**Attestation and Signature**

To complete your application, please read and agree to the following attestation and release agreement. You must click the "I Attest" button to certify that you have carefully reviewed all information, including supporting documentation, contained within your ProviderSource™ application and that all information provided is true, correct, current and complete, to the best of your knowledge. By clicking "I Attest", you also acknowledge that you must create an electronic signature in order to complete your application.

(Section 1 of 2)

**Washington Attestation**

I certify the information in this entire application is complete, accurate, and current. I acknowledge that any misstatements in or omissions from this application constitute cause for denial of membership or cause for summary dismissal from the entity to which this statement has been made. A photocopy of this application has the same force and effect as the original.

By submitting this authorization and release of information form in conjunction with the Washington Practitioner Application (WPA) and/or the Washington Practitioner Attestation, I understand and agree as follows:

1. I understand and acknowledge that, as an applicant for medical staff membership and/or participating status with the Healthcare Organization(s)\* indicated on the WPA for initial credentialing or recredentialing, I have the burden of producing adequate information for proper evaluation of my competence, character, ethics, mental and physical health status, and or other qualifications.
2. I further understand and acknowledge that the Healthcare Organization(s) or designated agent will investigate the information in this application. By submitting this application, I agree to such investigation and to the disciplinary reporting and information exchange activities of the Healthcare Organization(s) as part of the verification and credentialing process.

I have reviewed the Authorization, Attestation and Release.

# It's all About Adoption

- Lots going on – competition for limited “change” resources
- Payers deploy solutions first, then providers adopt
  - Voluntary approach is working
- 2011 focus: provider adoption
  - Outreach and training
- Prioritize solutions
  - Market interest, readiness
- Change what you measure
  - No Admin Simp Police

# Admin Simp Summary

- Lead Organization model is achieving its objectives
  - A private sector organization operating in the public interest
  - Reduced cost to the state, greater private sector involvement
  - Strong OneHealthPort/OIC partnership
  - Informal nature of model is both a strength and a weakness
- Progress to date derived from stakeholder leadership
  - Financial support from Forum and OneHealthPort founders
  - Engagement of subject matter experts from community
- Admin simp presents “opportunity for improvement”
  - Benefit realization depends on individual organization
  - Adoption will tell the tale
