EFFECT: Specifies that the definition of "family member" for paid family and medical leave (PFML) does not include an individual who resides in the employee's home with no expectation of care. Modifies the requirement that the Employment Security Department (ESD) collaborate with the PFML Advisory Committee on the data collection requirements to a requirement that ESD develop the proposed plan for data collection in consultation with the PFML Advisory Committee. Removes requirements that ESD include certain data on employee leave use and returns in the first required report to the Legislature. Requires ESD to provide opportunity for members of the PFML Advisory Committee to provide comment in each required report to the Legislature.
