

WAC 246-290-72240 Report contents—Information on *Cryptosporidium*, radon, and other contaminants. This section takes effect on January 1, 2027.

(1) If the system has performed any monitoring for *Cryptosporidium*, and the results indicate that *Cryptosporidium* may be present in the source water or the finished water, the report must include:

- (a) A summary of the results of the monitoring; and
- (b) An explanation of the significance of the results.

(2) If the system has performed any monitoring for radon which indicates that radon may be present in the finished water, the report must include:

- (a) The results of the monitoring; and
- (b) An explanation of the significance of the results.

(3) If the system has performed additional monitoring that indicates the presence of other contaminants in the finished water, the department strongly encourages systems to report any results that may indicate a health concern. To determine if results may indicate a health concern, the department recommends that systems find out if EPA has proposed a National Primary Drinking Water Regulation or issued a health advisory for that contaminant by contacting EPA by calling the Safe Drinking Water Hotline (800-426-4791) or an alternative method identified on the website epa.gov/safewater. EPA considers detects above a proposed MCL or health advisory level to indicate possible health concerns. For the contaminants, the department recommends that the report include:

- (a) The results of the monitoring; and

(b) An explanation of the significance of the results noting the existence of a health advisory or a proposed regulation.
