- WAC 296-54-58930 Log trucks—Reaches and bunks. (1) Log trailers must be connected to tractors by reaches of a size and strength to withstand all normal imposed stresses.
- (2) Hand-holds or other facilities must be installed on trailer tongues or trailer reaches if workers are required to manually assist in coupling them to their tractors or trucks.
- (3) The reaches of unloaded trailers being towed must have and use a minimum one-inch pin near the end or an equally effective means to prevent pulling or stripping through the tunnel.
- (4) Reach locks, clamps, or tighteners must be of the type that will securely lock the reach in the tunnel.
- (5) All reaches must be the maximum size usable in the tunnel of a trailer.
- (6) Altering a trailer tunnel to permit reduction of reach size is prohibited.
- (7) Every truck or truck and trailer engaged in transporting logs loaded lengthwise must be equipped with bunks and chock blocks or stakes.
- (8) Log bunks or any part of a bunk assembly bent enough to cause bunks to bind, must be straightened. Bunks must be sharp enough to prevent logs from slipping.
- (9) All trucks with swivel bunks must have bunk locks or an equivalent system of holding the bunks in place while loading logs.
- (10) The bunks or bolsters of any truck or trailer must be either curved upward or straight. Bunks with ends lower than their centers are prohibited.
- (11) Enough clearance must be maintained between the bunk and the bunk rider to prevent bunk binding.
- (12) Trailer bunks must have a false or tilt bunk. The channel of the bunk must be kept reasonably free of debris.
- (13) Stakes and stake extensions must be installed and maintained so that the angle between bunks and stakes (and extensions if used) do not exceed ninety degrees when loaded.
- (14) Frames, bunks, and running gear of log trucks must be maintained free of cracks, breaks and defects. If defects are found, they must be immediately repaired or the part replaced.
