WAC 246-290-668  Watershed control. (1) The purveyor shall, to the extent possible, exercise surveillance over conditions and activities in the watershed affecting source water quality. The purveyor shall develop and implement a department-approved watershed control program.

(2) The purveyor shall include a current evaluation of the watershed as part of the watershed control program within the water system plan under WAC 246-290-100 or small water system management program under WAC 246-290-105, whichever is applicable.

(3) The watershed evaluation must include a description of:
   (a) Conditions/activities in the watershed that are adversely affecting source water quality;
   (b) Changes in the watershed that could adversely affect source water quality that have occurred since the last watershed evaluation;
   (c) Sample results from the monitoring program the purveyor uses to assess the adequacy of watershed protection; and
   (d) Recommendations for improved watershed control.
