

(Effective until September 1, 2021)

WAC 246-830-560 Coverage and draping. (1) A massage therapist must:

(a) Allow a client or patient privacy to dress or undress except as may be necessary in emergencies or custodial situations; and

(b) Always provide the client or patient a gown or draping except as may be necessary in emergencies.

(2) Massage therapists must use safe and functional coverage and draping practices during the practice of massage when the client or patient is disrobed. The drape(s) must be sufficient to ensure the genitals and the gluteal cleft distal to the coccyx, anus and rectum are not exposed, and the breast area is not exposed except as allowed in subsections (3) and (4) of this section. Safe and functional coverage and draping means:

(a) The massage therapist explains, maintains and respects coverage and draping boundaries; and

(b) Massage or movement of the body does not expose genitals or gluteal cleft distal to the coccyx, anus and rectum, or does not expose the breast area except as allowed in subsections (3) and (4) of this section.

(3) With prior written, verbal, and signed informed consent of the client or patient, the gluteal and breast drapes may be temporarily moved in order to perform therapeutic treatment of the area. In addition, with informed and written consent, a client or patient may choose to have their upper torso undraped during the entire massage.

(4) If variations to this coverage and draping rule occur, a massage therapist must:

(a) Maintain evidence of education and training in specific modalities that require variations in coverage and draping;

(b) Receive voluntary and informed consent of the client or patient prior to any variation of coverage or draping; and

(c) Document in the client's or patient's record the rationale for any variation of coverage or draping.

(5) Any written consent required by this section may be included within an overall general consent to massage document, if clearly delineated and either specifically initialed or signed.
