WorkFirst Wage Progression and Returns Report: through third-quarter 2021

INTRODUCTION

[RCW 74.08A.411](#) mandates a quarterly report on performance measures for WorkFirst clients twelve months, twenty-four months and thirty-six months after leaving the Temporary Assistance for Needy Families (TANF) program for at least one quarter. Performance measures reported under this requirement are:

1. Changes in earnings and in hourly wages.
2. Percentage of returns to TANF.

STATUTORY REQUIREMENT

[RCW 74.08A.411](#) requires DSHS to report WorkFirst outcome measures to the Legislature as follows:

The department shall continue to implement WorkFirst program improvements that are designed to achieve progress against outcome measures specified in RCW [74.08A.410](#). Outcome data regarding job retention and wage progression shall be reported quarterly to the appropriate fiscal and policy committees of the legislature and to the legislative-executive WorkFirst poverty reduction oversight task force for families who leave assistance for any reason, measured after twelve months, twenty-four months, and thirty-six months. The department shall also report the percent of families who have returned to TANF after twelve months, twenty-four months, and thirty-six months. The department shall make every effort to maximize vocational training, as allowed by federal and state requirements. [2019 c 343 § 4; 2009 c 85 § 3.]

PERFORMANCE REPORT

WorkFirst exiters

Beginning with the October 2011 WorkFirst performance report, an exiter is defined as having been off TANF all three months of a quarter, compared to the previous definition that required only one month off TANF. The three-month requirement more clearly identifies true exiters by minimizing instances where a client cycles off TANF for a single month due to circumstances such as late reporting or one-time changes to monthly income. Information on TANF receipt is obtained from the Office of Financial Management's AFARRAYS file.

This quarterly WorkFirst performance report provides follow-up data for three groups (cohorts) of TANF exiters. The report uses third-quarter 2021 unemployment insurance wage data (covered employment wages) to provide updates for clients who exited TANF in third-quarter 2018, third-quarter 2019 and third-quarter 2020 (*Figure 1*). Covered employment wage data is available with a six-month lag, reflecting employer reporting requirements and data processing time.

For purposes of this report, exiters are defined as TANF clients who:

- Received a TANF grant at least one month during April, May, or June (second quarter) and
- Did not receive a TANF grant at any time during July, August, or September of the following quarter (third quarter).

Received TANF at least once during:	No TANF all three months (exit quarter)	Cohort name
April - May - June 2018	July - August - September 2019	2018 Q3
April - May - June 2019	July - August - September 2020	2019 Q3
April - May - June 2020	July - August - September 2021	2020 Q3

Median quarterly earnings and percentage increase in earnings

Figure 2 shows inflation-adjusted median quarterly earnings for exiters. Earnings progressions are shown in *Figure 3*. Earnings progression is measured as change in total quarterly earnings over one, two or three years. Earnings are a more accurate reflection of true progression than are hourly wages because quarterly earnings reflect both an individual's hourly wage and any changes between part- and full-time work.

Not all TANF exiters will have reported earnings in the exit and follow-up quarters. These individuals may not have worked during the quarter or may have worked in a job not covered by unemployment insurance. Exiters who had missing or no earnings are excluded from the calculations. All earnings prior to 2021 are adjusted to real dollars using the 2021 annual average CPI-W as a base year.

¹The third-quarter 2018 TANF cohort is defined as those on TANF at least one month during second-quarter 2018 and off TANF all three months of third-quarter 2018.

²The number of TANF exiters who had earnings from covered employment during the quarter is shown as "n."

³Information not yet available is shown as "n/a."

Median hourly wage rates

The hourly wage rate was obtained by dividing quarterly earnings by hours worked in the quarter. While employers report both quarterly earnings and hours worked to the unemployment insurance program, the hours data are incomplete or, in some cases,

inaccurate. Records with missing hours were deleted from the calculations. Hourly wage rates greater than \$50 per hour or less than \$5 per hour were dropped, since these rates most likely reflected employer reporting errors. *Figure 4* displays inflation-adjusted, median hourly wage rates for TANF exiters.

WorkFirst return rate

Figure 5 shows the return rate for exiters 12, 24 and 36 months after leaving WorkFirst.

¹If the client returned to TANF for at least one month during the follow-up 12, 24 or 36 month quarter, it is counted as a return.

²The number returning to TANF is expressed as a percentage of those with no TANF in the cohort quarter.
