1

Framework for Assessing Financial Condition

2

Measures for Assessing Plan Health

- **Affordability:** Ability to provide adequate funding
 - Can members, employers, and the state pay the amount required to fully fund the plans?
 - Examples: Contribution rate levels, pension contributions relative to state budget
- **Solvency:** Ability to pay for member benefits
 - Can the plans pay the benefits that have been earned by members?
 - Are the plans on target to meet future benefit requirements?
 - Example: Funded ratio

3

Current Contribution Rates Declining after Historically High Levels

- Phase-in complete of increased costs due mortality assumption change
- Recent investment returns higher than assumed
- Plan 1 UAAL contribution rates have declined to minimum levels
- For most plans, cost of new hires is less than current members

We Rely on Funded Ratio to Measure Solvency

- Funded ratio compares plan assets to members' earned benefits
- Plan assets reflect past funding plus investment earnings
- Funded ratio >100% means the plan has more assets than earned benefits

6

Funded Ratio Generally Increased from 2014

7

Plan Financial Health: What Does the Future Hold?

- Continued improvement for future affordability and solvency metrics
 - Assumes actual experience matches assumptions over long term
 - Excludes impact from FY 2021 investment return
- Contribution rates expected to decline
 - Contributions as a percent of General-Fund Budget expected to decline from a high of 6.4% in 2020 to 3.3% in 2028
- All plans on target to reach full funding
 - All open plans projected to have a funded ratio of 95% or higher by 2023
 - PERS 1 and TRS 1 UAAL projected to be paid off in 2027 and 2026, respectively

The Future Might Be Different than We Expect

- OSA's risk assessment model simulates 2,000 different investment return scenarios
- Assess risks under Current Law and "Past Practices"
- Please refer to the RFC for likelihood of various projected affordability and solvency measures
 - Select Measures of Pension Risk table
- Affordability and solvency risk measures have improved
- [Commentary on Risk](#) webpage provides additional risk analysis and sensitivity of financial measures

2021 Was Different than Expected

- June 2021 revenue forecast better outlook than June 2020 revenue forecast
- Investment return on pension assets for FYE June 30, 2021, almost 29%
 - Highest single year return in over 30 years
 - Approximately \$22 billion in investment earnings above assumed
 - Will any be given back through a market downturn?

10
