demonstrated that the more instruction is provided in the student's primary language, the better the student's overall academic performance over time. ${ }^{4}$ Experts believe that developing proficiency in one language promotes the development of proficiency in a second language. Results from the analysis of student-level data that OSPI reported in 2000 were consistent with this conclusion. ${ }^{5}$ These findings indicate that more academic instruction needs to be given in the student's primary language rather than simply relying on English language instruction. There are indications that the shift to provide more academic instruction in the student's native language is occurring in our state.

To improve the effectiveness of the TBIP, OSPI has in place: (1) standards and benchmarks for English language learners in reading, writing, listening, and speaking, (2) a statewide English language proficiency assessment for placement and annual testing (see section VI), and (3) a system to track ELLs' academic progress through the use of a secure student identifier. OSPI also updates the definitions of instructional program models to conform to national definitions used in research. The uniformity in definitions provides districts with more guidance to improve instructional program implementation.

[^4]
## III. STUDENTS SERVED

The number and percentage of ELL students in Washington showed a 2.2 percent increase in ELL enrollment in school year 2009-10, while all state enrollments declined slightly ( -0.4 percent). As with previous years, ELLs are unevenly distributed across the state. Some districts served either a larger number or a higher percentage of ELLs than in the previous year, while other districts served fewer or no ELLs. Approximately 55 percent of all ELL students in the TBIP were enrolled in Grades $\mathrm{K}-3$. Of the 28 districts reporting more than 1,000 ELL students, 71 percent reported an increase in ELL enrollment.

## TOTAL ELL STUDENT TBIP ENROLLMENT

In the 2009-10 school year, the program served 91,469 distinct count of students ( 94,487 duplicate count). This number represents 1,952 ( 2.2 percent) more students than served in 2008-09. For school year 2009-10, the eight-month average number of ELLs funded for TBIP was 84,855 . Student numbers in this report will reflect the following:

- Distinct Count: Students counted only once regardless of multiple enrollments.
- Duplicate Count: Students counted once for each enrollment in one or more districts throughout the year.
- ELLs Funded: Number of students counted for funding on the P-223 district report, which excludes parent waivers.
- Head Count: Number of students enrolled on October $1^{\text {st }}$.

In the 2009-10 school year, ELLs served in the TBIP comprised 8.3 percent of the total statewide student population on October $1^{\text {st }}$, which is an increase of 0.3 percent from the previous year. The number of ELL enrollments in the state increased by 15 percent since 2004-05 (see Figure 3-1).

Figure 3-1: ELLs as a Percentage of Total Students by School Year

| Year | State Total <br> Oct. 1 Head <br> Count | ELL Oct. 1 <br> Head Counts | Percent <br> ELL | Distinct ELL <br> Enrollments |
| :---: | :---: | :---: | :---: | :---: |
| $2004-05$ | $1,009,563$ | 73,791 | $7.3 \%$ | 82,802 |
| $2005-06$ | $1,020,081$ | 76,138 | $7.5 \%$ | 85,268 |
| $2006-07$ | $1,019,295$ | 74,509 | $7.3 \%$ | 83,348 |
| $2007-08$ | $1,021,834$ | 79,831 | $7.8 \%$ | 87,339 |
| $2008-09$ | $1,027,625$ | 82,207 | $8.0 \%$ | 89,517 |
| $2009-10$ | $1,024,721$ | 84,971 | $8.3 \%$ | 91,469 |

Waived students are excluded.

## DISTRIBUTION OF ELL STUDENTS

ELL students are not evenly distributed across the state (see Figures 1-1 and 12, on page 4). Of Washington's 295 districts, 192 had ELL enrollments in the 2009-10 school year; and this represents 65 percent of the state's districts. The number of districts reporting ELL enrollments has remained about the same for the past few years (see Figure 3-2).

Figure 3-2: Number of Districts with a TBIP for ELLs by School Year

Analyses of the 192 district reports show the following numbers:

- Twenty-one districts report that ELLs represent at least 25 percent of their total district enrollment.
- Twenty-eight districts enrolled more than 1,000 ELLs and served 69 percent of all ELLs enrolled in the TBIP.
- Of those districts with more than 1,000 ELL students:
- One district (Spokane) experienced an increase of more than 10 percent.
- Eight districts (Clover Park, Highline, Othello, Renton, Northshore, Evergreen, Auburn, and Mukilteo) reported a decline in enrollment, ranging from less than 1 percent to nearly 8 percent.
- Seven districts received funding for less than ten students and 52 districts for less than 50 students, while 45 districts had 500 or more ELL students.

Figure 3-3 shows the districts with the highest percentage of ELLs served this school year. Twenty-one districts had ELL populations representing at least 25 percent of their total district headcounts. Wahluke, Palisades, and Orondo reported more than 50 percent of their October $1^{\text {st }}$ student counts were ELLs.

Figure 3-3: Districts with at Least 25 Percent ELL Enrollment (School Year 2009-10)

| District | Total Enrollment | TBIP Enrollment | \% TBIP |
| :--- | ---: | ---: | ---: |
| Wahluke School District | 1,872 | 1,244 | $66 \%$ |
| Palisades School District | 20 | 13 | $65 \%$ |
| Orondo School District | 193 | 100 | $52 \%$ |
| Bridgeport School District | 765 | 327 | $43 \%$ |
| Brewster School District | 950 | 383 | $40 \%$ |
| Royal School District | 1,521 | 601 | $40 \%$ |
| Mabton School District | 958 | 367 | $38 \%$ |
| Roosevelt School District | 35 | 13 | $37 \%$ |
| Granger School District | 1,529 | 564 | $37 \%$ |
| Othello School District | 3,690 | 1,315 | $36 \%$ |

| Quincy School District | 2,598 | 901 | $35 \%$ |
| North Franklin School District | 2,022 | 696 | $34 \%$ |
| Pasco School District | 14,570 | 5,005 | $34 \%$ |
| Tukwila School District | 2,935 | 1,003 | $34 \%$ |
| Toppenish School District | 3,563 | 1,202 | $34 \%$ |
| Manson School District | 607 | 204 | $34 \%$ |
| Warden School District | 965 | 299 | $31 \%$ |
| Grandview School District | 3,564 | 1,065 | $30 \%$ |
| Sunnyside School District | 6,083 | 1,703 | $28 \%$ |
| Yakima School District | 14,834 | 3,942 | $27 \%$ |

## Student counts on October 1, 2009

Appendix C contains enrollment data by district for all districts with TBIP students.

Twenty-eight districts enrolled more than 1,000 ELLs during the 2009-10 school year and these districts collectively served 69 percent of all ELLs enrolled in the TBIP statewide. Of these districts with more than 1,000 ELL students, 71 percent showed gains in enrollment that ranged up to nearly 16 percent (Figure 3-4).

Figure 3-4: Districts with 1,000 or More ELLs Enrolled by School Year

|  | $2008-09$ | $2009-10$ | Percent <br> Change |
| :--- | ---: | ---: | ---: |

| Federal Way School District | 2,981 | 3,234 | $8.5 \%$ |
| Sunnyside School District | 1,711 | 1,852 | $8.2 \%$ |
| Grandview School District | 1,085 | 1,170 | $7.8 \%$ |
| Tacoma School District | 2,214 | 2,352 | $6.2 \%$ |
| Edmonds School District | 1,954 | 2,052 | $5.0 \%$ |
| Tukwila School District | 1,145 | 1,194 | $4.3 \%$ |
| Seattle PS School District | 5,793 | 6,010 | $3.7 \%$ |
| Bellevue School District | 1,837 | 1,901 | $3.5 \%$ |
| Wenatchee School District | 1,605 | 1,651 | $2.9 \%$ |
| Toppenish School District | 1,303 | 1,338 | $2.7 \%$ |
| Mount Vernon School District | 1,559 | 1,600 | $2.6 \%$ |
| Vancouver School District | 2,071 | 2,116 | $2.2 \%$ |
| Lake Washington School District | 1,407 | 1,432 | $1.8 \%$ |
| Everett School District | 1,984 | 2,019 | $1.8 \%$ |
| Kent School District | 4,395 | 4,460 | $1.5 \%$ |
| Pasco School District | 5,340 | 5,416 | $1.4 \%$ |
| Wahluke School District | 1,291 | 1,304 | $1.0 \%$ |
| Yakima School District | 4,239 | 4,271 | $0.8 \%$ |
| Clover Park School District | 1,301 | 1,299 | $-0.2 \%$ |
| Highline School District | 3,895 | 3,860 | $-0.9 \%$ |
| Othello School District | 1,421 | 1,408 | $-0.9 \%$ |
| Renton School District | 2,350 | 2,317 | $-1.4 \%$ |
| Northshore School District | 1,037 | 1,014 | $-2.2 \%$ |
| Evergreen (Clark) School District | 2,284 | 2,227 | $-2.5 \%$ |
| Auburn School District | 1,825 | 1,771 | $-3.0 \%$ |
| Mukilteo School District | 2,566 | 2,365 | $-7.8 \%$ |

Count is distinct students per district. Students transferring between districts are counted in each district (duplicate count). Waived students are excluded.

## GRADE LEVELS OF STUDENTS SERVED

Most ELLs served by the TBIP were enrolled in $\mathrm{K}-3$ and accounted for 54.9 percent of the ELL enrollment in the 2009-10 school year.
Beginning at Grade 3, the number of ELL student enrollment gradually declines (Figure 3-5). At Grade 9, there is a slight increase, however, the numbers of ELLs continue to decline in Grades 10, 11, and 12.

Figure 3-5 Total ELL Enrollment by Grade (School Year 2009-10)

Figure 3-6 presents the number of total and new ELL students served by grade level of the duplicated ELL student count, which includes student enrollments within or across multiple districts. The student count reflects the transitory nature of ELL families as new students represent nearly 26 percent of ELLs overall, or more than 10 percent throughout most of the grade levels.

Figure 3-6 Total ELLs and New to Program Enrollment by Grade (School Year 2009-10)

| Grade | Total ELL <br> Students | \% of ELL <br> Students | New ELL <br> Students | \% of <br> New | \% New <br> by Grade |
| :---: | ---: | :---: | ---: | :---: | ---: |
|  | 15,433 | $16.7 \%$ | 15,099 | $63.5 \%$ | $97.8 \%$ |
| 1 | 14,414 | $15.6 \%$ | 1,505 | $6.3 \%$ | $10.4 \%$ |
| 2 | 12,034 | $13.0 \%$ | 1,002 | $4.2 \%$ | $8.3 \%$ |
| 3 | 8,885 | $9.6 \%$ | 846 | $3.6 \%$ | $9.5 \%$ |
| 4 | 7,071 | $7.7 \%$ | 730 | $3.1 \%$ | $10.3 \%$ |
| 5 | 5,949 | $6.4 \%$ | 639 | $2.7 \%$ | $10.7 \%$ |
| 6 | 5,118 | $5.5 \%$ | 530 | $2.2 \%$ | $10.4 \%$ |
| 7 | 4,922 | $5.3 \%$ | 616 | $2.6 \%$ | $12.5 \%$ |
| 8 | 4,042 | $4.4 \%$ | 545 | $2.3 \%$ | $13.5 \%$ |
| 9 | 4,816 | $5.2 \%$ | 1,076 | $4.5 \%$ | $22.3 \%$ |
| 10 | 4,004 | $4.3 \%$ | 544 | $2.3 \%$ | $13.6 \%$ |
| 11 | 3,081 | $3.3 \%$ | 443 | $1.9 \%$ | $14.4 \%$ |
| 12 | 2,641 | $2.9 \%$ | 199 | $0.8 \%$ | $7.5 \%$ |
| Total | 92,410 | $100 \%$ | 23,774 | $100 \%$ | $25.7 \%$ |

Waived students are included.
ELLs in kindergarten comprised most ( 63.5 percent) of the new ELLs. Enrollment of new ELLs in subsequent grade levels declined through Grade 9, where there was a spike in both total and new ELL enrollments.

## IV. LANGUAGES SPOKEN

Students served by the TBIP program spoke a total of 203 languages. About 67 percent spoke Spanish and another 17 percent spoke Korean, Russian, Somali, Tagalog, Ukrainian, and Vietnamese. Sixteen districts had 50 or more languages spoken by ELLs, while many districts only served ELLs whose primary language is Spanish.

## NUMBER OF LANGUAGES AMONG DISTRICTS

In 2002-03, Washington State began collecting student level data on ELLs reported to the Bilingual Database housed at the Migrant Student Data and Recruitment Office in Sunnyside, Washington. The issuing of student identification numbers provided a vehicle to assist in better data collection.

A total of 203 primary, non-English languages were represented among the students served by the TBIP in the 2009-10 school year. ${ }^{6}$ For the last 22 years, students speaking Spanish have accounted for the largest number of ELLs, more than all other ELL languages combined. In the 2009-10 school year, Spanish was the primary language spoken by 67 percent of all ELLs. This percentage fluctuates about 1 percent per year.

Figure 4.1 provides information on the number of students speaking the top 25 most common languages represented in the program. Appendix A lists the number of students in the TBIP with an identified nonEnglish primary language.

During the 2009-10 school year, there were 94 languages that were spoken by fewer than 10 students each, while only eight languages were spoken by 1,000 or more students.

Figure 4-1: Top 25 Number

Taiwanese, Fukienese and unspecified Chinese

[^5]
## NUMBER OF STUDENTS SPEAKING VARIOUS LANGUAGES

In the school year 2009-10, approximately 18 percent of all Washington ELLs spoke Chinese, Korean, Russian, Somali, Tagalog, Ukrainian, or Vietnamese (Figure 4-2). According to data reported, there was a decline in the number of students reported in four of these seven major language groups. Among languages with more than 100 students, the largest increase between 2008-09 and 2009-10 was in the number of students speaking Nepali and the largest decrease was the number of students speaking Hmong.

Figure 4-2: One-Year Change in Enrollment by Major Language Group

Includes Cantonese, Mandarin, Taiwanese, Fukienese and unspecified Chinese.
Total excludes parent waivers.
Appendix B provides more information on the number of primary languages in the districts and the number of students for each of the languages.

Some districts provided instruction to ELLs from many different language backgrounds. In the 2009-10 school year, 41 districts served students from 20 or more language groups (Figure 4-3). Most of these districts are located in western Washington along the Interstate 5/Interstate 405 corridor.

Figure 4-3: Districts with 20 or More Languages (School Year 2009-10)

In contrast, all or nearly all ELLs in other districts spoke Spanish. In 59 districts, 95 percent or more of the enrolled ELLs identified Spanish as their primary language (Figure 4-4). Thirty-one districts served ELLs from one primary nonEnglish language group.

Figure 4-4: At Least 95 Percent Spanish Speaking ELLs (School Year 2009-10)

Includes parent waivers.

## V. LENGTH OF PROGRAM PARTICIPATION

The purpose of the TBIP is to provide temporary English language development services until ELLs develop adequate academic English language skills. As discussed in Section 1, students are eligible to enter the TBIP if they score at the limited English proficiency level 1, 2, or 3 on the WLPT-II placement test. ELLs are assessed annually on the Washington Language Proficiency Test-II to determine continued eligibility in the TBIP. Eligibility ends when a student scores at the Transitional Level (Level 4).

## STATUS OF STUDENTS SERVED

English language learners may leave the program primarily in two ways: They can either be transitioned out of the program by meeting the exit performance criteria or graduate from high school. A parent or legal guardian may waive TBIP services for his/her child; however, federal law requires that waived students participate in the annual WLPT-II assessment. Therefore, waived students remain eligible for TBIP services until they meet the exit criteria established by the state.

Figure 5-1 provides information about the number of ELLs exiting and the reasons for exiting the program during the last five years. Approximately 15 percent of the ELLs served in the 2009-10 school year left the TBIP. About 13 percent $(11,609)$ either transitioned out of the program or graduated prior to meeting the exit criteria. Another 1.6 percent $(1,466)$ dropped out or left for unknown reasons and 0.3 percent (285) were determined to have special education needs rather than English language limitations. Appendix D lists information on the number of students for each district transitioning after demonstrating English proficiency on the annual WLPT-II.

Figure 5-1: Status of Students Served by School Year (distinct count)

|  | $\mathbf{2 0 0 4 - 0 5}$ | $\mathbf{2 0 0 5} \mathbf{0 6}$ | $\mathbf{2 0 0 6} \mathbf{- 0 7}$ | $\mathbf{2 0 0 7} \mathbf{- 0 8}$ | $\mathbf{2 0 0 8} \mathbf{0 9}$ | $\mathbf{2 0 0 9} \mathbf{- 1 0}$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Total Exited | 14,175 | 19,594 | 14,045 | 16,045 | 17,333 | $\mathbf{1 3 , 4 9 9}$ |
| Graduate | 1,668 | 1,375 | 1,325 | 932 | 876 | 1,050 |
| Transition | 6,609 | 13,897 | 9,844 | 13,004 | 14,143 | 10,559 |
| Drop out | 331 | 515 | 553 | 450 | 470 | 336 |
| Special education | 190 | 241 | 196 | 237 | 291 | 285 |
| Unknown reasons | 4,768 | 2,509 | 1,406 | 1,244 | 1,214 | 1,130 |
| Parent waiver | 609 | 1,057 | 719 | 116 | 241 | 45 |
| Total Continuing | 68,629 | 65,684 | 69,326 | 72,004 | 73,030 | 79,005 |
| Total ELL | 82,804 | 85,278 | 83,369 | 87,987 | 90,265 | 92,410 |

Parent waivers are students not participating in TBIP at the request of parents after being enrolled for some portion of the school year.

Figure 5-2: Student Status Definitions

| Definitions of Student Categories |  |
| :--- | :--- |
| Student Categories | This count included students in all of the categories listed on Figure 5-1. |
| Graduated | Student graduated from high school, but who may or may not have met <br> the transitional level on the WLPT-II. |
| Transitioned | Student scored at the Transitional Level on the WLPT-II and transitioned <br> out of TBIP services. |
| Dropped Out | Student dropped out of school. |
| Special Education | Student was exited from the program because of non-linguistic factors. |
| Unknown Reasons | Student left the school system and the district has no record of transfers <br> within or out-of-state. |
| Parent Waiver | Student exited the TBIP upon written request of the parent. |

Research has demonstrated that achievement of "academic" English, the level needed to participate in unaided instruction in English, takes four to six years to develop. While experts may disagree about the best method for teaching ELLs, nearly all experts agree that the process of learning academic English for students with little to no English language skills normally exceeds three years.

Figure 5-3 provides information on the amount of time students were served by the TBIP. The number of exited ELLs is a combined count of transitioned, graduated, dropped-out, special education determination, and left for unknown reasons. More than half ( 59 percent) of those exiting the program participated for less than three years.

Figure 5-3: Number of Distinct ELLs Served by Time in Program (School Year 2009-10)

| Time in Program | Total Served | Exited ELL <br> Students* | \% of Exited Students |
| :---: | :---: | :---: | :---: |
| Less than 1 Year | 14,276 | 785 | 6.8\% |
| 1 to < 2 Years | 22,976 | 3,098 | 26.8\% |
| 2 to < 3 Years | 17,418 | 2,986 | 25.8\% |
| 3 to < 4 Years | 12,381 | 1,797 | 15.5\% |
| 4 to < 5 Years | 7,978 | 761 | 6.6\% |
| 5 to < 6 Years | 6,502 | 654 | 5.6\% |
| 6+ Years | 9,938 | 1,499 | 12.9\% |
| Total | 91,469 | 11,580 | 100.0\% |

*Number of exited ELLs is a combined count of: transitioned, graduated, dropped-out, special education and unknown reasons. Waived students are excluded.

Analysis of the time in TBIP, prior to transitioning, for students transitioning in 2010 reveals a highly positively skewed distribution as shown in Figure 5-4, with a median time of 500 days, or 2.8 years. A quarter of the students transitioning had been in TBIP less than two years and a quarter longer than four years.

This median time differs significantly by the entry level of English proficiency. Half of the students entering with beginning level English ( $n=2,534$ ) took 694 days ( 3.9 years) or longer to transition. Those entering with intermediate level ( $n=5,271$ ) took a median of 360 days (2.0 years) and those entering with advanced English ( $\mathrm{n}=1,963$ ) took a median of 312 days
(1.7 years) to transition out of TBIP.

As shown in Figure 55 , students who enter TBIP with beginning English proficiency (Level 1) take longer to transition than students who enter with advanced English proficiency (Level 3).

Figure 5-5: Percentage of ELLs Transitioning by Years From Initial Placement by Initial Level (School Year 2009-10)

According to a comprehensive longitudinal study that tracked the academic achievement of ELLs enrolled in a variety of instructional models, it takes a minimum of four years of instruction in a student's second language in order to reach grade-level performance levels using that language. ${ }^{7}$ The length of time needed depends on several factors, including the level of academic proficiency in content areas prior to exposure to the new language and the type of program used to provide the instruction. Section VI, Language Proficiency and Academic Performance provides more information about test results for ELLs in Washington.

Appendix D lists percent of transitioning students by length of participation by district.

[^6]
## VI. LANGUAGE PROFICIENCY AND ACADEMIC PERFORMANCE

To fulfill the requirements of ESEA, Washington State adopted an English Language Proficiency Assessment, aligned to the state reading, writing, and communication standards, during the 2004-05 school year and fully implemented during the 2005-06 school year. ESEA also requires students who have very limited or no English proficiency to participate in the state's accountability assessments (MSP/HSPE). ELLs who are enrolled in a United States school for the first year are exempt from taking the reading academic assessment. Although ELL students in the TBIP meet the academic standard far less frequently than their English-proficient peers, ELLs who reach English language proficiency meet standard on the statewide assessments at percentages below the state average for all students.

## WASHINGTON LANGUAGE PROFICIENCY TEST RESULTS

During the 2004-05 school year, the state adopted the Washington Language Proficiency Test (WLPT-II) administered for the first time during the 2005-06 school year. All ELLs in Grades K-12 are required to take the WLPT-II test during a February-to-March testing window. The WLPT-II measures a student's English language proficiency in reading, writing, listening, and speaking. The WLPT-II test allows students, regardless of their level of English proficiency, to demonstrate the level of English language proficiency they have acquired.

The WLPT-II categorizes four levels of English language proficiency:

- Level 1—Beginning
- Level 2-Intermediate
- Level 3-Advanced
- Level 4-Transitional

Level 1 indicates minimal or no English language proficiency, while Level 4 indicates a level of English language proficiency sufficient to be instructed through an English-only instructional program. Eligibility for TBIP participation ends when a student scores at the Transitional level on the WLPT-II.

In school year 2009-10, there were 85,951 students present during the February/March test window of the WLPT-II, of which 83,571 students (97.2 percent) completed all four parts of the test and received an overall composite score.

Figure 6-1: WLPT-II Results by Grade and Proficiency Level (School Year 2009-10)

| Grade | Not Scored* | Level 1 Beginning | Level 2 Intermediate | Level 3 Advanced | Level 4 Transitional | Total <br> Tested | Total Enrolled |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| K | 650 | 748 | 6,407 | 5,421 | 1,214 | 14,440 | 15,425 |
| 1 | 179 | 182 | 3,062 | 7,731 | 2,550 | 13,704 | 14,420 |
| 2 | 166 | 100 | 1,474 | 7,290 | 2,428 | 11,458 | 12,031 |
| 3 | 129 | 101 | 1,327 | 5,982 | 870 | 8,409 | 8,896 |
| 4 | 91 | 90 | 1,157 | 4,864 | 468 | 6,670 | 7,063 |
| 5 | 81 | 111 | 1,065 | 4,133 | 249 | 5,639 | 5,955 |
| 6 | 66 | 48 | 364 | 3,321 | 958 | 4,757 | 5,117 |
| 7 | 88 | 62 | 446 | 3,085 | 898 | 4,579 | 4,917 |
| 8 | 81 | 74 | 439 | 2,496 | 651 | 3,741 | 4,045 |
| 9 | 227 | 187 | 889 | 2,496 | 168 | 3,967 | 4,843 |
| 10 | 187 | 108 | 740 | 2,220 | 274 | 3,529 | 4,012 |
| 11 | 169 | 54 | 594 | 1,727 | 194 | 2,738 | 3,050 |
| 12 | 266 | 22 | 436 | 1,440 | 156 | 2,320 | 2,636 |
| Total | 2,380 | 1,887 | 18,400 | 52,206 | 11,078 | 85,951 | 92,410 |

Students who were unable to complete or to respond to the test were reported as Not Scored.
Figure 6-1 demonstrates that 11,078 students met the Transitional Performance Level on the WLPT-II and exited the TBIP. Included in this count are students whose parents waive TBIP services, but are still required by ESEA to participate in the WLPT-II annual assessment. The exit results represent a decrease of 3,465 students ( 24 percent) transitioning compared to the 2008-09 school year.

Figure 6-2 shows the number of the WLPT-II students remaining in the program and the percent of enrollments tested. More than 93 percent of all ELL students in the state participated in the annual assessment of English language ability.

Figure 6-2: WLPT-II Transitioning by Grade (School Year 2009-10)

| Grade | Remaining in Program | Percent Remaining | Transitioned Program | Percent Transitioned | Total Tested | Percent <br> Tested | Total <br> Enrolled |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| K | 14,211 | 92\% | 1,214 | 8\% | 14,440 | 94\% | 15,425 |
| 1 | 11,870 | 82\% | 2,550 | 18\% | 13,704 | 95\% | 14,420 |
| 2 | 9,603 | 80\% | 2,428 | 20\% | 11,458 | 95\% | 12,031 |
| 3 | 8,026 | 90\% | 870 | 10\% | 8,409 | 95\% | 8,896 |
| 4 | 6,595 | 93\% | 468 | 7\% | 6,670 | 94\% | 7,063 |
| 5 | 5,706 | 96\% | 249 | 4\% | 5,639 | 95\% | 5,955 |
| 6 | 4,159 | 81\% | 958 | 19\% | 4,757 | 93\% | 5,117 |
| 7 | 4,019 | 82\% | 898 | 18\% | 4,579 | 93\% | 4,917 |
| 8 | 3,394 | 84\% | 651 | 16\% | 3,741 | 92\% | 4,045 |
| 9 | 4,675 | 97\% | 168 | 3\% | 3,967 | 82\% | 4,843 |
| 10 | 3,738 | 93\% | 274 | 7\% | 3,529 | 88\% | 4,012 |
| 11 | 2,856 | 94\% | 194 | 6\% | 2,738 | 90\% | 3,050 |
| 12 | 2,480 | 94\% | 156 | 6\% | 2,320 | 88\% | 2,636 |
| Total | 81,332 | 88\% | 11,078 | 12\% | 85,951 | 93\% | 92,410 |

Figure 6-3 displays the trend in English language proficiency levels of ELLs since the school year 2005-06. More than half of ELL students scored at advanced proficiency (Level 3). The number of students transitioning out of the TBIP (Level 4) varies from year to year, with the 2009-10 school year having the smallest percentage (12\%) during the five years.

Figure 6-3: WLPT-II English Proficiency Levels by School Year

## STATEWIDE ACADEMIC ASSESSMENT RESULTS

ELLs are required to take the Washington's statewide academic assessments, the Measurements of Student Progress (MSP) and the High School Proficiency Exam (HSPE), even though they may not have the level of English language skills to understand the reading texts or test questions, or have the ability to respond effectively in English. As shown in Figures 6-4, there is a strong relationship between English language proficiency and academic performance.

The 2009-10 assessment results for ELLs who tested on both the WLPT-II and the MSP/HSPE in the required grades show that 53 percent of ELLs who transitioned from the TBIP program met the MSP/HSPE reading standard, 39 percent met the MSP/HSPE math standard, 63 percent met the writing standard, and 21 percent met the science standard.

There remains a significant achievement gap between ELL students and the percentage of all Washington's students in terms of the academic performance on the standardized math, science, reading, and writing academic assessments. Even ELL students scoring at Level 4 fall behind all students statewide, with the percentage meeting academic standards 17 percent lower in reading, 15 percent in math, 10 percent in writing, and 25 percent in science.

Figure 6-4: Percentage Meeting MSP/HSPE by WLPT-II English Proficiency Levels

Includes all grades tested
Regardless of the grade or subject, ELLs continue to make progress towards meeting the standard on the Measurements of Student Progress (MSP) and the High School Proficiency Exam (HSPE). Figures 6-5 to 6-8 show how ELLs in Grades 3-8 and 10 who met the Transitional level on the WLPT-II performed on the MSP/HSPE in the required grades. Generally, transitional ELL students in Grades 3-5 and Grade 10 performed as well or better than the state total; however, Grades 6-8 performed much below the state totals.

Figure 6-5 WLPT-II Transitional Level and MSP/HSPE Reading Performance (School Year 2009-10)

| Grade | MSP/HSPE Levels |  |  |  | Total <br> Transitional who scored on MSP/HSPE | Percentage of <br> Transitional who <br> Met Reading <br> MSP/HSPE | Percentage of all students who Met Reading MSP/HSPE |

## APPENDIX C

## TBIP ENROLLMENTS BY DISTRICT

This appendix presents the ELL enrollment data reported by districts to the MSDR Bilingual database. The Total Headcount is the number of all students Grades K-12 enrolled in a Washington public school on October 1, 2009. The TBIP Headcount column is a count of unique students enrolled in TBIP (excluding waivers) on October 1, 2009, while TBIP Distinct count is the number of ELL students enrolled in TBIP at any point during the 2009-10 school year.

|  | Total | TBIP Enrolled |  |  |
| :--- | ---: | ---: | ---: | ---: |
|  | Headcount | Headcount | $\%$ TBIP | Distinct |
| Statewide | $1,035,887$ | 84,971 | $8.2 \%$ | 91,469 |
| Aberdeen School District | 3,424 | 247 | $7.2 \%$ | 262 |
| Adna School District | 598 | - | $0.0 \%$ | 1 |
| Anacortes School District | 2,737 | 53 | $1.9 \%$ | 55 |
| Arlington School District | 5,537 | 162 | $2.9 \%$ | 170 |
| Auburn School District | 14,785 | 1,599 | $10.8 \%$ | 1,738 |
| Bainbridge Island School District | 3,926 | 31 | $0.8 \%$ | 36 |
| Battle Ground School District | 13,222 | 656 | $5.0 \%$ | 694 |
| Bellevue School District | 17,578 | 1,593 | $9.1 \%$ | 1,835 |
| Bellingham School District | 10,880 | 562 | $5.2 \%$ | 607 |

## APPENDIX D <br> LENGTH OF PROGRAM PARTICIPATION BY DISTRICT

This appendix presents the number of ELL students who took the WLPT-II annual test, the number and percent who transitioned out of the TBIP by demonstrating English proficiency, and the percent of these transitioning students that participated two or more years. Districts with fewer than 30 students testing are omitted from this table. Student counts do not reflect district entries into the MSDR TBIP database after 10/15/2010.

| District | Total ELLs Tests | Number Transtioned | Percent Transitioned | Transitioned in 2+ years | Percent <br> Transitioned in 2+ years |

## APPENDIX E

## ENGLISH PROFICIENCY AND ACADEMIC PERFORMANCE

This appendix presents the number of ELL students who transitioned out of the TBIP during 2009-10 by demonstrating English proficiency on the WLPT-II and who also took the Measurements of Student Progress (MSP) or the High School Proficiency Exam (HSPE). The percentages of all Washington students who met standard are included to provide a comparison with those transitioning from ELL programs. Districts without transitioning students are not listed in this table. Waived students are excluded. This table includes students retesting in Grades 11 and 12.

[^4]:    ${ }^{4}$ See: Magda Costantino, Reading and Second Language Learners—Research Report, OSPI, April 1999; and Wayne Thomas and Virginia Collier, School Effectiveness for Language Minority Students, National Clearinghouse for Bilingual Education, The George Washington University, Washington, DC, December 1997. The effects of different instructional approaches may not be seen in the short-term since language acquisition in an academic context is a long-term process.
    ${ }^{5}$ The average length of time ELL students spent in the program was less when they were receiving more intensive instruction in their primary language along with instruction in English. See Helen Malagon and Pete Bylsma, Educating Limited-English-Proficient Students in Washington State, OSPI, December 2000, pg. 16.

[^5]:    ${ }^{6}$ Some districts could not fully identify the languages spoken by their ELL students, so there may be more than 203 languages spoken by ELL students statewide.

[^6]:    ${ }^{7}$ See A National Study of School Effectiveness for Language Minority Student's Long-Term Academic Achievement, Wayne P. Thomas and Virginia P. Collier, George Mason University, for the Center for Research on Education, Diversity \& Excellence, 2002.
