WAC 246-918-855 Patient evaluation and patient record—Chronic pain. When the patient enters the chronic pain phase, the patient shall be reevaluated as if presenting with a new disease. The physician assistant shall include in the patient's record:

1. An appropriate history including:
   a. The nature and intensity of the pain;
   b. The effect of pain on physical and psychosocial function;
   c. Current and relevant past treatments for pain, including opioids and other medications and their efficacy; and
   d. Review of comorbidities with particular attention to psychiatric and substance use.

2. Appropriate physical examination.

3. Ancillary information and tools to include:
   a. Review of the PMP to identify any medications received by the patient in accordance with the provisions of WAC 246-919-985;
   b. Any pertinent diagnostic, therapeutic, and laboratory results;
   c. Pertinent consultations; and
   d. Use of a risk assessment tool that is a professionally developed, clinically recommended questionnaire appropriate for characterizing a patient's level of risk for opioid or other substance use disorders to assign the patient to a high-, moderate-, or low-risk category.

4. Assessment. The physician assistant must document medical decision making to include:
   a. Pain related diagnosis, including documentation of the presence of one or more recognized indications for the use of pain medication;
   b. Consideration of the risks and benefits of chronic opioid treatment for the patient;
   c. The observed or reported effect on function or pain control forming the basis to continue prescribing opioids; and
   d. Pertinent concerns discovered in the PMP.

5. Treatment plan as provided in WAC 246-918-860.
